

Index

1: A

acoustic antenna gain

[13.3: Acoustic Radiation and Antennas](#)

acoustic monopole

[13.3: Acoustic Radiation and Antennas](#)

Ampere's Law

[3.3: Quasistatic Behavior of Devices](#)

antenna beamwidth

[11.4: Applications](#)

aperture antenna

[11.1: Aperture Antennas and Diffraction](#)

2: C

commutator (motors)

[6.3: Rotary magnetic motors](#)

complex numbers

[14.2: Complex Numbers and Sinusoidal Representation](#)

conductivity

[2.5: Electric and Magnetic Fields in Media](#)

constitutive relations

[2.5: Electric and Magnetic Fields in Media](#)

CRT

[5.1: Forces on Free Charges and Currents](#)

3: D

dielectric constant

[2.5: Electric and Magnetic Fields in Media](#)

dielectric slab waveguides

[12.2: Optical Waveguides](#)

dominant charge carriers

[2.5: Electric and Magnetic Fields in Media](#)

dominant mode

[9.3: Waves Guided within Cartesian Boundaries](#)

4: E

electric pressure

[5.2: Forces on Charges and Currents within Conductors](#)

electroquasistatics

[3.3: Quasistatic Behavior of Devices](#)

evanescent waves

[9.3: Waves Guided within Cartesian Boundaries](#)

5: F

far field

[10.2: Short Dipole Antennas](#)

Faraday's Law

[3.3: Quasistatic Behavior of Devices](#)

Fresnel region

[11.1: Aperture Antennas and Diffraction](#)

6: H

Hall effect sensors

[6.6: Electric and magnetic sensors](#)

henry (unit)

[3.3: Quasistatic Behavior of Devices](#)

Hertzian dipole

[10.2: Short Dipole Antennas](#)

7: I

inductors

[3.2: Inductors and Transformers](#)

8: K

Kirchoff's current law (KCL)

[3.4: General circuits and solution methods](#)

Kirchoff's Voltage Law

[3.4: General circuits and solution methods](#)

9: L

Laplace's equation

[4.5: Laplace's equation and separation of variables](#)

Lasers

[12.3: Lasers](#)

Lorentz force

[1.2: Forces and the Measurement and Nature of Electromagnetic Fields](#)

[5.1: Forces on Free Charges and Currents](#)

10: M

magnetic pressure

[5.2: Forces on Charges and Currents within Conductors](#)

magnetic saturation

[2.5: Electric and Magnetic Fields in Media](#)

11: N

Newton's first law

[5.1: Forces on Free Charges and Currents](#)

12: O

overlinetor identity

[2.2: Electromagnetic Waves in the Time Domain](#)

13: P

permittivity

[2.5: Electric and Magnetic Fields in Media](#)

photonic forces

[5.6: Photonic Forces](#)

phototubes

[12.4: Optical detectors, multiplexers, interferometers, and switches](#)

plane wave

[9.2: Waves incident on planar boundaries at angles](#)

polarization

[2.2: Electromagnetic Waves in the Time Domain](#)

polarization charge density

[2.5: Electric and Magnetic Fields in Media](#)

Poynting overlinetor

[2.7: Power and Energy in the Time and Frequency Domains and the Poynting Theorem](#)

Poynting theorem

[2.7: Power and Energy in the Time and Frequency Domains and the Poynting Theorem](#)

14: R

radar

[11.4: Applications](#)

radiation pressure

[5.6: Photonic Forces](#)

radiation resistance

[10.2: Short Dipole Antennas](#)

reluctance motors

[6.3: Rotary magnetic motors](#)

remote sensing

[11.3: Propagation of Radio Waves and Thermal Emission](#)

15: S

scalar electric potential

[10.1: Radiation from charges and currents](#)

skin depth

[4.3: Relaxation of Fields and Skin Depth](#)

solar sail

[5.6: Photonic Forces](#)

stator

[6.3: Rotary magnetic motors](#)

Stokes' theorem

[2.4: Relation between integral and differential forms of Maxwell's equations](#)

16: T

thermal noise

[11.3: Propagation of Radio Waves and Thermal Emission](#)

toroidal inductors

[3.2: Inductors and Transformers](#)

transmission line wave equation

[7.2: TEM Lines with Junctions](#)

17: U

Uniform dipole arrays

[10.4: Antenna Arrays](#)

uniform plane wave

[9.2: Waves incident on planar boundaries at angles](#)

18: W

waveguides

[12.2: Optical Waveguides](#)

wire antennas

[11.2: Wire Antennas](#)

wireless communications systems

[11.4: Applications](#)
