

TABLE OF CONTENTS

Introduction to Sound

Licensing

1: Basics

- 1.1: Basics- Work and Energy
 - 1.1.1: Motion and Force
 - 1.1.2: Newton's Three Laws
 - 1.1.3: Density and Pressure
 - 1.1.4: Energy and Power
 - 1.1.5: Two Energy Laws
 - 1.1.6: Conservation of Energy Simulation
- 1.2: Basics- The Molecular Basis of Matter
 - 1.2.1: Molecular Dynamics Simulation

2: Vibrations

- 2.1: Vibrations
 - 2.1.1: Simple Harmonic Motion
 - 2.1.2: Period, Frequency, Amplitude, Restoring Force, Phase
 - 2.1.3: Simple Harmonic Motion Simulation

3: Resonance

- 3.1: Resonance
 - 3.1.1: Resonance Examples
 - 3.1.2: A Few Other Examples of Resonance
 - 3.1.3: Harmonic Motion and Resonance Simulation
- 3.2: Resonance Springs
 - 3.2.1: Driven Springs Simulation
- 3.3: Quality Factor
 - 3.3.1: Quality
 - 3.3.2: Q-Factor Simulation

4: Wave Types

- 4.1: Transverse Waves
 - 4.1.1: Transverse Waves
 - 4.1.2: Transverse Wave Simulation
- 4.2: Longitudinal Waves
 - 4.2.1: Longitudinal Waves
 - 4.2.2: Longitudinal Wave Simulation
- 4.3: Other Waves
 - 4.3.1: Torsional Waves
 - 4.3.2: Examples of Waves
 - 4.3.3: Water Wave Simulation

- 4.4: Electromagnetic Waves
 - 4.4.1: Electromagnetic Waves
 - 4.4.2: Antenna Simulation

5: Wave Speed

- 5.1: Wave Speed
 - 5.1.1: Speeds of Different Types of Waves
 - 5.1.2: Speed of a Wave Simulation

6: Wave Behavior

- 6.1: Doppler Shift
 - 6.1.1: Doppler Shift
 - 6.1.2: The Doppler Effect Simulation
- 6.2: Mirrors and Reflection
 - 6.2.1: Reflection
 - 6.2.2: Reflection Simulation
- 6.3: Refraction
 - 6.3.1: Refraction
 - 6.3.2: Refraction Simulation
- 6.4: Lenses
 - 6.4.1: Lens Simulation
- 6.5: Dispersion
 - 6.5.1: Dispersion Simulation
- 6.6: Adding Wave Pulses
 - 6.6.1: Adding Waves
 - 6.6.2: Adding Two Wave Pulses (Superposition)
- 6.7: Adding Sinusoidal Waves
 - 6.7.1: Adding Two Linear Waves Simulation
- 6.8: Path Difference
 - 6.8.1: Interference
 - 6.8.2: Interference Due to Path Difference Simulation
- 6.9: Interference
 - 6.9.1: Interference- Ripple Tank Simulation
- 6.10: Diffraction
 - 6.10.1: Diffraction
 - 6.10.2: Diffraction Simulation

7: Pitch, Loudness and Timbre

- 7.1: Pitch, Loudness and Timbre
 - 7.1.1: Pitch
 - 7.1.2: Loudness
 - 7.1.3: The Decibel Scale
 - 7.1.4: Just Noticeable Difference
 - 7.1.5: Timbre (the first time)

8: Fourier Series

- 8.1: Sound Texture
 - 8.1.1: Wave Shape
 - 8.1.2: Sound Waveforms Simulation
- 8.2: Fourier Series
 - 8.2.1: Fourier Series
 - 8.2.2: Fourier Analysis
 - 8.2.3: Fourier Series Simulation
 - 8.2.4: Timbre (again!)
- 8.3: Microphone Sound Analyzer
 - 8.3.1: Fourier Analysis of Microphone Data

9: The Ear and Perception

- 9.1: The Ear and Perception
 - 9.1.1: Structure of the Ear
 - 9.1.2: The Place Theory of Hearing
 - 9.1.3: The Temporal Theory of Hearing
 - 9.1.4: Hearing Loss
 - 9.1.5: The Missing Fundamental
 - 9.1.6: Missing Fundamental Simulation
- 9.2: Beats
 - 9.2.1: Other Combination Tones
 - 9.2.2: Beats and Critical Bands Simulation
 - 9.2.3: Other Interesting Auditory Phenomena
 - 9.2.4: Animal Hearing

10: Strings

- 10.1: Driven String and Resonance
 - 10.1.1: String Resonance
 - 10.1.2: Driven String Simulation
- 10.2: Plucked String
 - 10.2.1: Plucked String
 - 10.2.2: Plucked String Simulation
- 10.3: Vibrating Plates Simulation
 - 10.3.1: Surface Resonances
 - 10.3.2: Vibrating Plate Simulation
 - 10.3.3: Other Surfaces
 - 10.3.4: Volume or Helmholtz Resonance
 - 10.3.5: Stringed Instruments

11: Tubes

- 11.1: Standing Waves in a Tube
 - 11.1.1: Tube Resonance
 - 11.1.2: Standing Wave Simulation
- 11.2: Reflection of Waves at a Boundary
 - 11.2.1: Reflection of Waves
 - 11.2.2: Reflection Simulation

- 11.3: Impedance
 - 11.3.1: Impedance
 - 11.3.2: Impedance Simulation
 - 11.3.3: Woodwind Instruments
 - 11.3.4: Brass Instruments
 - 11.3.5: Pipe Organs and Other Reed Instruments

12: Percussion

- 12.1: Percussion and Drumheads
 - 12.1.1: Vibrating Membranes
 - 12.1.2: Circular Drum Head Simulation
 - 12.1.3: Drums
 - 12.1.4: Harmonic Percussion Instruments
 - 12.1.5: Other Musical Instruments

13: Voice

- 13.1: The Human Voice
 - 13.1.1: The Vocal Tract
 - 13.1.2: Vocal Formants
 - 13.1.3: Phonemes
 - 13.1.4: Singing
 - 13.1.5: Animal Sounds

14: Musical Scales

- 14.1: Musical Scales
 - 14.1.1: The Pythagorean Scale
 - 14.1.2: Equal Temperament
 - 14.1.3: Temperament Simulation

15: Acoustics

- 15.1: Acoustics
 - 15.1.1: 16.1.1-Acoustic Qualities
 - 15.1.2: Reverberation
 - 15.1.3: Other Acoustical Effects
 - 15.1.4: Sound Reinforcement
 - 15.1.5: Spatial Perception
 - 15.1.6: Animal Acoustics
 - 15.1.7: Other Acoustical Applications

16: Electricity and Magnetism

- 16.1: EandM- Ohm's Law
 - 16.1.1: Ohm's Law
- 16.2: EandM- Currents and Magnetic Fields
 - 16.2.1: Currents Cause Magnetic Fields
 - 16.2.2: Magnetic Field Simulation
- 16.3: EandM- Electric and Magnetic Forces
 - 16.3.1: Currents in a Magnetic Field MAY Experience a Force
 - 16.3.2: Electric and Magnetic Forces Simulation

- [16.4: EandM- Faraday's Law](#)
 - [16.4.1: A CHANGING Magnetic Field Can Cause Current to Flow](#)
 - [16.4.2: Faraday's Law Simulation](#)

17: Electronics

- [17.1: Electronics](#)
 - [17.1.1: Microphones](#)
 - [17.1.2: Recording](#)
 - [17.1.3: Amplification](#)
 - [17.1.4: Speakers](#)
 - [17.1.5: Transmission](#)
