

Index

A

acceleration

2.4: Average and Instantaneous Acceleration

Acceleration due to Gravity

2.7: Free Fall

acceleration vector

4.3: Acceleration Vector

ame constant acceleration

2.7: Free Fall

Angular acceleration

11.2: Rotational Variables

Angular frequency

4.5: Uniform Circular Motion

Angular momentum

12.3: Angular Momentum

12.4: Conservation of Angular Momentum

angular position

11.2: Rotational Variables

angular velocity

11.2: Rotational Variables

anticommutative property

3.9: Products of Vectors (Part 2)

aphelion

13.6: Kepler's Laws of Planetary Motion

apparent weight

13.3: Gravitation Near Earth's Surface

areal velocity

13.6: Kepler's Laws of Planetary Motion

associative

3.2: Scalars and Vectors (Part 1)

Average Acceleration

2.4: Average and Instantaneous Acceleration

average power

8.5: Power

average speed

2.3: Instantaneous Velocity and Speed

B

banked curve

7.6: Centripetal Force

base quantities

1.3: Units and Standards

base quantity

1.3: Units and Standards

base unit

1.3: Units and Standards

Base units

1.3: Units and Standards

Black hole

13.8: Einstein's Theory of Gravity

C

Center of mass

10.9: Center of Mass (Part 1)

10.10: Center of Mass (Part 2)

centripetal acceleration

4.5: Uniform Circular Motion

Centripetal force

7.6: Centripetal Force

cern

5.10: Relativistic Energy

classical (Galilean) velocity addition

5.7: Relativistic Velocity Transformation

closed system

10.5: Conservation of Linear Momentum (Part 1)

10.6: Conservation of Linear Momentum (Part 2)

Collisions

10.8: Collisions in Multiple Dimensions

Commutative

3.2: Scalars and Vectors (Part 1)

Conservation of angular momentum

12.4: Conservation of Angular Momentum

conservative force

9.3: Conservative and Non-Conservative Forces

conserved quantity

9.4: Conservation of Energy

constant acceleration

2.5: Motion with Constant Acceleration (Part 1)

2.7: Free Fall

conversion factor

1.4: Unit Conversion

Coriolis Force

7.6: Centripetal Force

D

derived quantity

1.3: Units and Standards

derived unit

1.3: Units and Standards

derived units

1.3: Units and Standards

Dimensional Analysis

1.5: Dimensional Analysis

dimensionally consistent

1.5: Dimensional Analysis

dimensionless

1.5: Dimensional Analysis

direction angle

3.4: Coordinate Systems and Components of a Vector (Part 1)

displacement

2.2: Position, Displacement, and Average Velocity

3.2: Scalars and Vectors (Part 1)

distance traveled

2.2: Position, Displacement, and Average Velocity

distributive

3.2: Scalars and Vectors (Part 1)

Dot product

3.8: Products of Vectors (Part 1)

drag force

7.7: Drag Force and Terminal Speed

Dynamics

6.2: Forces

E

elastic

10.7: Types of Collisions

energy conservation

9.4: Conservation of Energy

English units

1.3: Units and Standards

equal vectors

3.6: Algebra of Vectors

equilibrium point

9.5: Potential Energy Diagrams and Stability

Escape velocity

13.4: Gravitational Potential Energy and Total Energy

estimation

1.6: Estimates and Fermi Calculations

event

5.6: The Lorentz Transformation

exact differential

9.3: Conservative and Non-Conservative Forces

explosion

10.7: Types of Collisions

external force

6.2: Forces

10.9: Center of Mass (Part 1)

10.10: Center of Mass (Part 2)

F

Final Velocity

2.5: Motion with Constant Acceleration (Part 1)

first postulate of special relativity

5.2: Invariance of Physical Laws

force

6.2: Forces

free fall

2.7: Free Fall

6.5: Mass and Weight

Friction

7.4: Friction (Part 1)

7.5: Friction (Part 2)

G

Galilean relativity

5.2: Invariance of Physical Laws

Galilean transformation

5.6: The Lorentz Transformation

general relativity

13.8: Einstein's Theory of Gravity

gravitational field

13.3: Gravitation Near Earth's Surface

Gravitational potential energy

13.4: Gravitational Potential Energy and Total Energy

gravity

2.7: Free Fall

Gyroscopes

12.5: Precession of a Gyroscope

H

Hooke's law

6.7: Common Forces

I

ideal banking

7.6: Centripetal Force

Impulse

10.3: Impulse and Collisions (Part 1)

10.4: Impulse and Collisions (Part 2)

inelastic

10.7: Types of Collisions

Inertia

6.3: Newton's First Law

inertial force

7.6: Centripetal Force

inertial frame of reference

5.2: Invariance of Physical Laws

Inertial Frames

5.2: Invariance of Physical Laws

inertial reference frame

6.3: Newton's First Law

instantaneous angular acceleration

11.2: Rotational Variables

instantaneous angular velocity

11.2: Rotational Variables

instantaneous power

8.5: Power

instantaneous speed

2.3: Instantaneous Velocity and Speed

Instantaneous velocity

2.3: Instantaneous Velocity and Speed

Integral Calculus

2.8: Finding Velocity and Displacement from Acceleration

internal force

10.10: Center of Mass (Part 2)

K

Kepler's first law

13.6: Kepler's Laws of Planetary Motion

Kepler's second law

13.6: Kepler's Laws of Planetary Motion

Kepler's third law

13.6: Kepler's Laws of Planetary Motion

kilogram

1.3: Units and Standards

Kinematic

2.8: Finding Velocity and Displacement from Acceleration

Kinematic Equations

2.8: Finding Velocity and Displacement from Acceleration

kinematics of rotational motion

11.3: Rotation with Constant Angular Acceleration

kinetic energy

8.3: Kinetic Energy

Kinetic Friction

7.4: Friction (Part 1)

7.5: Friction (Part 2)

L

law

1.2: The Scope and Scale of Physics

law of conservation of angular momentum

12.4: Conservation of Angular Momentum

Law of Conservation of Momentum

10.5: Conservation of Linear Momentum (Part 1)

10.6: Conservation of Linear Momentum (Part 2)

Law of inertia

6.3: Newton's First Law

Length contraction

5.5: Length Contraction

lever arm

11.7: Torque

light cone

5.6: The Lorentz Transformation

linear mass density

10.9: Center of Mass (Part 1)

10.10: Center of Mass (Part 2)

11.6: Calculating Moments of Inertia

Lorentz transformations

5.6: The Lorentz Transformation

M

Magnitude

3.2: Scalars and Vectors (Part 1)

mechanical energy

9.4: Conservation of Energy

Meter

1.3: Units and Standards

method of adding percents

1.7: Significant Figures

metric system

1.3: Units and Standards

model

1.2: The Scope and Scale of Physics

Moment of Inertia

11.5: Moment of Inertia and Rotational Kinetic Energy

momentum

10.2: Linear Momentum

N

neap tide

13.7: Tidal Forces

net external force

6.2: Forces

net work

8.4: Work-Energy Theorem

Neutron star

13.8: Einstein's Theory of Gravity

Newton

6.2: Forces

Newton's first law of motion

6.3: Newton's First Law

Newton's law of gravitation

13.2: Newton's Law of Universal Gravitation

Newton's second law

6.4: Newton's Second Law

Newton's second law for rotation

11.8: Newton's Second Law for Rotation

Newton's second law of motion

6.4: Newton's Second Law

Newton's third law

6.6: Newton's Third Law

Newton's third law of motion

6.6: Newton's Third Law

noninertial frame of reference

7.6: Centripetal Force

normal force

6.7: Common Forces

null vector

3.6: Algebra of Vectors

O

orbital period

13.5: Satellite Orbits and Energy

orbital speed

13.5: Satellite Orbits and Energy

order of magnitude

1.2: The Scope and Scale of Physics

orthogonal vectors

3.2: Scalars and Vectors (Part 1)

P

parallel axis

11.6: Calculating Moments of Inertia

parallel vectors

3.2: Scalars and Vectors (Part 1)

parallelogram rule

3.3: Scalars and Vectors (Part 2)

perfectly inelastic

10.7: Types of Collisions

perihelion

13.6: Kepler's Laws of Planetary Motion

physical quantity

1.3: Units and Standards

physics

1.2: The Scope and Scale of Physics

polar coordinate system

3.5: Coordinate Systems and Components of a Vector (Part 2)

Polar coordinates

3.5: Coordinate Systems and Components of a Vector (Part 2)

position

2.2: Position, Displacement, and Average Velocity

potential energy

9.2: Potential Energy of a System

potential energy diagram

9.5: Potential Energy Diagrams and Stability

potential energy difference

9.2: Potential Energy of a System

power

8.5: Power

Precession

12.5: Precession of a Gyroscope

Principle of equivalence

13.8: Einstein's Theory of Gravity

Projectile motion

4.4: Projectile Motion

proper length

5.5: Length Contraction

proper time

5.4: Time Dilation

R

radial coordinate

3.5: Coordinate Systems and Components of a Vector (Part 2)

reference frame

4.6: Relative Motion in One and Two Dimensions

relative velocity

4.6: Relative Motion in One and Two Dimensions

relativistic Doppler effect

5.8: Doppler Effect for Light

Relativistic Energy

5.10: Relativistic Energy

relativistic factor

5.9: Relativistic Momentum

relativistic kinetic energy

[5.10: Relativistic Energy](#)

relativistic momentum

[5.9: Relativistic Momentum](#)

relativistic velocity addition

[5.7: Relativistic Velocity Transformation](#)

renewable

[9.6: Sources of Energy](#)

rest energy

[5.10: Relativistic Energy](#)

rest frame

[5.2: Invariance of Physical Laws](#)

rest mass

[5.9: Relativistic Momentum](#)

resultant

[3.2: Scalars and Vectors \(Part 1\)](#)

resultant vector

[3.2: Scalars and Vectors \(Part 1\)](#)

Rocket equation

[10.11: Rocket Propulsion](#)

rolling motion

[12.2: Rolling Motion](#)

rotational dynamics

[11.8: Newton's Second Law for Rotation](#)

rotational kinetic energy

[11.5: Moment of Inertia and Rotational Kinetic Energy](#)

rotational work

[11.9: Work and Power for Rotational Motion](#)

S

scalar components

[3.4: Coordinate Systems and Components of a Vector \(Part 1\)](#)

scalar equation

[3.2: Scalars and Vectors \(Part 1\)](#)

Scalar product

[3.8: Products of Vectors \(Part 1\)](#)

Schwarzschild radius

[13.8: Einstein's Theory of Gravity](#)

second

[1.3: Units and Standards](#)

second postulate of special relativity
