

Index

A

acceleration

2.5: Acceleration

Acceleration due to Gravity

2.8: Falling Objects

air resistance

3.5: Projectile Motion

analytical method

3.4: Vector Addition and Subtraction- Analytical Methods

angular velocity

5.2: Rotation Angle and Angular Velocity

application

1.1: The Basics of Physics

4.10: Further Applications of Newton's Laws of Motion

approximation

1.2: Scientific Notation and Order of Magnitude

arc length

5.2: Rotation Angle and Angular Velocity

Average Acceleration

2.5: Acceleration

average speed

2.4: Time, Velocity, and Speed

Average Velocity

2.4: Time, Velocity, and Speed

B

banked curve

5.4: Centripetal Force

basal metabolic rate

6.9: Work, Energy, and Power in Humans

base quantities

1.3: Units and Standards

base quantity

1.3: Units and Standards

base unit

1.3: Units and Standards

Base units

1.3: Units and Standards

C

carrier particle

4.11: Extended Topic- The Four Basic Forces—An Introduction

Center of mass

5.6: Newton's Universal Law of Gravitation

Centrifugal force

5.5: Fictitious Forces and Non-inertial Frames - The Coriolis Force

centripetal acceleration

5.3: Centripetal Acceleration

Centripetal force

5.4: Centripetal Force

change in momentum

7.3: Impulse

chemical energy

6.7: Conservation of Energy

classical relativity

3.6: Addition of Velocities

Collisions

7.7: Collisions of Point Masses in Two Dimensions

Commutative

3.3: Vector Addition and Subtraction- Graphical Methods

component

3.3: Vector Addition and Subtraction- Graphical Methods

conduction

8.5: Heat Transfer Methods

8.6: Conduction

conservation of mechanical energy

6.5: Conservative Forces and Potential Energy

conservation of momentum principle

7.4: Conservation of Momentum

conservative force

6.5: Conservative Forces and Potential Energy

constant acceleration

2.6: Motion Equations for Constant Acceleration in One Dimension

convection

8.5: Heat Transfer Methods

8.7: Convection

conversion factor

1.4: Unit Conversion

Coordinate Systems

2.3: Vectors, Scalars, and Coordinate Systems

Coriolis Force

5.5: Fictitious Forces and Non-inertial Frames - The Coriolis Force

D

deceleration

2.5: Acceleration

dependent variable

2.9: Graphical Analysis of One-Dimensional Motion

derived quantity

1.3: Units and Standards

derived unit

1.3: Units and Standards

derived units

1.3: Units and Standards

Dimensional Analysis

1.5: Dimensional Analysis

dimensionally consistent

1.5: Dimensional Analysis

dimensionless

1.5: Dimensional Analysis

direction

3.3: Vector Addition and Subtraction- Graphical Methods

displacement

2.2: Displacement

2.3: Vectors, Scalars, and Coordinate Systems

distance

2.2: Displacement

2.3: Vectors, Scalars, and Coordinate Systems

distance traveled

2.2: Displacement

drag forces

4.8: Drag Forces

Dynamics

4.2: Development of Force Concept

E

efficiency

6.7: Conservation of Energy

elapsed time

2.4: Time, Velocity, and Speed

Elastic collision

7.5: Elastic Collisions in One Dimension

elastic collisions

7.7: Collisions of Point Masses in Two Dimensions

electrical energy

6.7: Conservation of Energy

emissivity

8.8: Radiation

energy

6.2: Work- The Scientific Definition

English units

1.3: Units and Standards

exponent

1.2: Scientific Notation and Order of Magnitude

external force

4.2: Development of Force Concept

F

falling

2.8: Falling Objects

fictitious force

5.5: Fictitious Forces and Non-inertial Frames - The Coriolis Force

force

4.2: Development of Force Concept

force field

4.11: Extended Topic- The Four Basic Forces—An Introduction

forces

4.4: Newton's Second Law of Motion- Concept of a System

fossil fuels

6.10: World Energy Use

Friction

4.7: Friction

6.6: Nonconservative Forces

G

Graphical analysis

2.9: Graphical Analysis of One-Dimensional Motion

gravitational constant, G

5.6: Newton's Universal Law of Gravitation

Gravitational potential energy

6.4: Gravitational Potential Energy

greenhouse effect

8.8: Radiation

H

head

3.3: Vector Addition and Subtraction- Graphical Methods

heat

8.2: Heat

Heat capacity

8.3: Temperature Change and Heat Capacity

heat transfer

8.3: Temperature Change and Heat Capacity

horsepower

6.8: Power

I

ideal angle

5.4: Centripetal Force

ideal banking

5.4: Centripetal Force

ideal speed

5.4: Centripetal Force

Impulse

7.3: Impulse

independent variable

2.9: Graphical Analysis of One-Dimensional Motion

Inelastic collision

7.6: Inelastic Collisions in One Dimension

Inertia

4.3: Newton's First Law of Motion- Inertia

inertial frame of reference

4.6: Normal, Tension, and Other Examples of Forces

instantaneous acceleration

2.5: Acceleration

Instantaneous velocity

2.4: Time, Velocity, and Speed

internal kinetic energy

7.5: Elastic Collisions in One Dimension

isolated system

7.4: Conservation of Momentum

J

joule

6.2: Work- The Scientific Definition

K

Kepler's first law

5.7: Satellites and Kepler's Laws- An Argument for Simplicity

Kepler's Second Law

5.7: Satellites and Kepler's Laws- An Argument for Simplicity

Kepler's third law

5.7: Satellites and Kepler's Laws- An Argument for Simplicity

kilocalorie

8.2: Heat

kilogram

1.3: Units and Standards

Kinematics

2.2: Displacement

2.6: Motion Equations for Constant Acceleration in One Dimension

3.5: Projectile Motion

Kinematics problems

2.7: Problem-Solving Basics for One-Dimensional Kinematics

kinetic energy

6.3: Kinetic Energy and the Work-Energy Theorem

Kinetic Friction

4.7: Friction

L

latent heat

8.4: Phase Change and Latent Heat

law

1.1: The Basics of Physics

law of conservation of energy

6.7: Conservation of Energy

Law of inertia

4.3: Newton's First Law of Motion- Inertia

Linear momentum

7.2: Linear Momentum and Force

M

Magnitude

3.3: Vector Addition and Subtraction- Graphical Methods

mass

4.3: Newton's First Law of Motion- Inertia

matter

1.1: The Basics of Physics

mechanical energy

6.5: Conservative Forces and Potential Energy

mechanical equivalent of heat

8.2: Heat

metabolic rate

6.9: Work, Energy, and Power in Humans

Meter

1.3: Units and Standards

method of adding percents

1.6: Significant Figures

metric system

1.3: Units and Standards

microgravity

5.6: Newton's Universal Law of Gravitation

model

1.1: The Basics of Physics

2.4: Time, Velocity, and Speed

momentum

7.7: Collisions of Point Masses in Two Dimensions

motion

3.5: Projectile Motion

N

net work

6.3: Kinetic Energy and the Work-Energy Theorem

Newton's third law of motion

4.5: Newton's Third Law of Motion- Symmetry in Forces

Newton's Universal Law of Gravitation

5.6: Newton's Universal Law of Gravitation

newton's laws

4.10: Further Applications of Newton's Laws of Motion

nonconservative force

6.6: Nonconservative Forces

normal force

4.6: Normal, Tension, and Other Examples of Forces

nuclear energy

6.7: Conservation of Energy

O

order of magnitude

1.2: Scientific Notation and Order of Magnitude

P

perfectly inelastic collision

7.6: Inelastic Collisions in One Dimension

phase change

8.4: Phase Change and Latent Heat

8.7: Convection

physical quantity

1.3: Units and Standards

pit

5.2: Rotation Angle and Angular Velocity

planetary motion

5.7: Satellites and Kepler's Laws- An Argument for Simplicity

position

2.2: Displacement

potential energy

6.5: Conservative Forces and Potential Energy

potential energy of a spring

6.5: Conservative Forces and Potential Energy

power

6.8: Power

problem solving

4.9: Problem-Solving Strategies

projectile

3.5: Projectile Motion

Projectile motion

3.5: Projectile Motion

Q

Quarks

7.4: Conservation of Momentum

R

R factor

8.6: Conduction

Radians

5.2: Rotation Angle and Angular Velocity

radiant energy

6.7: Conservation of Energy

radiation

8.5: Heat Transfer Methods

8.8: Radiation

radius of curvature

5.2: Rotation Angle and Angular Velocity

range

3.5: Projectile Motion

rate of conductive heat transfer

8.6: Conduction

relative velocity

3.6: Addition of Velocities

relativity

3.6: Addition of Velocities

renewable forms of energy

6.10: World Energy Use

resultant

3.3: Vector Addition and Subtraction- Graphical Methods

resultant vector

3.3: Vector Addition and Subtraction- Graphical Methods

rocket propulsion
