

## Index

### A

abbreviated action  
9.3: The Abbreviated Action

acoustic phonons  
19.9: A Note on the Physics of These Waves

adiabatic invariant  
13.1: Adiabatic Invariants

anharmonic oscillator  
22.2: Frequency of Oscillation of a Particle is a Slightly Anharmonic Potential

asymmetrical top  
28.4: The Asymmetrical Top

attractors  
23.2: The Road to Chaos

### B

brachistochrone  
2.12: The Brachistochrone

### C

canonical transformations  
10.2: General and Canonical Transformations

canonically conjugate  
10.5: Poisson Brackets under Canonical Transformations

Centrifugal force  
29.2: Uniformly Rotating Frame

circulants  
19.2: The Circulant Matrix- Nature of its Eigenstates

commutators  
8.6: Hamilton's Equations from Action Minimization

conic sections  
14.1: Preliminaries- Conic Sections

Contact Transformations  
10.2: General and Canonical Transformations

Coriolis Force  
29.2: Uniformly Rotating Frame

cyclic variables  
12.3: Separation of Variables for a Central Potential; Cyclic Variables

### D

d'Alembert's principle  
30.3: D'Alembert's Principle

differential cross section  
16.3: The Differential Cross Section

discrete Fourier transform  
19.8: The Discrete Fourier Transform

### E

eccentricity  
14.2: The Ellipse

### ellip

14.2: The Ellipse

Euler angles  
27: Euler Angles

Euler's equations  
28: Euler's Equations  
28.1: Introduction to Euler's Equations  
28.2: Free Rotation of a Symmetric Top Using Euler's Equations

### F

Fermat's Principle of Least Action  
3.3: Fermat's Principle

### G

gyrocompass  
29.4: Gyroscopes and Gyrocompasses in Navigation

Gyroscope  
29.4: Gyroscopes and Gyrocompasses in Navigation

### H

Hamilton's equations  
6.8: Hamilton's Equations

Hamiltonian (classical)  
4.10: Conservation Laws and Noether's Theorem

Huygen's principle  
3.2: Huygens' Picture of Wave Propagation

### I

impact parameter  
16.3: The Differential Cross Section

inertia tensor  
24.4: The Inertia Tensor  
24.8: Principal Axes Form of Moment of Inertia Tensor

invariant under rotation  
4.10: Conservation Laws and Noether's Theorem

invariant under time translation  
4.10: Conservation Laws and Noether's Theorem

### J

Jacobi identity  
7.3: The Jacobi Identity

Jacobians  
11.6: Jacobians 101

### L

Lagrange multiplier  
2.11: Lagrange Multiplier for the Chain

Lagrange multipliers  
2.10: Lagrange Multipliers

Legendre transform  
6.5: Math Note - the Legendre Transform

### line of nodes

27.1: Definition of Euler Angles

### M

mass matrix  
9.3: The Abbreviated Action

### N

Noether's theorem  
4.10: Conservation Laws and Noether's Theorem

Nutation  
27.4: Motion of Symmetrical Top around a Fixed Base with Gravity - Nutation

### P

parabola  
14.3: The Parabola

periodic boundary conditions  
19.1: The Model

phase space  
6.2: Phase Space

Poisson Brackets  
7.1: The Poisson Bracket

Poisson spot  
3.2: Huygens' Picture of Wave Propagation

Poisson's theorem  
7.4: Poisson's Theorem

ponderomotive force  
21.1: Introduction to the Ponderomotive Force

Precession  
27.5: Steady Precession

### R

rigid rotor  
24.3: General Motion of a Rotating Rigid Body

rotating frame  
29.2: Uniformly Rotating Frame

### S

scattering angle  
16.2: Discovery of the Nucleus

separation of variables  
12.3: Separation of Variables for a Central Potential; Cyclic Variables

symmetric top  
27.3: Free Motion of a Symmetrical Top

### V

Virial theorem  
5.3: The Virial Theorem
