- Graduate Classical Mechanics (Fowler) - *Undeclared*
 - Front Matter - *Undeclared*
 - TitlePage - *Undeclared*
 - InfoPage - *Undeclared*
 - Table of Contents - *Undeclared*
 - Licensing - *Undeclared*
 - Preface - *Undeclared*
 - About the Book - *Undeclared*
 - 1: Introductory Statics - the Catenary and the Arch - *Undeclared*
 - 1.1: The Catenary - *Undeclared*
 - 1.2: A Tight String - *Undeclared*
 - 1.3: Not So Tight - *Undeclared*
 - 1.4: Ideal Arches - *Undeclared*
 - 2: The Calculus of Variations - *Undeclared*
 - 2.1: The Catenary and the Soap Film - *Undeclared*
 - 2.2: A Soap Film Between Two Horizontal Rings- the Euler-Lagrange Equation - *Undeclared*
 - 2.3: General Method for the Minimization Problem - *Undeclared*
 - 2.4: An Important First Integral of the Euler-Lagrange Equation - *Undeclared*
 - 2.5: Fastest Curve for Given Horizontal Distance - *Undeclared*
 - 2.6: The Perfect Pendulum - *Undeclared*
 - 2.7: Calculus of Variations with Many Variables - *Undeclared*
 - 2.8: Multivariable First Integral - *Undeclared*
 - 2.9: The Soap Film and the Chain - *Undeclared*
 - 2.10: Lagrange Multipliers - *Undeclared*
 - 2.11: Lagrange Multiplier for the Chain - *Undeclared*
 - 2.12: The Brachistochrone - *Undeclared*
 - 3: Fermat's Principle of Least Time - *Undeclared*
 - 3.1: Another Minimization Problem... - *Undeclared*
 - 3.2: Huygens' Picture of Wave Propagation - *Undeclared*
 - 3.3: Fermat's Principle - *Undeclared*
 - 3.4: Reflection, Too - *Undeclared*
 - 3.5: The Bottom Line- Geometric Optics and Wave Optics - *Undeclared*
 - 4: Hamilton's Principle and Noether's Theorem - *Undeclared*
 - 4.1: Introduction- Galileo and Newton - *Undeclared*
 - 4.2: Derivation of Hamilton's Principle from Newton's Laws in Cartesian Co-ordinates- Calculus of Variations Done Backwards! - *Undeclared*
 - 4.3: But Why? - *Undeclared*
 - 4.4: Lagrange's Equations from Hamilton's Principle Using Calculus of Variations - *Undeclared*
 - 4.5: Generalized Momenta and Forces - *Undeclared*
 - 4.6: Non-uniqueness of the Lagrangian - *Undeclared*
 - 4.7: First Integral- Energy Conservation and the Hamiltonian - *Undeclared*
 - 4.8: Example 1- One Degree of Freedom- Atwood's Machine - *Undeclared*
 - 4.9: Example 2- Lagrangian Formulation of the Central Force Problem - *Undeclared*
 - 4.10: Conservation Laws and Noether's Theorem - *Undeclared*
 - 4.11: Momentum Conservation - *Undeclared*
 - 4.12: Center of Mass - *Undeclared*
 - 4.13: Angular Momentum Conservation - *Undeclared*
 - 5: Mechanical Similarity and the Virial Theorem - *Undeclared*
 - 5.1: Some Examples - *Undeclared*
 - 5.2: Lagrangian Treatment - *Undeclared*
 - 5.3: The Virial Theorem - *Undeclared*
 - 6: Hamilton's Equations - *Undeclared*
 - 6.1: A Dynamical System's Path in Configuration Space and in State Space - *Undeclared*
 - 6.2: Phase Space - *Undeclared*
 - 6.3: Going From State Space to Phase Space - *Undeclared*
 - 6.4: How It's Done in Thermodynamics - *Undeclared*
 - 6.5: Math Note - the Legendre Transform - *Undeclared*
 - 6.6: Hamilton's Use of the Legendre Transform - *Undeclared*

- 6.7: Checking that We Can Eliminate the q 's - *Undeclared*
- 6.8: Hamilton's Equations - *Undeclared*
- 6.9: A Simple Example - *Undeclared*
- 7: Time Evolution in Phase Space- Poisson Brackets and Constants of the Motion - *Undeclared*
 - 7.1: The Poisson Bracket - *Undeclared*
 - 7.2: Interlude - a Bit of History of Quantum Mechanics - *Undeclared*
 - 7.3: The Jacobi Identity - *Undeclared*
 - 7.4: Poisson's Theorem - *Undeclared*
 - 7.5: Example- Angular Momentum Components - *Undeclared*
- 8: A New Way to Write the Action Integral - *Undeclared*
 - 8.1: Function of Endpoint Position - *Undeclared*
 - 8.2: Function of Endpoint Time - *Undeclared*
 - 8.3: Varying Both Ends - *Undeclared*
 - 8.4: Another Way of Writing the Action Integral - *Undeclared*
 - 8.5: How this Classical Action Relates to Phase in Quantum Mechanics - *Undeclared*
 - 8.6: Hamilton's Equations from Action Minimization - *Undeclared*
 - 8.7: How Can p , q Really Be Independent Variables? - *Undeclared*
- 9: Maupertuis' Principle - Minimum Action Path at Fixed Energy - *Undeclared*
 - 9.1: Divine Guidance - *Undeclared*
 - 9.2: It's Not About Time - *Undeclared*
 - 9.3: The Abbreviated Action - *Undeclared*
 - 9.4: Maupertuis' Principle and the Time-Independent Schrödinger Equation - *Undeclared*
- 10: Canonical Transformations - *Undeclared*
 - 10.1: Point Transformations - *Undeclared*
 - 10.2: General and Canonical Transformations - *Undeclared*
 - 10.3: Generating Functions for Canonical Transformations - *Undeclared*
 - 10.4: Generating Functions in Different Variables - *Undeclared*
 - 10.5: Poisson Brackets under Canonical Transformations - *Undeclared*
 - 10.6: Time Development is a Canonical Transformation Generated by the Action - *Undeclared*
- 11: Introduction to Liouville's Theorem - *Undeclared*
 - 11.1: Paths in Simple Phase Spaces - the SHO and Falling Bodies - *Undeclared*
 - 11.2: Following Many Systems- a "Gas" in Phase Space - *Undeclared*
 - 11.3: Liouville's Theorem- Local Gas Density is Constant along a Phase Space Path - *Undeclared*
 - 11.4: Landau's Proof Using the Jacobian - *Undeclared*
 - 11.5: Jacobian for Time Evolution - *Undeclared*
 - 11.6: Jacobians 101 - *Undeclared*
 - 11.7: Jacobian proof of Liouville's Theorem - *Undeclared*
 - 11.8: Simpler Proof of Liouville's Theorem - *Undeclared*
 - 11.9: Energy Gradient and Phase Space Velocity - *Undeclared*
- 12: The Hamilton-Jacobi Equation - *Undeclared*
 - 12.1: Back to Configuration Space... - *Undeclared*
 - 12.2: The Central Role of These Constants of Integration - *Undeclared*
 - 12.3: Separation of Variables for a Central Potential; Cyclic Variables - *Undeclared*
- 13: Adiabatic Invariants and Action-Angle Variables - *Undeclared*
 - 13.1: Adiabatic Invariants - *Undeclared*
 - 13.2: Adiabatic Invariance and Quantum Mechanics - *Undeclared*
 - 13.3: Action-Angle Variables - *Undeclared*
 - 13.4: *Kepler Orbit Action-Angle Variables - *Undeclared*
- 14: Mathematics for Orbits - *Undeclared*
 - 14.1: Preliminaries- Conic Sections - *Undeclared*
 - 14.2: The Ellipse - *Undeclared*
 - 14.3: The Parabola - *Undeclared*
 - 14.4: The Hyperbola - *Undeclared*
- 15: Keplerian Orbits - *Undeclared*
 - 15.1: Preliminary- Polar Equations for Conic Section Curves - *Undeclared*
 - 15.2: Summary - *Undeclared*
 - 15.3: Kepler's Statement of his Three Laws - *Undeclared*
 - 15.4: Dynamics of Motion in a Central Potential- Deriving Kepler's Laws - *Undeclared*
 - 15.5: A Vectorial Approach- Hamilton's Equation and the Runge Lenz Vector - *Undeclared*
- 16: Elastic Scattering - *Undeclared*
 - 16.1: Billiard Balls - *Undeclared*
 - 16.2: Discovery of the Nucleus - *Undeclared*
 - 16.3: The Differential Cross Section - *Undeclared*
 - 16.4: Analyzing Inverse-Square Repulsive Scattering- Kepler Again - *Undeclared*
 - 16.5: Vectorial Derivation of the Scattering Angle - *Undeclared*
- 17: Small Oscillations - *Undeclared*

- 17.1: Particle in a Well - *Undeclared*
- 17.2: Two Coupled Pendulums - *Undeclared*
- 17.3: Normal Modes - *Undeclared*
- 17.4: Principle of Superposition - *Undeclared*
- 17.5: Three Coupled Pendulums - *Undeclared*
- 17.6: Normal Coordinates - *Undeclared*
- 17.7: Three Equal Pendulums Equally Coupled - *Undeclared*
- 18: Driven Oscillator - *Undeclared*
 - 18.1: More General Energy Exchange - *Undeclared*
 - 18.2: Damped Driven Oscillator - *Undeclared*
- 19: One-Dimensional Crystal Dynamics - *Undeclared*
 - 19.1: The Model - *Undeclared*
 - 19.2: The Circulant Matrix- Nature of its Eigenstates - *Undeclared*
 - 19.3: Comparison with Raising Operators - *Undeclared*
 - 19.4: Finding the Eigenvectors - *Undeclared*
 - 19.5: Eigenvectors of the Linear Chain - *Undeclared*
 - 19.6: Allowed Wavenumbers from Boundary Conditions - *Undeclared*
 - 19.7: Finding the Eigenvalues - *Undeclared*
 - 19.8: The Discrete Fourier Transform - *Undeclared*
 - 19.9: A Note on the Physics of These Waves - *Undeclared*
- 20: Parametric Resonance - *Undeclared*
 - 20.1: Introduction to Parametric Resonance - *Undeclared*
 - 20.2: Resonance near Double the Natural Frequency - *Undeclared*
 - 20.3: Example- Pendulum Driven at near Double the Natural Frequency - *Undeclared*
- 21: The Ponderomotive Force - *Undeclared*
 - 21.1: Introduction to the Ponderomotive Force - *Undeclared*
 - 21.2: Finding the Effective Potential Generated by the Oscillating Force - *Undeclared*
 - 21.3: Stability of a Pendulum with a Rapidly Oscillating Vertical Driving Force - *Undeclared*
 - 21.4: Hand-Waving Explanation of the Ponderomotive Force - *Undeclared*
 - 21.5: Pendulum with Top Point Oscillating Rapidly in a Horizontal Direction - *Undeclared*
- 22: Resonant Nonlinear Oscillations - *Undeclared*
 - 22.1: Introduction to Resonant Nonlinear Oscillations - *Undeclared*
 - 22.2: Frequency of Oscillation of a Particle is a Slightly Anharmonic Potential - *Undeclared*
 - 22.3: Resonance in a Damped Driven Linear Oscillator- A Brief Review - *Undeclared*
 - 22.4: Damped Driven Nonlinear Oscillator- Qualitative Discussion - *Undeclared*
 - 22.5: Nonlinear Case - Landau's Analysis - *Undeclared*
 - 22.6: Frequency Multiples - *Undeclared*
- 23: Damped Driven Pendulum- Period Doubling and Chaos - *Undeclared*
 - 23.1: Introduction - *Undeclared*
 - 23.2: The Road to Chaos - *Undeclared*
 - 23.3: Lyapunov Exponents and Dimensions of Strange Attractors - *Undeclared*
- 24: Motion of a Rigid Body - the Inertia Tensor - *Undeclared*
 - 24.1: Definition of Rigid - *Undeclared*
 - 24.2: Rotation of a Body about a Fixed Axis - *Undeclared*
 - 24.3: General Motion of a Rotating Rigid Body - *Undeclared*
 - 24.4: The Inertia Tensor - *Undeclared*
 - 24.5: Tensors 101 - *Undeclared*
 - 24.6: Definition of a Tensor - *Undeclared*
 - 24.7: Diagonalizing the Inertia Tensor - *Undeclared*
 - 24.8: Principal Axes Form of Moment of Inertia Tensor - *Undeclared*
 - 24.9: Relating Angular Momentum to Angular Velocity - *Undeclared*
 - 24.10: Symmetries, Other Axes, the Parallel Axis Theorem - *Undeclared*
- 25: Moments of Inertia and Rolling Motion - *Undeclared*
 - 25.1: Examples of Moments of Inertia - *Undeclared*
 - 25.2: Analyzing Rolling Motion - *Undeclared*
 - 25.3: Rolling Without Slipping - Two Views - *Undeclared*
 - 25.4: Cylinder Rolling Inside another Cylinder - *Undeclared*
- 26: Rigid Body Moving Freely - *Undeclared*
 - 26.1: Angular Momentum and Angular Velocity - *Undeclared*
 - 26.2: Precession of a Symmetrical Top - *Undeclared*
 - 26.3: Throwing a Football... - *Undeclared*
 - 26.4: Equations of Motion for Rigid Body with External Forces - *Undeclared*
- 27: Euler Angles - *Undeclared*
 - 27.1: Definition of Euler Angles - *Undeclared*
 - 27.2: Angular Velocity and Energy in Terms of Euler's Angles - *Undeclared*
 - 27.3: Free Motion of a Symmetrical Top - *Undeclared*
 - 27.4: Motion of Symmetrical Top around a Fixed Base with Gravity - Nutation - *Undeclared*

- 27.5: Steady Precession - *Undeclared*
- 27.6: Stability of Top Spinning about Vertical Axis - *Undeclared*
- 28: Euler's Equations - *Undeclared*
 - 28.1: Introduction to Euler's Equations - *Undeclared*
 - 28.2: Free Rotation of a Symmetric Top Using Euler's Equations - *Undeclared*
 - 28.3: Using Energy and Angular Momentum Conservation - *Undeclared*
 - 28.4: The Asymmetrical Top - *Undeclared*
- 29: Non-Inertial Frame and Coriolis Effect - *Undeclared*
 - 29.1: The Lagrangian in Accelerating and Rotating Frames - *Undeclared*
 - 29.2: Uniformly Rotating Frame - *Undeclared*
 - 29.3: Coriolis Effect - Particle Moving near Earth's Surface - *Undeclared*
 - 29.4: Gyroscopes and Gyrocompasses in Navigation - *Undeclared*
- 30: A Rolling Sphere on a Rotating Plane - *Undeclared*
 - 30.1: Introduction - *Undeclared*
 - 30.2: Holonomic Constraints and non-Holonomic Constraints - *Undeclared*
 - 30.3: D'Alembert's Principle - *Undeclared*
 - 30.4: Ball with External Forces Rolling on Horizontal Plane - *Undeclared*
 - 30.5: Ball Rolling on Rotating Plane - *Undeclared*
 - 30.6: Ball Rolling on Inclined Rotating Plane - *Undeclared*
- Back Matter - *Undeclared*
 - Index - *Undeclared*
 - Glossary - *Undeclared*
 - Glossary - *Undeclared*
 - Detailed Licensing - *Undeclared*
