

TABLE OF CONTENTS

Licensing

1: Waves in One Dimension

- 1.1: Transverse and Longitudinal Waves
- 1.2: Sine Waves
- 1.3: Types of Waves
- 1.4: Superposition Principle
- 1.5: Beats
- 1.6: Interferometers
- 1.7: Thin Films
- 1.8: Math Review — Derivatives
- 1.9: Group Velocity
- 1.10: Problems

2: Waves in Two and Three Dimensions

- 2.1: Math Tutorial — Vectors
- 2.2: Plane Waves
- 2.3: Superposition of Plane Waves
- 2.4: Diffraction Through a Single Slit
- 2.5: Two Slits
- 2.6: Diffraction Gratings
- 2.7: Problems

3: Geometrical Optics

- 3.1: Reflection and Refraction
- 3.2: Total Internal Reflection
- 3.3: Anisotropic Media
- 3.4: Thin Lens Equation and Optical Instruments
- 3.5: Fermat's Principle
- 3.6: Problems

4: Special Relativity

- 4.1: Galilean Spacetime Thinking
- 4.2: Spacetime Thinking in Special Relativity
- 4.3: Postulates of Special Relativity
- 4.4: Time Dilation
- 4.5: Lorentz Contraction
- 4.6: Twin Paradox
- 4.7: Problems

5: Applications of Special Relativity

- 5.1: Waves in Spacetime
- 5.2: Math Tutorial – Four-Vectors
- 5.3: Principle of Relativity Applied
- 5.4: Characteristics of Relativistic Waves
- 5.5: The Doppler Shift

- 5.6: Addition of Velocities
- 5.7: Problems

6: Acceleration and General Relativity

- 6.1: Acceleration
- 6.2: Circular Motion
- 6.3: Acceleration, Force, and Mass
- 6.4: Acceleration in Special Relativity
- 6.5: Accelerated Reference Frames
- 6.6: Gravitational Red Shift
- 6.7: Event Horizons
- 6.8: Problems

7: Matter Waves

- 7.1: Bragg's Law
- 7.2: X-Ray Diffraction Techniques
- 7.3: Meaning of Quantum Wave Function
- 7.4: Sense and Nonsense in Quantum Mechanics
- 7.5: Mass, Momentum, and Energy
- 7.6: Heisenberg Uncertainty Principle
- 7.7: Problems

8: Geometrical Optics and Newton's Laws

- 8.1: Fundamental Principles of Dynamics
- 8.2: Potential Energy
- 8.3: Work and Power
- 8.4: Mechanics and Geometrical Optics
- 8.5: Math Tutorial – Partial Derivatives
- 8.6: Motion in Two and Three Dimensions
- 8.7: Kinetic and Total Momentum
- 8.8: Problems

9: Symmetry and Bound States

- 9.1: Math Tutorial — Complex Waves
- 9.2: Symmetry and Quantum Mechanics
- 9.3: Confined Matter Waves
- 9.4: Problems

10: Dynamics of Multiple Particles

- 10.1: Momentum and Newton's Second Law
- 10.2: Newton's Third Law
- 10.3: Conservation of Momentum
- 10.4: Collisions
- 10.5: Rockets and Conveyor Belts
- 10.6: Problems

11: Rotational Dynamics

- 11.1: Math Tutorial — Cross Product
- 11.2: Torque and Angular Momentum

- [11.3: Two Particles](#)
- [11.4: The Uneven Dumbbell](#)
- [11.5: Many Particles](#)
- [11.6: New Page](#)
- [11.7: Statics](#)
- [11.8: Problem](#)

12: Harmonic Oscillator

- [12.1: Energy Analysis](#)
- [12.2: Analysis Using Newton's Laws](#)
- [12.3: Forced Oscillator](#)
- [12.4: Complex Exponential Solutions](#)
- [12.5: Quantum Mechanical Harmonic Oscillator](#)
- [12.6: Problems](#)

13: Appendix A, Constants, Units, and Conversions

- [13.1: Appendix A Constants, Units, and Conversions](#)
