

Index

A

acceleration

- 5.1.2: Units
- 5.2.3: Acceleration
- 5.2.5: Free-Falling Objects
- 5.3.3: Newton's Laws

adhesion

- 5.7.3: Bernoulli's Equation

Alveoli

- 5.6.2: Density and Pressure

Amplitude

- 5.8.3: Periodic Motion
- 5.8.7: Waves on Strings
- 5.9.2: Sound Intensity and Level
- 5.9.4: Interactions with Sound Waves

Aneroid Barometer

- 5.6.2: Density and Pressure

Angular acceleration

- 5.5.8: Torque and Angular Acceleration

Angular frequency

- 5.8.3: Periodic Motion

angular motion

- 5.5.1: Introduction

angular velocity

- 5.5.1: Introduction

antinode

- 5.9.1: Introduction
- 5.9.5: Further Topics

application

- 5.1.1: The Basics of Physics

approximation

- 5.1.3: Significant Figures and Order of Magnitude

Archimedes' Principle

- 5.6.3: Archimedes' Principle

atrium

- 5.7.4: Other Applications

B

basal metabolic rate

- 5.4.6: Power

Bernoulli's equation

- 5.7.3: Bernoulli's Equation

boundary condition

- 5.8.6: Wave Behavior and Interaction

buoyancy

- 5.6.2: Density and Pressure

buoyant force

- 5.6.3: Archimedes' Principle

C

Center of mass

- 5.5.3: Stability
- 5.5.7: The Center of Gravity

centripetal acceleration

- 5.8.3: Periodic Motion

classical physics

- 5.9.3: Doppler Effect and Sonic Booms

cochlea

- 5.9.2: Sound Intensity and Level

coherent

- 5.9.4: Interactions with Sound Waves

cohesion

- 5.7.3: Bernoulli's Equation

compression

- 5.8.5: Waves

compressive stress

- 5.5.5: Applications of Statics

conservation

- 5.4.5: Potential Energy and Conservation of Energy

conservative force

- 5.4.5: Potential Energy and Conservation of Energy

constructive interference

- 5.8.6: Wave Behavior and Interaction
- 5.9.5: Further Topics

continuity

- 5.6.5: Fluids in Motion

contraction

- 5.7.4: Other Applications

conversion

- 5.1.2: Units

Coulomb force

- 5.4.5: Potential Energy and Conservation of Energy

Coulomb's Law

- 5.6.6: Deformation of Solids

crest

- 5.8.5: Waves

critically damped

- 5.8.4: Damped and Driven Oscillations

D

damping

- 5.9.5: Further Topics

decibels (units)

- 5.9.2: Sound Intensity and Level

deformation

- 5.5.6: Elasticity, Stress, Strain, and Fracture
- 5.8.2: Hooke's Law

destructive interference

- 5.8.6: Wave Behavior and Interaction
- 5.9.5: Further Topics

diagram

- 5.2.4: Problem-Solving for Basic Kinematics

dialysis

- 5.7.1: Overview

diastole

- 5.7.2: Flow in Tubes

diffusion

- 5.7.4: Other Applications

dimension

- 5.1.4: Solving Physics Problems
- 5.6.6: Deformation of Solids

direction of propagation

- 5.8.5: Waves

displacement

- 5.2.1: Basics of Kinematics
- 5.9.4: Interactions with Sound Waves

dissipative force

- 5.4.5: Potential Energy and Conservation of Energy
- 5.8.3: Periodic Motion

doppler effect

- 5.9.3: Doppler Effect and Sonic Booms

Dot product

- 5.4.2: Work Done by a Constant Force

Dynamics

- 5.1.4: Solving Physics Problems
- 5.3.7: Further Applications of Newton's Laws

E

eardrum

- 5.9.2: Sound Intensity and Level

elastic

- 5.5.6: Elasticity, Stress, Strain, and Fracture

Elastic potential energy

- 5.8.3: Periodic Motion

Elasticity

- 5.8.2: Hooke's Law
- 5.9.1: Introduction

Electromagnetic Radiation

- 5.4.8: Further Topics

energy

- 5.4.1: Introduction
- 5.8.5: Waves

enthalpy

- 5.6.1: Introduction

epithelium

- 5.9.4: Interactions with Sound Waves

equation

- 5.3.5: Problem-Solving

equilibrium

- 5.3.7: Further Applications of Newton's Laws
- 5.5.2: Conditions for Equilibrium
- 5.6.2: Density and Pressure
- 5.8.4: Damped and Driven Oscillations

Euclidean

- 5.6.6: Deformation of Solids

exponent

- 5.1.3: Significant Figures and Order of Magnitude

F

first law of thermodynamics

- 5.4.8: Further Topics

fission

- 5.4.8: Further Topics

fluid

- 5.3.7: Further Applications of Newton's Laws

fluidity

- 5.6.1: Introduction

force

- 5.3.1: Introduction
- 5.3.2: Force and Mass
- 5.4.3: Work Done by a Variable Force
- 5.5.2: Conditions for Equilibrium
- 5.8.4: Damped and Driven Oscillations

fossil fuels

- 5.4.7: CASE STUDY- World Energy Use

Fourier analysis

- 5.8.1: Introduction

frame of reference

- 5.2.1: Basics of Kinematics

free fall

- 5.2.5: Free-Falling Objects

frequency

- 5.8.3: Periodic Motion
- 5.8.5: Waves
- 5.9.1: Introduction
- 5.9.3: Doppler Effect and Sonic Booms
- 5.9.4: Interactions with Sound Waves

Friction

- 5.3.3: Newton's Laws
- 5.3.7: Further Applications of Newton's Laws
- 5.4.5: Potential Energy and Conservation of Energy
