

CHAPTER OVERVIEW

3: Schwarzschild Orbits

[3.1: The Geodesic Equation](#)

[3.2: Constants of Motion](#)

[3.3: Effective Potential](#)

[3.4: Local Inertial Reference Frames](#)

[3.5: Inside the Black Hole](#)

Thumbnail: The overall geometry of the universe is determined by whether the Omega cosmological parameter is less than, equal to or greater than 1. Shown from top to bottom are a closed universe with positive curvature, a hyperbolic universe with negative curvature and a flat universe with zero curvature. (Public Domain; NASA).
