

Index

A

amplitude spectral density
6.3: LIGO
angular momentum per unit mass
3.2: Constants of Motion

C

constants of motion
1.5: Four-Momentum
5.2: Constants of Motion
cosmological constant
2.1: Non-Euclidean Geometry
cosmological principle
7.1: Modeling the Universe
cosmological redshift
7.3: Redshift
critical impact parameter
4.2: Effective Potential

D

Dot product
1.6: Index Notation

E

effective potential energy
3.3: Effective Potential
4.2: Effective Potential
Einstein field equations
2.1: Non-Euclidean Geometry
Einstein ring
4.3: Lensing
electron degeneracy pressure
2.7: Black Hole Formation
energy per unit mass
3.2: Constants of Motion
ergoregion
5.3: The Ergoregion
event horizon
2.5: Spacetime Diagrams
5.3: The Ergoregion

F

faraway time
2.3: The Schwarzschild t-coordinate
frame dragging
5.2: Constants of Motion
Friedmann equation
7.5: The Friedmann Equation

G

geodesic equation
3.1: The Geodesic Equation
global coordinates
2.6: Global vs. Local Coordinates

Global Positioning System (GPS)

2.8: The Global Positioning System

Global Rain metric

3.5: Inside the Black Hole

gravitational lensing

4.3: Lensing

gravitational wave strain

6.2: Gravitational Wave Metric

Gravitational waves

6.1: What are Gravitational Waves?

H

homogeneous
7.1: Modeling the Universe
Hubble constant
7.4: Evidence of Expansion
Hubble parameter
7.5: The Friedmann Equation

I

impact parameter
4.1: Impact Parameter
inertial reference frame
1.2: The Spacetime Interval
infinite redshift surface
5.3: The Ergoregion
Innermost Stable Circular Orbit
3.3: Effective Potential
isotropic
7.1: Modeling the Universe

K

Kerr metric
5.1: The Kerr Metric

L

Laser Interferometer Gravitational Wave
Observatory
6.3: LIGO
light cone
1.4: Spacetime Diagrams
LIGO
6.3: LIGO
local inertial reference frame
2.6: Global vs. Local Coordinates
Local Inertial Reference Frames
3.4: Local Inertial Reference Frames

M

metric
1.6: Index Notation

N

Natural units
1.3: Natural Units
neutron degeneracy pressure
2.7: Black Hole Formation

P

power spectral density
6.3: LIGO
principle of maximal aging
1.4: Spacetime Diagrams
proper length
1.2: The Spacetime Interval
proper time
1.2: The Spacetime Interval

R

radius of curvature
7.2: The Friedmann-Lemaitre-Robertson-Walker
Metric
reference frame
1.2: The Spacetime Interval

S

scale factor
7.2: The Friedmann-Lemaitre-Robertson-Walker
Metric
Schwarzschild metric
2.2: The Schwarzschild Metric
Singularity
2.5: Spacetime Diagrams
Spacetime
1.2: The Spacetime Interval
spacetime diagram
1.4: Spacetime Diagrams
2.5: Spacetime Diagrams
special theory of relativity
1.1: A Need for a New Model
static limit surface
5.3: The Ergoregion
stellar remnant
2.7: Black Hole Formation
strain noise
6.3: LIGO
stretch factor
7.3: Redshift

W

worldlines
1.4: Spacetime Diagrams
