

Index

A

absolute temperature scale
1.3: Thermometers and Temperature Scales

absolute zero
1.3: Thermometers and Temperature Scales

AC circuits
15.6: Resonance in an AC Circuit

AC current
15.2: AC Sources

AC voltage
15.2: AC Sources

Adiabatic compression
3.7: Adiabatic Processes for an Ideal Gas

adiabatic expansion
3.7: Adiabatic Processes for an Ideal Gas

adiabatic process
3.5: Thermodynamic Processes
3.7: Adiabatic Processes for an Ideal Gas

alternating current
15.2: AC Sources

ammeter
10.5: Electrical Measuring Instruments

ampere (unit)
9.2: Electrical Current

Ampere's Law
12.6: Ampère's Law
12.7: Solenoids and Toroids

Ampere' law
12.7: Solenoids and Toroids

Ampere's law
12.6: Ampère's Law

area vector
6.2: Electric Flux

average power (AC circuit)
15.5: Power in an AC Circuit

Avogadro's number
2.2: Molecular Model of an Ideal Gas

B

back emf
13.7: Electric Generators and Back Emf

bandwidth
15.6: Resonance in an AC Circuit

BCS theory
9.7: Superconductors

Boltzmann constant
2.2: Molecular Model of an Ideal Gas

boundary
3.2: Thermodynamic Systems

C

calorie (unit)
1.5: Heat Transfer, Specific Heat, and Calorimetry

calorimeter
1.5: Heat Transfer, Specific Heat, and Calorimetry

calorimetry
1.5: Heat Transfer, Specific Heat, and Calorimetry

Capacitance
8.2: Capacitors and Capacitance
8.5: Capacitor with a Dielectric

capacitive reactance
15.3: Simple AC Circuits

capacitor
8.2: Capacitors and Capacitance
8.4: Energy Stored in a Capacitor

capacitors in parallel
8.3: Capacitors in Series and in Parallel

capacitors in series
8.3: Capacitors in Series and in Parallel

Carnot cycle
4.6: The Carnot Cycle

Carnot engine
4.6: The Carnot Cycle

Carnot's Principle
4.6: The Carnot Cycle

Celsius scale
1.3: Thermometers and Temperature Scales

charging by induction
5.3: Conductors, Insulators, and Charging by Induction

circuit
9.2: Electrical Current

Clausius statement of the second law of thermodynamics
4.2: Reversible and Irreversible Processes

closed system
3.2: Thermodynamic Systems

coaxial cable
8.2: Capacitors and Capacitance

coefficient of linear expansion
1.4: Thermal Expansion

coefficient of performance
4.4: Refrigerators and Heat Pumps

coefficient of volume expansion
1.4: Thermal Expansion

cold reservoir
4.3: Heat Engines

comets
16.5: Momentum and Radiation Pressure

condensation
1.6: Phase Changes

conduction
1.7: Mechanisms of Heat Transfer

conduction electron
5.3: Conductors, Insulators, and Charging by Induction

conductor
5.3: Conductors, Insulators, and Charging by Induction

conservation of energy
3.4: First Law of Thermodynamics

Continuous Charge Distribution
5.6: Calculating Electric Fields of Charge Distributions

convection
1.7: Mechanisms of Heat Transfer

conventional current
9.2: Electrical Current

Cooper pairs
9.7: Superconductors

cosmic rays
11.4: Motion of a Charged Particle in a Magnetic Field

coulomb
5.2: Electric Charge

Coulomb force
5.4: Coulomb's Law

Coulomb's constant
5.4: Coulomb's Law

Coulomb's Law
5.4: Coulomb's Law

Critical temperature
2.2: Molecular Model of an Ideal Gas
9.7: Superconductors

current density
9.3: Model of Conduction in Metals

cyclic process
3.5: Thermodynamic Processes

Cyclotron
11.8: Applications of Magnetic Forces and Fields

cylindrical symmetry
6.4: Applying Gauss's Law

D

Dalton's law of partial pressures
2.3: Pressure, Temperature, and RMS Speed

dees
11.8: Applications of Magnetic Forces and Fields

degree Celsius
1.3: Thermometers and Temperature Scales

degree Fahrenheit
1.3: Thermometers and Temperature Scales

degree of freedom
2.4: Heat Capacity and Equipartition of Energy

diamagnetic materials
12.8: Magnetism in Matter

dielectric
8.2: Capacitors and Capacitance
8.5: Capacitor with a Dielectric
8.6: Molecular Model of a Dielectric

dielectric constant
8.5: Capacitor with a Dielectric

dielectric strength
8.6: Molecular Model of a Dielectric

Dielectric breakdown
8.6: Molecular Model of a Dielectric

digital signal processing
14.2: Mutual Inductance

diode
9.5: Ohm's Law

dipole
5.3: Conductors, Insulators, and Charging by Induction

dipole moment
5.8: Electric Dipoles

direct current
15.2: AC Sources

disorder
4.8: Entropy on a Microscopic Scale

Displacement current
16.2: Maxwell's Equations and Electromagnetic Waves

drift velocity

9.3: Model of Conduction in Metals

E

Eddy Currents

13.6: Eddy Currents

effectiveness

4.4: Refrigerators and Heat Pumps

efficiency

4.3: Heat Engines

electric charge

5.2: Electric Charge

Electric dipole

7.4: Calculations of Electric Potential

electric dipole moment

7.4: Calculations of Electric Potential

Electric Dipoles

5.8: Electric Dipoles

electric field

5.5: Electric Field

5.7: Electric Field Lines

7.5: Determining Field from Potential

Electric Field inside a Conductors

6.5: Conductors in Electrostatic Equilibrium

electric flux

6.2: Electric Flux

electric force

5.2: Electric Charge

Electric Generator

13.7: Electric Generators and Back Emf

electric potential

7: Electric Potential

7.3: Electric Potential and Potential Difference

7.4: Calculations of Electric Potential

7.5: Determining Field from Potential

electric potential difference

7.3: Electric Potential and Potential Difference

Electric potential energy

7.2: Electric Potential Energy

electrical conductivity

9.4: Resistivity and Resistance

electrical current

9.2: Electrical Current

electrical energy

9.6: Electrical Energy and Power

electrical power

9.6: Electrical Energy and Power

Electromagnetic energy

16.4: Energy Carried by Electromagnetic Waves

Electromagnetic induction

13: Electromagnetic Induction

13.8: Applications of Electromagnetic Induction

Electromagnetic Momentum

16.5: Momentum and Radiation Pressure

Electromagnetic Spectrum

16.6: The Electromagnetic Spectrum

electromagnetic waves

16.3: Plane Electromagnetic Waves

16.4: Energy Carried by Electromagnetic Waves

electromotive force (emf)

10.2: Electromotive Force

Electron

5.2: Electric Charge

electrostatic attraction

5.2: Electric Charge

electrostatic precipitators

7.7: Applications of Electrostatics

electrostatic repulsion

5.2: Electric Charge

electrostatics

5.4: Coulomb's Law

7.7: Applications of Electrostatics

Electrical power

9.6: Electrical Energy and Power

emissivity

1.7: Mechanisms of Heat Transfer

Energy Density

8.4: Energy Stored in a Capacitor

entropy

4.7: Entropy

environment

3.2: Thermodynamic Systems

Equation of state

3.2: Thermodynamic Systems

equilibrium

3.2: Thermodynamic Systems

equipartition theorem

2.4: Heat Capacity and Equipartition of Energy

equipotential line

7.6: Equipotential Surfaces and Conductors

Equipotential Surfaces

7.6: Equipotential Surfaces and Conductors

equivalent resistance

10.3: Resistors in Series and Parallel

evaporation

1.6: Phase Changes

extensive variable

3.2: Thermodynamic Systems

F

Fahrenheit scale

1.3: Thermometers and Temperature Scales

Faraday's Law

13.2: Faraday's Law

ferromagnetic materials

12.8: Magnetism in Matter

field line

5.7: Electric Field Lines

field lines

5.7: Electric Field Lines

first law of thermodynamics

3: The First Law of Thermodynamics

3.4: First Law of Thermodynamics

flux

6: Gauss's Law

6.2: Electric Flux

free electrons

6.5: Conductors in Electrostatic Equilibrium

freezing

1.6: Phase Changes

G

gamma ray

16.6: The Electromagnetic Spectrum

gauss (unit)

11.3: Magnetic Fields and Lines

Gauss's law

6: Gauss's Law

6.3: Explaining Gauss's Law

6.4: Applying Gauss's Law

Gaussian surface

6.3: Explaining Gauss's Law

6.4: Applying Gauss's Law

greenhouse effect

1.7: Mechanisms of Heat Transfer

grounding

7.6: Equipotential Surfaces and Conductors

H

Hall effect

11.7: The Hall Effect

hard drives

13.8: Applications of Electromagnetic Induction

heat

1.5: Heat Transfer, Specific Heat, and Calorimetry

heat engine

4.3: Heat Engines

heat pump

4.4: Refrigerators and Heat Pumps

4.5: Statements of the Second Law of Thermodynamics

heat transfer

1.2: Temperature and Thermal Equilibrium

helical motion

11.4: Motion of a Charged Particle in a Magnetic Field

henry (unit)

14.2: Mutual Inductance

hot reservoir

4.3: Heat Engines

hysteresis

12.8: Magnetism in Matter

I

Ideal gas

2.2: Molecular Model of an Ideal Gas

3.7: Adiabatic Processes for an Ideal Gas

Ideal gas law

2.2: Molecular Model of an Ideal Gas

impedance

15.4: RLC Series Circuits with AC

induced charged surfaces

8.6: Molecular Model of a Dielectric

induced dipole

5.8: Electric Dipoles

Induced Electric Fields

8.6: Molecular Model of a Dielectric

13.5: Induced Electric Fields

induced emf

13.2: Faraday's Law

13.5: Induced Electric Fields

induced polarization

8.6: Molecular Model of a Dielectric

inductance

14.2: Mutual Inductance

inductive reactance

15.3: Simple AC Circuits

inductive time constant

14.5: RL Circuits

inductors

14.3: Self-Inductance and Inductors

infinite plane

5.6: Calculating Electric Fields of Charge Distributions

infinite straight wire

5.6: Calculating Electric Fields of Charge Distributions

infrared radiation

16.6: The Electromagnetic Spectrum

Ink Jet Printers

7.7: Applications of Electrostatics

insulator

5.3: Conductors, Insulators, and Charging by Induction

intensive variable

3.2: Thermodynamic Systems

internal energy

2.3: Pressure, Temperature, and RMS Speed
3.3: Work, Heat, and Internal Energy
3.4: First Law of Thermodynamics

internal resistance

10.2: Electromotive Force

ion

5.2: Electric Charge

ion tail

16.5: Momentum and Radiation Pressure

irreversibility

4.2: Reversible and Irreversible Processes

irreversible process

4.2: Reversible and Irreversible Processes

isentropic

4.8: Entropy on a Microscopic Scale

isobaric process

3.5: Thermodynamic Processes

isochoric process

3.5: Thermodynamic Processes

isothermal process

3.5: Thermodynamic Processes

J

Josephson effect

9.7: Superconductors

Josephson junction

9.7: Superconductors

Joule expansion

3.7: Adiabatic Processes for an Ideal Gas

K

Kelvin scale

1.3: Thermometers and Temperature Scales

kilocalorie

1.5: Heat Transfer, Specific Heat, and Calorimetry

kilocalorie (kcal)

1.5: Heat Transfer, Specific Heat, and Calorimetry

kinetic theory of gases

2: The Kinetic Theory of Gases
2.3: Pressure, Temperature, and RMS Speed

Kirchhoff's First Rule

10.4: Kirchhoff's Rules

Kirchhoff's Second Rule

10.4: Kirchhoff's Rules

Kirchhoff's junction rule

10.3: Resistors in Series and Parallel
10.4: Kirchhoff's Rules

Kirchhoff's loop rule

10.3: Resistors in Series and Parallel
10.4: Kirchhoff's Rules

Klein bottle

6.3: Explaining Gauss's Law

L

Laser Printers

7.7: Applications of Electrostatics

law of conservation of charge

5.2: Electric Charge

Law of Dulong and Petit

2.4: Heat Capacity and Equipartition of Energy

LC circuit

14.6: Oscillations in an LC Circuit

Lenz's Law

13.3: Lenz's Law

linear charge density

5.6: Calculating Electric Fields of Charge Distributions

Lorentz force

16.2: Maxwell's Equations and Electromagnetic Waves

M

magnetic damping

13.6: Eddy Currents

Magnetic dipole

11.6: Force and Torque on a Current Loop

magnetic dipole moment

11.6: Force and Torque on a Current Loop

magnetic domains

12.8: Magnetism in Matter

magnetic energy density

14.4: Energy in a Magnetic Field

magnetic field

11: Magnetic Forces and Fields
12.3: Magnetic Field due to a Thin Straight Wire
12.5: Magnetic Field of a Current Loop

magnetic field lines

11.3: Magnetic Fields and Lines

magnetic flux

13.2: Faraday's Law

magnetic force

11.6: Force and Torque on a Current Loop
12.5: Magnetic Field of a Current Loop

Magnetic force

11.3: Magnetic Fields and Lines
11.5: Magnetic Force on a Current-Carrying Conductor

12.4: Magnetic Force between Two Parallel Currents

Magnetic Forces

11: Magnetic Forces and Fields

magnetic monopole

11.3: Magnetic Fields and Lines

magnetic susceptibility

12.8: Magnetism in Matter

Magnetic torque

11.6: Force and Torque on a Current Loop

magnetism

11.2: Magnetism and Its Historical Discoveries

Mass Spectrometer

11.8: Applications of Magnetic Forces and Fields

Maxwell's equations

16.2: Maxwell's Equations and Electromagnetic Waves

mean free path

2.3: Pressure, Temperature, and RMS Speed

mean free time

2.3: Pressure, Temperature, and RMS Speed

mechanical equivalent of heat

1.5: Heat Transfer, Specific Heat, and Calorimetry

Meissner effect

9.7: Superconductors

melting

1.6: Phase Changes

metals

9.3: Model of Conduction in Metals

microwaves

16.6: The Electromagnetic Spectrum

molar heat capacity at constant pressure

3.6: Heat Capacities of an Ideal Gas

molar heat capacity at constant volume

2.4: Heat Capacity and Equipartition of Energy
3.6: Heat Capacities of an Ideal Gas

mole

2.2: Molecular Model of an Ideal Gas

most probable speed

2.5: Distribution of Molecular Speeds

Motion of charged particle

11.4: Motion of a Charged Particle in a Magnetic Field

Motional Emf

13.4: Motional Emf

mutual inductance

14.2: Mutual Inductance

N

neutron

5.2: Electric Charge

nonohmic

9.5: Ohm's Law

north magnetic pole

11.2: Magnetism and Its Historical Discoveries

O

ohm

9.4: Resistivity and Resistance

Ohm's law

9.5: Ohm's Law

ohmic

9.5: Ohm's Law

open system

3.2: Thermodynamic Systems

P

parallel circuit

10.3: Resistors in Series and Parallel

parallel combination

8.3: Capacitors in Series and in Parallel

paramagnetic materials

12.8: Magnetism in Matter

partial pressure

2.3: Pressure, Temperature, and RMS Speed

peak emf

13.7: Electric Generators and Back Emf

peak speed

2.5: Distribution of Molecular Speeds

perfect engine

4.5: Statements of the Second Law of Thermodynamics

perfect refrigerator (heat pump)

4.5: Statements of the Second Law of Thermodynamics

permanent dipole

5.8: Electric Dipoles

permeability of free space

12.2: The Biot-Savart Law

permittivity of free space

5.4: Coulomb's Law

permittivity of vacuum

5.4: Coulomb's Law

phase angle

15.4: RLC Series Circuits with AC

phase diagram

1.6: Phase Changes

Phase transition

1.6: Phase Changes

planar symmetry

6.4: Applying Gauss's Law

Plane waves

16.3: Plane Electromagnetic Waves

polarization

5.3: Conductors, Insulators, and Charging by Induction

6.5: Conductors in Electrostatic Equilibrium

8.6: Molecular Model of a Dielectric

potential difference

10.2: Electromotive Force

potential drop

10.2: Electromotive Force

power factor

15.5: Power in an AC Circuit

Poynting vector

16.4: Energy Carried by Electromagnetic Waves

principle of superposition

5.4: Coulomb's Law

proton

5.2: Electric Charge

PV diagram

2.2: Molecular Model of an Ideal Gas

Q

quality factor

15.6: Resonance in an AC Circuit

R

radar

16.6: The Electromagnetic Spectrum

radiation

1.7: Mechanisms of Heat Transfer

radiation pressure

16.5: Momentum and Radiation Pressure

radio waves

16.6: The Electromagnetic Spectrum

RC circuit

10.6: RC Circuits

Refrigerator

4.4: Refrigerators and Heat Pumps

resistance

9.4: Resistivity and Resistance

resistivity

9.4: Resistivity and Resistance

Resistors in Parallel

10.3: Resistors in Series and Parallel

resistors in series

10.3: Resistors in Series and Parallel

resonant frequency

15.6: Resonance in an AC Circuit

reversible process

3.5: Thermodynamic Processes

4.2: Reversible and Irreversible Processes

RL circuits

14.5: RL Circuits

RLC circuit

14.7: RLC Series Circuits

RLC Series Circuit

15.4: RLC Series Circuits with AC

rms current

15.3: Simple AC Circuits

rms voltage

15.3: Simple AC Circuits

S

scalar field

5.5: Electric Field

schematic

9.2: Electrical Current

second law of thermodynamics

4.7: Entropy

second law of thermodynamics (Kelvin)

4.5: Statements of the Second Law of Thermodynamics

series circuit

10.3: Resistors in Series and Parallel

series combination

8.3: Capacitors in Series and in Parallel

shock hazard

10.7: Household Wiring and Electrical Safety

Solenoids

12.7: Solenoids and Toroids

south magnetic pole

11.2: Magnetism and Its Historical Discoveries

spherical symmetry

6.4: Applying Gauss's Law

SQUID

9.7: Superconductors

state functions

3.4: First Law of Thermodynamics

static electricity

5.2: Electric Charge

Stirling engine

4.7: Entropy

superconductors

9.7: Superconductors

supercritical

2.2: Molecular Model of an Ideal Gas

superposition

5.5: Electric Field

surface charge density

5.6: Calculating Electric Fields of Charge Distributions

surroundings

3.2: Thermodynamic Systems

T

Temperature

1.2: Temperature and Thermal Equilibrium

terminal voltage

10.2: Electromotive Force

tesla (unit)

11.3: Magnetic Fields and Lines

thermal agitation

16.6: The Electromagnetic Spectrum

thermal equilibrium

1.2: Temperature and Thermal Equilibrium

thermal expansion

1.4: Thermal Expansion

thermal hazard

10.7: Household Wiring and Electrical Safety

thermal stress

1.4: Thermal Expansion

thermodynamic process

3.5: Thermodynamic Processes

thermodynamic system

3.2: Thermodynamic Systems

Thin straight wire

12.3: Magnetic Field due to a Thin Straight Wire

third law of thermodynamics

4.8: Entropy on a Microscopic Scale

Toroids

12.7: Solenoids and Toroids

transformer equation

15.7: Transformers

Transformers

15.7: Transformers

triple point

1.3: Thermometers and Temperature Scales

U

ultraviolet radiation

16.6: The Electromagnetic Spectrum

universal gas constant

2.2: Molecular Model of an Ideal Gas

V

Van de Graaff generator

7.7: Applications of Electrostatics

van der Waals equation of state

2.2: Molecular Model of an Ideal Gas

vapor pressure

2.3: Pressure, Temperature, and RMS Speed

vector field

5.5: Electric Field

visible light

16.6: The Electromagnetic Spectrum

voltage

7.3: Electric Potential and Potential Difference

voltmeter

10.5: Electrical Measuring Instruments

volume charge density

5.6: Calculating Electric Fields of Charge Distributions

X

xerography

7.7: Applications of Electrostatics

Z

zeroth law of thermodynamics

[1.2: Temperature and Thermal Equilibrium](#)
