

TABLE OF CONTENTS

Licensing

1: Earth Cycles, Moon Cycles, and Sky Information

- 1.1: Earth and Sky
- 1.2: The Seasons
- 1.3: Keeping Time
- 1.4: The Calendar
- 1.5: The Sky Above
- 1.6: Phases and Motions of the Moon
- 1.7: Ocean Tides and the Moon
- 1.8: Eclipses of the Sun and Moon
- 1.E: Earth, Moon, and Sky (Exercise)

2: History of Astronomy

- 2.1: Ancient Astronomy
- 2.2: Astrology vs. Astronomy
- 2.3: The Birth of Modern Astronomy
- 2.4: The Laws of Planetary Motion
- 2.5: Newton's Great Synthesis
- 2.6: Newton's Universal Law of Gravitation
- 2.7: Orbits in the Solar System
- 2.8: Motions of Satellites and Spacecraft
- 2.9: Gravity with More Than Two Bodies
- 2.10: Observing the Sky - The Birth of Astronomy (Exercise)

3: Radiation and Spectra

- 3.1: The Behavior of Light
- 3.2: The Electromagnetic Spectrum
- 3.3: Spectroscopy in Astronomy
- 3.4: The Structure of the Atom
- 3.5: Formation of Spectral Lines
- 3.6: The Doppler Effect
- 3.7: Telescopes
- 3.8: Telescopes Today
- 3.9: Visible-Light Detectors and Instruments
- 3.10: Radio Telescopes
- 3.11: Observations outside Earth's Atmosphere
- 3.12: The Future of Large Telescopes
- 3.13: Radiation, Spectra, and Astronomical Instruments (Exercises)

4: Introduction to the Solar System and Its Formation

- 4.1: Overview of Our Planetary System
- 4.2: Composition and Structure of Planets
- 4.3: Dating Planetary Surfaces
- 4.4: Planetary Evolution
- 4.5: Origin of the Solar System

- 4.6: Formation of the Solar System
- 4.7: Other Worlds - An Introduction to the Solar System (Exercises)

5: Exoplanets

- 5.1: Comparison with Other Planetary Systems
- 5.2: Planets beyond the Solar System- Search and Discovery
- 5.3: Exoplanets Everywhere - What we are Learning
- 5.4: New Perspectives on Planet Formation
- 5.5: Exoplanets (Exercises)

6: The Terrestrial Planets and their moons

- 6.1: The Global Perspective
- 6.2: Earth's Crust
- 6.3: Earth's Atmosphere
- 6.4: Life, Chemical Evolution, and Climate Change
- 6.5: Cosmic Influences on the Evolution of Earth
- 6.6: General Properties of the Moon
- 6.7: The Lunar Surface
- 6.8: Impact Craters
- 6.9: The Origin of the Moon
- 6.10: Mercury
- 6.11: The Nearest Planets - An Overview
- 6.12: The Geology of Venus
- 6.13: The Massive Atmosphere of Venus
- 6.14: The Geology of Mars
- 6.15: Water and Life on Mars
- 6.16: Divergent Planetary Evolution
- 6.17: Earth and Impacts (Exercises)
- 6.18: Cratered Worlds (Exercises)
- 6.19: Earthlike Planets - Venus and Mars (Exercises)

7: The JSUN Planets, their moons, rings, and Pluto

- 7.1: Exploring the Outer Planets
- 7.2: The Giant Planets
- 7.3: Atmosphere of the Giant Planets
- 7.4: Ring and Moon Systems Introduced
- 7.5: The Gailean Moons of Jupiter
- 7.6: Titan and Triton
- 7.7: Pluto and Charon
- 7.8: Planetary Rings
- 7.9: The Giant Planets (Exercises)
- 7.10: Rings, Moons, and Pluto (Exercises)

8: Comets, Asteroids, and Meteors - The Leftovers of the Solar System

- 8.1: Asteroids
- 8.2: Asteroids and Planetary Defense
- 8.3: The "Long-Haired" Comets
- 8.4: The Origin and Fate of Comets and Related Objects
- 8.5: Meteors
- 8.6: Meteorites - Stones from Heaven

- 8.E: Comets and Asteroids - Debris of the Solar System (Exercises)

9: The Sun

- 9.1: The Structure and Composition of the Sun
- 9.2: The Solar Cycle
- 9.3: Solar Activity above the Photosphere
- 9.4: Space Weather
- 9.5: Sources of Sunshine- Thermal and Gravitational Energy
- 9.6: Mass, Energy, and the Theory of Relativity
- 9.7: The Solar Interior - Theory
- 9.8: The Solar Interior - Observations
- 9.9: The Sun- A Garden-Variety Star (Exercises)
- 9.10: The Sun- A Nuclear Powerhouse (Exercises)

10: Nature of Stars

- 10.1: The Brightness of Stars
- 10.2: Colors of Stars
- 10.3: The Spectra of Stars (and Brown Dwarfs)
- 10.4: Using Spectra to Measure Stellar Radius, Composition, and Motion
- 10.5: Measuring Stellar Masses Part 1
- 10.6: Measuring Stellar Masses Part 2
- 10.7: Diameters of Stars
- 10.8: The H-R Diagram
- 10.9: Fundamental Units of Distance
- 10.10: Surveying the Stars
- 10.11: Variable Stars- One Key to Cosmic Distances
- 10.12: The H-R and Cosmic Distances
- 10.13: Analyzing Starlight (Exercises)
- 10.14: The Stars - A Celestial Census (Exercises)
- 10.15: Celestial Distances (Exercises)

11: Birth of Stars to Main Sequence Stage

- 11.1: The Interstellar Medium
- 11.2: Interstellar Gas
- 11.3: Cosmic Dust
- 11.4: Cosmic Rays
- 11.5: The Life Cycle of Cosmic Material
- 11.6: Interstellar Matter around the Sun
- 11.7: Star Formation
- 11.8: The H-R and the Study of Stellar Evolution
- 11.9: Evidence That Planets Form around Other Stars
- 11.10: Evolution from the Main Sequence to Red Giants
- 11.11: Star Clusters
- 11.12: Checking Out the Theory
- 11.13: Further Evolution of Stars
- 11.14: The Evolution of More Massive Stars
- 11.15: Between the Stars - Gas and Dust in Space (Exercises)
- 11.16: The Birth of Stars and the Discovery of Planets outside the Solar System (Exercises)
- 11.17: Stars from Adolescence to Old Age (Exercise)

12: The Death of Stars

- 12.1: The Death of Low-Mass Stars
- 12.2: Evolution of Massive Stars- An Explosive Finish
- 12.3: Supernova Observations
- 12.4: Pulsars and the Discovery of Neutron Stars
- 12.5: The Evolution of Binary Star Systems
- 12.6: The Mystery of the Gamma-Ray Bursts
- 12.7: Introducing General Relativity
- 12.8: Spacetime and Gravity
- 12.9: Tests of General Relativity
- 12.10: Time in General Relativity
- 12.11: Black Holes
- 12.12: Evidence for Black Holes
- 12.13: Gravitational Wave Astronomy
- 12.14: The Death of Stars (References)
- 12.15: The Death of Stars (Exercises)
- 12.16: Black Holes and Curved Spacetime (Exercises)

13: Galaxies

- 13.1: The Architecture of the Galaxy
- 13.2: Spiral Structure
- 13.3: The Mass of the Galaxy
- 13.4: The Center of the Galaxy
- 13.5: Stellar Populations in the Galaxy
- 13.6: The Formation of the Galaxy
- 13.7: The Discovery of Galaxies
- 13.8: Types of Galaxies
- 13.9: Properties of Galaxies
- 13.10: The Extragalactic Distance Scale
- 13.11: The Expanding Universe
- 13.12: Quasars
- 13.13: Supermassive Black Holes- What Quasars really are
- 13.14: Quasars as Probes of Evolution in the Universe
- 13.15: Observations of Distant Galaxies
- 13.16: Galaxy Mergers and Active Galactic Nuclei
- 13.17: The Distribution of Galaxies in Space
- 13.18: The Challenge of Dark Matter
- 13.19: The Formation and Evolution of Galaxies and Structure in the Universe
- 13.20: The Milky Way Galaxy (Exercises)
- 13.21: Galaxies (Exercises)
- 13.22: Active Galaxies, Quasars, and Supermassive Black Holes (Exercises)
- 13.23: The Evolution and Distribution of Galaxies (Exercises)

14: The Big Bang

- 14.1: The Age of the Universe
- 14.2: A Model of the Universe
- 14.3: The Beginning of the Universe
- 14.4: The Cosmic Microwave Background
- 14.5: What Is the Universe Really Made Of?
- 14.6: The Inflationary Universe
- 14.7: The Anthropic Principle

- [14.E: The Big Bang \(Exercises\)](#)

15: Life in the Universe

- [15.1: The Cosmic Context for Life](#)
- [15.2: Astrobiology](#)
- [15.3: Searching for Life beyond Earth](#)
- [15.4: The Search for Extraterrestrial Intelligence](#)
- [15.5: Life in the Universe \(Exercises\)](#)

16: Appendices

- [16.1: How to Study for an Introductory Astronomy Class \(Appendix A\)](#)
- [16.2: Astronomy Websites, Images, and Apps \(Appendix B\)](#)
- [16.3: Scientific Notation \(Appendix C\)](#)
- [16.4: Units Used in Science \(Appendix D\)](#)
- [16.5: Some Useful Constants for Astronomy \(Appendix E\)](#)
- [16.6: Physical and Orbital Data for the Planets \(Appendix F\)](#)
- [16.7: Selected Moons of the Planets \(Appendix G\)](#)
- [16.8: Future Total Eclipses \(Appendix H\)](#)
- [16.9: The Nearest Stars, Brown Dwarfs, and White Dwarfs \(Appendix I\)](#)
- [16.10: The Brightest Twenty Stars \(Appendix J\)](#)
- [16.11: The Chemical Elements \(Appendix K\)](#)
- [16.12: The Constellations \(Appendix L\)](#)
- [16.13: Star Chart and Sky Event Resources Index \(Appendix M\)](#)
