

Index

A

absorber

3.2: Blackbody Radiation

absorption spectrum

3.5: Bohr's Model of the Hydrogen Atom

Amplitude

2.2: Simple Harmonic Motion

antinode

2.10: Standing Waves and Resonance

B

Balmer formula

3.5: Bohr's Model of the Hydrogen Atom

Balmer series

3.5: Bohr's Model of the Hydrogen Atom

blackbody

3.2: Blackbody Radiation

blackbody radiation

3.2: Blackbody Radiation

Bohr radius of hydrogen

3.5: Bohr's Model of the Hydrogen Atom

Bohr's model of the hydrogen atom

3.5: Bohr's Model of the Hydrogen Atom

Born interpretation

4.2: Wave functions

C

cern

1.10: Relativistic Energy

classical (Galilean) velocity addition

1.7: Relativistic Velocity Transformation

complex function

4.2: Wave functions

Compton effect

3.4: The Compton Effect

Compton shift

3.4: The Compton Effect

Compton wavelength

3.4: The Compton Effect

constructive interference

2.9: Interference of Waves

Copenhagen interpretation

4.2: Wave functions

correspondence principle

4.2: Wave functions

4.5: The Quantum Particle in a Box

D

Davisson–Germer experiment

3.6: De Broglie's Matter Waves

de Broglie wave

3.6: De Broglie's Matter Waves

de Broglie's hypothesis of matter waves

3.6: De Broglie's Matter Waves

destructive interference

2.9: Interference of Waves

E

Elastic potential energy

2.3: Energy in Simple Harmonic Motion

electron microscopy

3.7: Wave-Particle Duality

emitter

3.2: Blackbody Radiation

energy levels

4.5: The Quantum Particle in a Box

energy of a photon

3.3: Photoelectric Effect

energy of a wave

2.8: Energy and Power of a Wave

energy quantum number

4.5: The Quantum Particle in a Box

equilibrium position

2.2: Simple Harmonic Motion

even function

4.2: Wave functions

event

1.6: The Lorentz Transformation

excited energy states of the H atom

3.5: Bohr's Model of the Hydrogen Atom

expectation value

4.2: Wave functions

5.4: Expectation Values, Observables, and Uncertainty

F

field emission

4.7: Quantum Tunneling of Particles through Potential Barriers

first postulate of special relativity

1.2: Invariance of Physical Laws

fixed boundary condition

2.9: Interference of Waves

force constant

2.2: Simple Harmonic Motion

Fraunhofer lines

3.5: Bohr's Model of the Hydrogen Atom

free boundary condition

2.9: Interference of Waves

frequency

2.2: Simple Harmonic Motion

fundamental frequency

2.10: Standing Waves and Resonance

G

Galilean relativity

1.2: Invariance of Physical Laws

Galilean transformation

1.6: The Lorentz Transformation

ground state energy

4.5: The Quantum Particle in a Box

ground state energy of the hydrogen atom

3.5: Bohr's Model of the Hydrogen Atom

group velocity

3.6: De Broglie's Matter Waves

H

harmonic oscillator

4.6: The Quantum Harmonic Oscillator

Heisenberg uncertainty principle

3.7: Wave-Particle Duality

4.3: The Heisenberg Uncertainty Principle

Humphreys series

3.5: Bohr's Model of the Hydrogen Atom

I

inelastic scattering

3.4: The Compton Effect

inertial frame of reference

1.2: Invariance of Physical Laws

Inertial Frames

1.2: Invariance of Physical Laws

infinite square well

4.5: The Quantum Particle in a Box

intensity

2.8: Energy and Power of a Wave

interference

2.9: Interference of Waves

ionization energy

3.5: Bohr's Model of the Hydrogen Atom

ionization limit of the hydrogen atom

3.5: Bohr's Model of the Hydrogen Atom

L

Length contraction

1.5: Length Contraction

light cone

1.6: The Lorentz Transformation

linear wave equation

2.6: Mathematics of Waves

longitudinal wave

2.5: Traveling Waves

Lorentz transformations

1.6: The Lorentz Transformation

Lyman series

3.5: Bohr's Model of the Hydrogen Atom

M

matter waves

3: Photons and Matter Waves

mechanical wave

2.5: Traveling Waves

momentum operator

4.2: Wave functions

N

nanotechnology

4.7: Quantum Tunneling of Particles through Potential Barriers

node

2.10: Standing Waves and Resonance

normal mode

2.10: Standing Waves and Resonance

normalization condition

4.2: Wave functions

nuclear model of the atom

3.5: Bohr's Model of the Hydrogen Atom

O

odd function

4.2: Wave functions

oscillation

2.2: Simple Harmonic Motion

overtone

2.10: Standing Waves and Resonance

P

Particle in Box

5.2: Solving the 1D Infinite Square Well

Paschen series

3.5: Bohr's Model of the Hydrogen Atom

Pauli exclusion principle

5.3: The Pauli Exclusion Principle

periodic motion

2.2: Simple Harmonic Motion

Pfund series

3.5: Bohr's Model of the Hydrogen Atom

phase shift

2.2: Simple Harmonic Motion

photocurrent

3.3: Photoelectric Effect

Photoelectric effect

3.3: Photoelectric Effect

photoelectrode

3.3: Photoelectric Effect

photoelectron

3.3: Photoelectric Effect

Photon

3.3: Photoelectric Effect

photons

3: Photons and Matter Waves

Planck's hypothesis of energy quanta

3.2: Blackbody Radiation

position operator

4.2: Wave functions

postulates of Bohr's model

3.5: Bohr's Model of the Hydrogen Atom

potential barrier

4.7: Quantum Tunneling of Particles through Potential Barriers

power intensity

3.2: Blackbody Radiation

power of a wave

2.8: Energy and Power of a Wave

principal quantum number

4.5: The Quantum Particle in a Box

probability density

4.2: Wave functions

propagation vector

3.4: The Compton Effect

proper length

1.5: Length Contraction

proper time

1.4: Time Dilation

pulse

2.6: Mathematics of Waves

Q

quantized energies

3.2: Blackbody Radiation

quantum dot

4.7: Quantum Tunneling of Particles through Potential Barriers

Quantum Harmonic Oscillator

4.6: The Quantum Harmonic Oscillator

Quantum Number

3.5: Bohr's Model of the Hydrogen Atom

quantum phenomenon

3.3: Photoelectric Effect

quantum state of a Planck's oscillator

3.2: Blackbody Radiation

quantum tunneling

4.7: Quantum Tunneling of Particles through Potential Barriers

R

reduced Planck's constant

3.4: The Compton Effect

relativistic Doppler effect

1.8: Doppler Effect for Light

Relativistic Energy

1.10: Relativistic Energy

relativistic factor

1.9: Relativistic Momentum

relativistic kinetic energy

1.10: Relativistic Energy

relativistic momentum

1.9: Relativistic Momentum

relativistic velocity addition

1.7: Relativistic Velocity Transformation

resonant tunneling

4.7: Quantum Tunneling of Particles through Potential Barriers

rest energy

1.10: Relativistic Energy

rest frame

1.2: Invariance of Physical Laws

rest mass

1.9: Relativistic Momentum

restoring force

2.3: Energy in Simple Harmonic Motion

Rutherford's gold foil experiment

3.5: Bohr's Model of the Hydrogen Atom

Rydberg constant for hydrogen

3.5: Bohr's Model of the Hydrogen Atom

Rydberg formula

3.5: Bohr's Model of the Hydrogen Atom

S

scanning tunneling microscope (STM)

4.7: Quantum Tunneling of Particles through Potential Barriers

scattering angle

3.4: The Compton Effect

second postulate of special relativity

1.2: Invariance of Physical Laws

SHM

2.2: Simple Harmonic Motion

Simple harmonic motion

2.2: Simple Harmonic Motion

simple harmonic oscillator

2.2: Simple Harmonic Motion

simultaneity

1.3: Relativity of Simultaneity

special theory of relativity

1.2: Invariance of Physical Laws

Speed of light

1.10: Relativistic Energy

stable equilibrium point

2.3: Energy in Simple Harmonic Motion

standing wave

2.10: Standing Waves and Resonance

standing wave state

4.5: The Quantum Particle in a Box

state reduction

4.2: Wave functions

stationary state

4.5: The Quantum Particle in a Box

Stefan-Boltzmann constant

3.2: Blackbody Radiation

stopping potential

3.3: Photoelectric Effect

superposition

2.9: Interference of Waves

T

Time dilation

1.4: Time Dilation

tokamak

1.10: Relativistic Energy

total energy

1.10: Relativistic Energy

transmission probability

4.7: Quantum Tunneling of Particles through Potential Barriers

transverse wave

2.5: Traveling Waves

tunnel diode

4.7: Quantum Tunneling of Particles through Potential Barriers

tunneling

5.7: Barrier Penetration and Tunneling

tunneling probability

4.7: Quantum Tunneling of Particles through Potential Barriers

twin paradox

1.6: The Lorentz Transformation

U

uncertainty

5.4: Expectation Values, Observables, and Uncertainty

V

velocity transformation

1.7: Relativistic Velocity Transformation

W

wave

2.5: Traveling Waves

2.8: Energy and Power of a Wave

Wave function

2.6: Mathematics of Waves

4.2: Wave functions

wave function collapse

4.2: Wave functions

wave number

2.6: Mathematics of Waves

3.4: The Compton Effect

wave packet

4.3: The Heisenberg Uncertainty Principle

wave quantum mechanics

3.6: De Broglie's Matter Waves

wave speed

2.5: Traveling Waves

wave velocity

[2.5: Traveling Waves](#)

wavelength

[2.5: Traveling Waves](#)

work function

[3.3: Photoelectric Effect](#)

world line

[1.6: The Lorentz Transformation](#)
