Selected Physical Constants

The Authors

The Unity of SpaceTime

1: Spacetime Overview

- 1.1: Parable of the Surveyors
- 1.2: Surveying Spacetime
- 1.3: Events and Intervals Alone!
- 1.4: Same Unit for Space and Time- Meter, Second, Minute, or Year
- 1.5: Unity of Spacetime
- 1.6: End of Chapter
- 1.E: Spacetime (Exercises)

2: Floating Free

- 2.1: Floating to Moon
- 2.2: The Inertial (Free-float) Frame
- 2.3: Local Character of Free-float Frame
- 2.4: Regions of Spacetime
- 2.5: Test Particle
- 2.6: Locating Events With a Latticework of Clocks
- 2.7: Observer
- 2.8: Measuring Particle Speed
- 2.9: Rocket Frame
- 2.10: End of Chapter
- 2.E: Floating Free (Exercises)
- 2.S: Floating Free (Summary)

3: Same Laws for All

- 3.1: The Principle of Relativity
- 3.2: What Is Not the Same in Different Frames
- 3.3: What Is the Same in Different Frames
- 3.4: Relativity of Simultaneity
- 3.5: Lorentz Contraction of Length
- 3.6: Invariance of Transverse Dimension
- 3.7: Invariance of the Interval Proved
- 3.8: Invariance of the Interval for All Free-float Frames
- 3.9: End of Chapter
- 3.E: Same Laws for All (Exercises)
- 3.S: Same Laws for All (Summary)

4: Trip to Canopus

- 4.1: Invitation To Canopus
- 4.2: Stripped-down Free-float Frame
- 4.3: Faster Than Light?
- 4.4: All of Space Is Ours!
- 4.5: Flight Plan
- 4.6: Twin Paradox
- 4.7: Lorentz Contraction
- 4.8: Time Traveler
- 4.9: Relativity of Simultaneity
- 4.10: Experimental Evidence
- 4.11: End of Chapter
- 4.E: Trip to Canopus (Exercises)

5: Trekking through Spacetime

- 5.1: Time? No. Spacetime Map? Yes.
- 5.2: Same Events; Different Free-float Frames
- 5.3: Invariant Hyperbola
- 5.4: Worldline
- 5.5: Length Along a Path
- 5.6: Wristwatch Time Along a Worldline
- 5.7: Kinked Worldline
- 5.8: Stretch Factor
- 5.9: Touring Spacetime Without a Reference Frame
- 5.10: End of Chapter
- 5.E: Trekking through Spacetime (Exercises)
- 5.S: Trekking through Spacetime (Summary)

6: Regions of Spacetime

- 6.1: Light Speed- Limit on Casualty
- 6.2: Relation Between Events- Timelike, Spacelike, or Lightlike
- 6.3: Light Cone- Partition in Spacetime
- 6.E: Regions of Spacetime (Exercises)

7: Momenergy

- 7.1: Momenergy- Total Conserved in a Collision
- 7.2: Momenergy Arrow
- 7.3: Momenergy Components and Magnitude
- 7.4: Momentum- "Space Part" of Momenergy
- 7.5: Energy- "Time Part" of Momenergy
- 7.6: Conservation of Momenergy and Its Consequences
- 7.7: Momenergy (Summary)
- 7.8: End of Chapter
- 7.E: Momenergy (Exercises)

8: Collide. Create. Annihilate.

- 8.1: The System
- 8.2: Three Modest Experiments
- 8.3: Mass of a System of Particles
- 8.4: Energy Without Mass- Photon

- 8.5: Photon Used to Create Mass
- 8.6: Photon Used to Create Mass
- 8.7: Converting Mass to Usable Energy- Fission, Fusion, Annihilation
- 8.8: End of Chapter
- 8.E: Collide. Create. Annihilate. (Exercises)
- 8.S: Collide. Create. Annihilate. (Summary)

9: Gravity - Curved Spacetime in Action

- 9.1: Gravity in Brief
- 9.2: Galileo, Newton, and Einstein
- 9.3: Local Moving Orders for Mass
- 9.4: Spacetime Curvature
- 9.5: Parable of the Two Travelers
- 9.6: Gravitation as Curvature of Spacetime
- 9.7: Gravity Waves
- 9.8: Black Hole
- 9.9: The Cosmos

10: Answers

- 10.1: Answers to Odd-numbered Exercises

11: Special Topic - Lorentz Transformation

- 11.1: Lorentz Transformation- Useful or Not?
- 11.2: Faster Than Light?
- 11.3: First Steps
- 11.4: Form of the Lorentz Transformation
- 11.5: Completing the Derivation
- 11.6: Inverse Lorentz Transformation
- 11.7: Addition of Velocities
- 11.8: Summary
- 11.9: Problems
