

The Future is OPEN

Phys1140: Introductory Physics II: Part 1

PHYS1140: INTRODUCTORY PHYSICS II: PART 1

Welcome students! Physics 1140 will be using a selection of open electronic resources (OER) to support your learning in this course. The Bowdoin Physics Department has collected sections of the OpenStax University Physics OER textbook and arranged them in parts 1 and 2 according to the material we will discuss. Part 1 provides information, sample problems, and online simulations for the first half of the course. Part 2 provides the same for the remainder of the course.
