

# Index

## A

### Angular acceleration

- 20.1: Motion on a Circle (Or Part of a Circle)
- 22.1: Rotational Variables

### Angular momentum

- 6.1: Angular Momentum
- 6.3: Examples

### angular position

- 22.1: Rotational Variables

### angular velocity

- 7.1: The Angular Momentum of a Point and The Cross Product
- 22.1: Rotational Variables

### antinodes

- 24.2: Standing Waves and Resonance

## B

### base quantities

- 1.3: Units and Standards

### base quantity

- 1.3: Units and Standards

### base unit

- 1.3: Units and Standards

### Base units

- 1.3: Units and Standards

### Boltzmann constant

- 25.2: Introducing Temperature

### Bulk modulus

- 24.1: Traveling Waves

## C

### carnot machine

- 25.4: The Second Law and Entropy

### center of gravity

- 19.1: Conditions for Static Equilibrium

### Center of mass

- 4.2: Extended Systems and Center of Mass
- 4.4: Examples

### Centrifugal force

- 20.1: Motion on a Circle (Or Part of a Circle)
- 20.2: Banking

### centripetal acceleration

- 20.1: Motion on a Circle (Or Part of a Circle)

### Centripetal force

- 20.1: Motion on a Circle (Or Part of a Circle)

### closed system

- 5.1: Conservation of Linear Momentum
- 5.4: More Examples

### Conservation of angular momentum

- 6.3: Examples

### conversion factor

- 1.4: Unit Conversion

### Coriolis Force

- 20.2: Banking

### Cross product

- 6.1: Angular Momentum

## D

### derived quantity

- 1.3: Units and Standards

### derived unit

- 1.3: Units and Standards

### derived units

- 1.3: Units and Standards

### direction angle

- 3.1: Coordinate Systems and Components of a Vector (Part 1)

### Dispersion

- 24.6: Advanced Topics

## E

### eccentricity

- 8.3: Universal Gravity
- 13.1: Orbits
- 13.2: Kepler's Laws

### elastic

- 12.1: Types of Collisions

### Elastic collision

- 8.1: Kinetic Energy
- 8.5: Relative Velocity and the Coefficient of Restitution

### ellipse

- 8.3: Universal Gravity
- 13.1: Orbits
- 13.2: Kepler's Laws

### energy flux

- 24.1: Traveling Waves

### English units

- 1.3: Units and Standards

### entropy

- 25.4: The Second Law and Entropy

### equilibrium

- 19.1: Conditions for Static Equilibrium

### equilibrium point

- 9.3: Equilibrium and Turning Points
- 9.5: Examples

### Equivalence Principle

- 13.3: Weight, Acceleration, and the Equivalence Principle

### event horizon

- 13.3: Weight, Acceleration, and the Equivalence Principle

### explosion

- 12.1: Types of Collisions

### external force

- 4.4: Examples

## F

### first equilibrium condition

- 19.1: Conditions for Static Equilibrium

### first law of thermodynamics

- 25.3: Heat and the First Law

### focus

- 8.3: Universal Gravity
- 13.1: Orbits
- 13.2: Kepler's Laws

### force

- 4.1: The Law of Inertia

### frequency

- 23.1: Introduction- The Physics of Oscillations

### Friction

- 18.1: Friction (Part 1)
- 18.2: Friction (Part 2)

### fundamental frequency

- 24.2: Standing Waves and Resonance

## G

### gravitational torque

- 19.1: Conditions for Static Equilibrium

## H

### Heat capacity

- 25.2: Introducing Temperature

## I

### Ideal gas

- 25.2: Introducing Temperature

### impedance

- 24.1: Traveling Waves

### inelastic

- 12.1: Types of Collisions

### Inelastic collision

- 2.1: Inertia
- 8.1: Kinetic Energy
- 8.5: Relative Velocity and the Coefficient of Restitution

### Inertia

- 14.2: Details on Newton's First Law

### inertial reference frame

- 14.2: Details on Newton's First Law

### instantaneous angular acceleration

- 22.1: Rotational Variables

### instantaneous angular velocity

- 22.1: Rotational Variables

### Integral Calculus

- 15.4: The Connection Between Displacement, Velocity, and Acceleration

### intensity

- 24.1: Traveling Waves

## K

### Kepler's laws

- 8.3: Universal Gravity
- 13.1: Orbits
- 13.2: Kepler's Laws

### kilogram

- 1.3: Units and Standards

### Kinematic

- 15.4: The Connection Between Displacement, Velocity, and Acceleration

### Kinematic Equations

- 15.4: The Connection Between Displacement, Velocity, and Acceleration

### Kinematics

- 15.1: Position, Displacement, Velocity

### kinematics of rotational motion

- 22.2: Rotation with Constant Angular Acceleration

### kinetic energy

- 8.1: Kinetic Energy
- 8.5: Relative Velocity and the Coefficient of Restitution

### Kinetic Friction

- 18.1: Friction (Part 1)
- 18.2: Friction (Part 2)
- 21.3: Forces Not Derived From a Potential Energy

## L

### law of conservation of angular momentum

- 6.3: Examples

### Law of Conservation of Momentum

- 5.1: Conservation of Linear Momentum
- 5.4: More Examples

### Law of inertia

- 4.1: The Law of Inertia
- 14.2: Details on Newton's First Law

linear mass density

[4.4: Examples](#)

longitudinal wave

[24.1: Traveling Waves](#)

## M

Meter

[1.3: Units and Standards](#)

method of adding percents

[1.5: Significant Figures](#)

metric system

[1.3: Units and Standards](#)

Moment of Inertia

[11.1: Rotational Kinetic Energy, and Moment of Inertia](#)

[11.3: Examples](#)

momentum

[2.2: Momentum](#)

## N

net work

[21.4: Examples](#)

Newton's first law of motion

[14.2: Details on Newton's First Law](#)

Newton's second law

[14.3: Details on Newton's Second Law](#)

Newton's second law for rotation

[22.4: Newton's Second Law for Rotation](#)

Newton's second law of motion

[14.3: Details on Newton's Second Law](#)

Newton's third law

[14.4: Details on Newton's Third Law](#)

Newton's third law of motion

[14.4: Details on Newton's Third Law](#)

nodes

[24.2: Standing Waves and Resonance](#)

normal modes

[24.2: Standing Waves and Resonance](#)

## O

orbit

[8.3: Universal Gravity](#)

[13.1: Orbits](#)

[13.2: Kepler's Laws](#)

overtones

[24.2: Standing Waves and Resonance](#)

## P

parabolic trajectory

[8.3: Universal Gravity](#)

[13.1: Orbits](#)

[13.2: Kepler's Laws](#)

particle

[1.2: Modeling in Physics](#)

perfectly inelastic

[12.1: Types of Collisions](#)

phase angle

[23.2: Simple Harmonic Motion](#)

physical quantity

[1.3: Units and Standards](#)

polar coordinate system

[3.2: Coordinate Systems and Components of a Vector \(Part 2\)](#)

Polar coordinates

[3.2: Coordinate Systems and Components of a Vector \(Part 2\)](#)

potential energy

[8.2: Conservative Interactions](#)

[9.1: Potential Energy of a System](#)

[9.2: Potential Energy Functions](#)

potential energy diagram

[9.3: Equilibrium and Turning Points](#)

[9.5: Examples](#)

potential energy difference

[9.1: Potential Energy of a System](#)

Principle of Relativity

[4.1: The Law of Inertia](#)

Projectile motion

[16.4: Examples](#)

## R

radial coordinate

[3.2: Coordinate Systems and Components of a Vector \(Part 2\)](#)

resonance

[24.2: Standing Waves and Resonance](#)

restoring force

[23.1: Introduction- The Physics of Oscillations](#)

rocket propulsion

[4.2: Extended Systems and Center of Mass](#)

rotational dynamics

[22.4: Newton's Second Law for Rotation](#)

rotational kinetic energy

[11.3: Examples](#)

## S

scalar components

[3.1: Coordinate Systems and Components of a Vector \(Part 1\)](#)

Schwarzschild radius

[13.3: Weight, Acceleration, and the Equivalence Principle](#)

second

[1.3: Units and Standards](#)

second equilibrium condition

[19.1: Conditions for Static Equilibrium](#)

semimajor axis

[8.3: Universal Gravity](#)

[13.1: Orbits](#)

[13.2: Kepler's Laws](#)

semiminor axis

[8.3: Universal Gravity](#)

[13.1: Orbits](#)

[13.2: Kepler's Laws](#)

SI Units

[1.3: Units and Standards](#)

significant figures

[1.5: Significant Figures](#)

Simple harmonic motion

[23.2: Simple Harmonic Motion](#)

small angle approximation

[23.3: Pendulums](#)

specific heat

[25.2: Introducing Temperature](#)

standing wave

[24.2: Standing Waves and Resonance](#)

state function

[25.4: The Second Law and Entropy](#)

Static Equilibrium

[19.1: Conditions for Static Equilibrium](#)

Static Friction

[18.1: Friction \(Part 1\)](#)

[18.2: Friction \(Part 2\)](#)

[21.3: Forces Not Derived From a Potential Energy](#)

system

[5.1: Conservation of Linear Momentum](#)

[5.4: More Examples](#)

## T

tangential acceleration

[20.1: Motion on a Circle \(Or Part of a Circle\)](#)

tension

[21.3: Forces Not Derived From a Potential Energy](#)

the component form of a vector

[3.1: Coordinate Systems and Components of a Vector \(Part 1\)](#)

thrust

[14.4: Details on Newton's Third Law](#)

Torque

[7.2: Torque](#)

total linear acceleration

[22.3: Relating Angular and Translational Quantities](#)

trajectory

[16.4: Examples](#)

transverse wave

[24.1: Traveling Waves](#)

traveling wave

[24.1: Traveling Waves](#)

turning point

[9.3: Equilibrium and Turning Points](#)

[9.5: Examples](#)

## U

units

[1.3: Units and Standards](#)

## V

vector components

[3.1: Coordinate Systems and Components of a Vector \(Part 1\)](#)

## W

Wave function

[24.1: Traveling Waves](#)

wave motion

[24.1: Traveling Waves](#)

## Y

Young Modulus

[24.1: Traveling Waves](#)

## Z

zeroth law of thermodynamics

[25.2: Introducing Temperature](#)
