

Index

A

absorption coefficient
10.1: Natural Broadening (Radiation Damping)
albedoes
1.13: Lambertian Surface
anomalous Zeeman effect
7.21: Zeeman effect
apparent bolometric magnitude
1.9: Apparent Magnitude
atomic absorption coefficient
5.2: Absorption
atomic spectra
7: Atomic Spectroscopy

B

black body
2.1: Absorptance, and the Definition of a Black Body
Bohr Model
7.4: The Bohr Model of Hydrogen-like Atoms
Boltzmann distribution
8.4: Boltzmann's Equation
boltzmann's Equation
8: Boltzmann's and Saha's Equations

C

convolution
10.4: Combination of Profiles
curve of growth
11.1: Introduction to Curve of Growth

E

Emission Coefficient
4.8: Emission Coefficient
emissivity
1.11: Exitance M
exitance
1.11: Exitance M

G

Gaussian Profile
10.1: Natural Broadening (Radiation Damping)
grey body
2.1: Absorptance, and the Definition of a Black Body

H

hyperfine structure
7.18: Hyperfine Structure

I

illuminance
1.10: Irradiance E
index of refraction
7.1: Introduction
irradiance
1.10: Irradiance E

L

Lambert's Law
1.13: Lambertian Surface
Lambertian Surface
1.13: Lambertian Surface
Landé splitting factor
7.21: Zeeman effect
limb darkening coefficient
6.1: Introduction. The Empirical Limb-darkening
line profiles
10: Line Profiles
line strength
9.5: Line Strength
Lorentz profile
10.1: Natural Broadening (Radiation Damping)
luminosity
4.2: Luminosity
lux
1.10: Irradiance E

M

mass extinction coefficient
5.3: Scattering, Extinction and Opacity
Microturbulence
10.3: Microturbulence

O

opacity
5.3: Scattering, Extinction and Opacity
Optical Depth
5.4: Optical Depth
optical thickness
5.4: Optical Depth
oscillator strength
9: Oscillator Strengths and Related Topics

P

partition function
8.4: Boltzmann's Equation
phot
1.10: Irradiance E

Planck distribution

2.5: Planck's Equation
pressure broadening
10.1: Natural Broadening (Radiation Damping)
10.5: Pressure Broadening

R

Radiance
1.12: Radiance L
9.1: Introduction, Radiance, and Equivalent Width
radiation damping constant
10.1: Natural Broadening (Radiation Damping)
Radiation Density
1.16: Radiation Density (u)
radiation pressure
1.18: Radiation Pressure (P)
4.6: Radiation Pressure

S

Saha's Equation
8: Boltzmann's and Saha's Equations
8.6: Saha's Equation
Schrodinger's Equation
7.8: Schrödinger's Equation
Specific Intensity
4.3: Specific Intensity
specular reflection
1.13: Lambertian Surface
Stefan's constant
2.7: Stefan's Law (The Stefan-Boltzmann Law)
Stefan's Laws
2.10: Derivation of Wien's and Stefan's Laws
surface brightness
1.12: Radiance L

V

Voigt profile
10.4: Combination of Profiles
Voigt Profiles
11.6: Curve of Growth for Voigt Profiles

W

Wien's
2.10: Derivation of Wien's and Stefan's Laws
Wien's law
2.6: Wien's Law

Z

Zeeman effect
7.21: Zeeman effect
