

## CHAPTER OVERVIEW

### 1: Reflection and Refraction

- [1.1: Introduction](#)
- [1.2: Reflection at a Plane Surface](#)
- [1.3: Refraction at a Plane Surface](#)
- [1.4: Real and Apparent Depth](#)
- [1.5: Reflection and Refraction](#)
- [1.6: Refraction by a Prism](#)
- [1.7: The Rainbow](#)
- [1.8: Differential Form of Snell's Law](#)

Thumbnail: The larger the angle to the normal, the smaller is the fraction of light transmitted rather than reflected, until the angle at which total internal reflection occurs. The color of the rays is to help distinguish the rays, and is not meant to indicate any color dependence. (CC BY-SA 3.0; Clément 421138).
