

Index

A

absolute temperature scale

[12.3: Thermometers and Temperature Scales](#)

absolute zero

[12.3: Thermometers and Temperature Scales](#)

Angular acceleration

[15.6: Motion on a Circle \(Or Part of a Circle\)](#)
[23.1: Rotational Variables](#)

Angular momentum

[6.1: Angular Momentum](#)
[6.3: Examples](#)

angular position

[23.1: Rotational Variables](#)

angular velocity

[7.1: The Angular Momentum of a Point and The Cross Product](#)
[23.1: Rotational Variables](#)

associative

[3.2: Vector Algebra in 1 Dimension](#)

B

base quantities

[1.3: Units and Standards](#)

base quantity

[1.3: Units and Standards](#)

base unit

[1.3: Units and Standards](#)

Base units

[1.3: Units and Standards](#)

C

calorie (unit)

[12.4: Heat Transfer, Specific Heat, and Calorimetry](#)

calorimeter

[12.4: Heat Transfer, Specific Heat, and Calorimetry](#)

calorimetry

[12.4: Heat Transfer, Specific Heat, and Calorimetry](#)

Celsius scale

[12.3: Thermometers and Temperature Scales](#)

center of gravity

[20.1: Conditions for Static Equilibrium](#)

Center of mass

[4.2: Extended Systems and Center of Mass](#)
[4.4: Examples](#)

Centrifugal force

[15.6: Motion on a Circle \(Or Part of a Circle\)](#)
[21.1: Banking](#)

centripetal acceleration

[15.6: Motion on a Circle \(Or Part of a Circle\)](#)

Centripetal force

[15.6: Motion on a Circle \(Or Part of a Circle\)](#)

closed system

[5.1: Conservation of Linear Momentum](#)
[5.4: More Examples](#)

Commutative

[3.2: Vector Algebra in 1 Dimension](#)

condensation

[13.1: Phase Changes](#)

conduction

[13.2: Mechanisms of Heat Transfer](#)

Conservation of angular momentum

[6.3: Examples](#)

convection

[13.2: Mechanisms of Heat Transfer](#)

conversion factor

[1.4: Unit Conversion](#)

Coriolis Force

[21.1: Banking](#)

Cross product

[6.1: Angular Momentum](#)

D

degree Celsius

[12.3: Thermometers and Temperature Scales](#)

degree Fahrenheit

[12.3: Thermometers and Temperature Scales](#)

derived quantity

[1.3: Units and Standards](#)

derived unit

[1.3: Units and Standards](#)

derived units

[1.3: Units and Standards](#)

Dimensional Analysis

[1.5: Dimensional Analysis](#)

dimensionally consistent

[1.5: Dimensional Analysis](#)

dimensionless

[1.5: Dimensional Analysis](#)

displacement

[3.2: Vector Algebra in 1 Dimension](#)

distributive

[3.2: Vector Algebra in 1 Dimension](#)

E

eccentricity

[8.3: The Inverse-Square Law](#)

elastic

[14.1: Types of Collisions](#)

Elastic collision

[8.1: Kinetic Energy](#)
[8.8: Relative Velocity and the Coefficient of Restitution](#)

ellipse

[8.3: The Inverse-Square Law](#)

emissivity

[13.2: Mechanisms of Heat Transfer](#)

English units

[1.3: Units and Standards](#)

equilibrium

[20.1: Conditions for Static Equilibrium](#)

equilibrium point

[9.3: Potential Energy Graphs](#)
[9.4: Examples](#)

estimation

[1.6: Estimates and Fermi Calculations](#)

evaporation

[13.1: Phase Changes](#)

explosion

[14.1: Types of Collisions](#)

external force

[4.4: Examples](#)

F

Fahrenheit scale

[12.3: Thermometers and Temperature Scales](#)

first equilibrium condition

[20.1: Conditions for Static Equilibrium](#)

focus

[8.3: The Inverse-Square Law](#)

force

[4.1: The Law of Inertia](#)

freezing

[13.1: Phase Changes](#)

frequency

[24.1: Introduction- The Physics of Oscillations](#)

Friction

[19.1: Friction \(Part 1\)](#)
[19.2: Friction \(Part 2\)](#)

G

gravitational torque

[20.1: Conditions for Static Equilibrium](#)

greenhouse effect

[13.2: Mechanisms of Heat Transfer](#)

H

heat

[12.4: Heat Transfer, Specific Heat, and Calorimetry](#)

I

inelastic

[14.1: Types of Collisions](#)

Inelastic collision

[2.1: Inertia](#)
[8.1: Kinetic Energy](#)
[8.8: Relative Velocity and the Coefficient of Restitution](#)

Inertia

[15.2: Details on Newton's First Law](#)

inertial reference frame

[15.2: Details on Newton's First Law](#)

instantaneous angular acceleration

[23.1: Rotational Variables](#)

instantaneous angular velocity

[23.1: Rotational Variables](#)

Integral Calculus

[16.5: The Connection Between Displacement, Velocity, and Acceleration](#)

K

Kelvin scale

[12.3: Thermometers and Temperature Scales](#)

Kepler's laws

[8.3: The Inverse-Square Law](#)

kilocalorie

[12.4: Heat Transfer, Specific Heat, and Calorimetry](#)

kilocalorie (kcal)

[12.4: Heat Transfer, Specific Heat, and Calorimetry](#)

kilogram

[1.3: Units and Standards](#)

Kinematic

[16.5: The Connection Between Displacement, Velocity, and Acceleration](#)

Kinematic Equations

[16.5: The Connection Between Displacement, Velocity, and Acceleration](#)

Kinematics

[16.2: Position, Displacement, Velocity](#)

kinematics of rotational motion

[23.2: Rotation with Constant Angular Acceleration](#)

kinetic energy

8.1: Kinetic Energy

8.8: Relative Velocity and the Coefficient of Restitution

Kinetic Friction

19.1: Friction (Part 1)

19.2: Friction (Part 2)

22.3: Forces Not Derived From a Potential Energy

L

law of conservation of angular momentum

6.3: Examples

Law of Conservation of Momentum

5.1: Conservation of Linear Momentum

5.4: More Examples

Law of inertia

4.1: The Law of Inertia

15.2: Details on Newton's First Law

linear mass density

4.4: Examples

M

Magnitude

3.2: Vector Algebra in 1 Dimension

mechanical equivalent of heat

12.4: Heat Transfer, Specific Heat, and Calorimetry

melting

13.1: Phase Changes

Meter

1.3: Units and Standards

metric system

1.3: Units and Standards

Moment of Inertia

11.1: Rotational Kinetic Energy, and Moment of Inertia

11.3: Examples

momentum

2.2: Momentum

N

net work

22.4: Examples

Newton's first law of motion

15.2: Details on Newton's First Law

Newton's second law

15.3: Details on Newton's Second Law

Newton's second law for rotation

23.4: Newton's Second Law for Rotation

Newton's second law of motion

15.3: Details on Newton's Second Law

Newton's third law

15.4: Details on Newton's Third Law

Newton's third law of motion

15.4: Details on Newton's Third Law

O

orbit

8.3: The Inverse-Square Law

orthogonal vectors

3.2: Vector Algebra in 1 Dimension

P

parabolic trajectory

8.3: The Inverse-Square Law

parallel vectors

3.2: Vector Algebra in 1 Dimension

parallelogram rule

3.3: Vector Algebra in 2 Dimensions- Graphical

particle

1.2: Modeling in Physics

perfectly inelastic

14.1: Types of Collisions

phase angle

24.2: Simple Harmonic Motion

phase diagram

13.1: Phase Changes

Phase transition

13.1: Phase Changes

physical quantity

1.3: Units and Standards

potential energy

8.2: Conservative Interactions

9.1: Potential Energy of a System

9.2: Potential Energy Functions

potential energy diagram

9.3: Potential Energy Graphs

9.4: Examples

potential energy difference

9.1: Potential Energy of a System

Principle of Relativity

4.1: The Law of Inertia

Projectile motion

17.4: Examples

R

radiation

13.2: Mechanisms of Heat Transfer

restoring force

24.1: Introduction- The Physics of Oscillations

resultant

3.2: Vector Algebra in 1 Dimension

resultant vector

3.2: Vector Algebra in 1 Dimension

rocket propulsion

4.2: Extended Systems and Center of Mass

rotational dynamics

23.4: Newton's Second Law for Rotation

rotational kinetic energy

11.3: Examples

S

scalar equation

3.2: Vector Algebra in 1 Dimension

second

1.3: Units and Standards

second equilibrium condition

20.1: Conditions for Static Equilibrium

semimajor axis

8.3: The Inverse-Square Law

semiminor axis

8.3: The Inverse-Square Law

SI Units

1.3: Units and Standards

Simple harmonic motion

24.2: Simple Harmonic Motion

small angle approximation

24.3: Pendulums

Static Equilibrium

20.1: Conditions for Static Equilibrium

Static Friction

19.1: Friction (Part 1)

19.2: Friction (Part 2)

22.3: Forces Not Derived From a Potential Energy

system

5.1: Conservation of Linear Momentum

5.4: More Examples

T

tangential acceleration

15.6: Motion on a Circle (Or Part of a Circle)

tension

22.3: Forces Not Derived From a Potential Energy

thrust

15.4: Details on Newton's Third Law

Torque

7.2: Torque

total linear acceleration

23.3: Relating Angular and Translational Quantities

trajectory

17.4: Examples

triple point

12.3: Thermometers and Temperature Scales

turning point

9.3: Potential Energy Graphs

9.4: Examples

U

Unit vector

3.2: Vector Algebra in 1 Dimension

units

1.3: Units and Standards

V

vector equation

3.2: Vector Algebra in 1 Dimension

vectors

3.2: Vector Algebra in 1 Dimension
