

TABLE OF CONTENTS

Licensing

Preface

Licensing

1: The Scientific Method and Physics

- 1.1: Science and the Scientific Method
- 1.2: Theories, Hypotheses and Models
- 1.3: Fighting Intuition
- 1.4: The Scope of Physics
- 1.5: Thinking Like a Physicist
- 1.6: Summary
- 1.7: Thinking about the Material
- 1.8: Sample Problems and Solutions

2: Comparing Model and Experiment

- 2.1: Orders of magnitude
- 2.2: Units and dimensions
- 2.3: Making Measurements
- 2.4: Summary
- 2.5: Thinking about the material
- 2.6: Sample problems and solutions

3: Describing Motion in One Dimension

- 3.1: Motion with Constant Speed
- 3.2: Motion with Constant Acceleration
- 3.3: Using Calculus to Describe Motion
- 3.4: Using Computation to Simulate Motion
- 3.5: Relative Motion
- 3.6: Summary
- 3.7: Thinking About the Material
- 3.8: Sample Problems and Solutions

4: Describing Motion in Multiple Dimensions

- 4.1: Motion in two Dimensions
- 4.2: Exploring Vectors with PhET
- 4.3: Motion in three dimensions
- 4.4: Accelerated motion when the velocity vector changes direction
- 4.5: Circular motion
- 4.6: Using Computation to Simulate Motion in Multiple Dimensions
- 4.7: Summary
- 4.8: Thinking about the material .
- 4.9: Sample problems and solutions

5: Newton's Laws

- 5.1: Newton's Three Laws
- 5.2: Force
- 5.3: Mass and inertia
- 5.4: Exploring Forces with PhET
- 5.5: Applying Newton's Laws
- 5.6: The acceleration due to gravity
- 5.7: Non-inertial frames of reference and inertial forces
- 5.8: Summary
- 5.9: Thinking about the Material
- 5.10: Sample problems and solutions

6: Applying Newton's Laws

- 6.1: Statics
- 6.2: Linear motion
- 6.3: Using Computation to Simulate Centripetal Force
- 6.4: Uniform circular motion
- 6.5: Non-uniform circular motion
- 6.6: Summary
- 6.7: Thinking about the material
- 6.8: Problems and Solutions

7: Work and energy

- 7.1: Work
- 7.2: Kinetic energy and the work energy theorem
- 7.3: Using PhET to Study the Work-Energy Theorem
- 7.4: Calculating Work Numerically
- 7.5: Power
- 7.6: Summary
- 7.7: Thinking about the material
- 7.8: Sample Problems and Solutions

8: Potential Energy and Conservation of Energy

- 8.1: Conservative Forces
- 8.2: Potential Energy
- 8.3: Mechanical Energy and Conservation of Energy
- 8.4: Energy diagrams and equilibria
- 8.5: Using PhET to explore the Work-Energy Theorem and Energy Diagrams
- 8.6: The Lagrangian Formulation of Classical Physics
- 8.7: Summary
- 8.8: Thinking about the material
- 8.9: Sample problems and solutions

9: Gravity

- 9.1: Kepler's Laws
- 9.2: Newton's Universal Theory of Gravity
- 9.3: Gravitational potential energy
- 9.4: Einstein's Theory of General Relativity
- 9.5: Summary
- 9.6: Thinking about the material

- 9.7: Sample problems and solutions

10: Linear Momentum and the Center of Mass

- 10.1: Momentum
- 10.2: Collisions
- 10.3: The center of mass
- 10.4: Summary
- 10.5: Thinking about the material .
- 10.6: Sample problems and solutions

11: Rotational dynamics

- 11.1: Rotational kinematic vectors
- 11.2: Rotational dynamics for a single particle
- 11.3: Torque
- 11.4: Rotation about an axis versus rotation about a point .
- 11.5: Rotational dynamics for a solid object
- 11.6: Moment of Inertia
- 11.7: Equilibrium
- 11.8: Summary
- 11.9: Thinking about the material
- 11.10: Sample problems and solutions

12: Rotational Energy and Momentum

- 12.1: Rotational Kinetic Energy of an Object
- 12.2: Rolling motion
- 12.3: Angular Momentum
- 12.4: Summary
- 12.5: Thinking about the material
- 12.6: Sample problems and solutions

13: Simple Harmonic Motion

- 13.1: The motion of a spring-mass system
- 13.2: Vertical spring-mass system
- 13.3: Simple Harmonic Motion
- 13.4: The Motion of a Pendulum
- 13.5: Summary
- 13.6: Thinking about the material
- 13.7: Sample problems and solutions

14: Waves

- 14.1: Characteristics of a wave
- 14.2: Mathematical Description of a Wave
- 14.3: Waves on a Rope
- 14.4: The speed of a wave
- 14.5: Energy Transported by a Wave
- 14.6: Superposition of waves and interference
- 14.7: Standing waves
- 14.8: Summary
- 14.9: Thinking about the material
- 14.10: Sample problems and solutions

15: Fluid Mechanics

- 15.1: Pressure
- 15.2: Buoyancy
- 15.3: Hydrodynamics
- 15.4: Exploring Pressure with PhET
 - 15.4.1: Hydrostatics
 - 15.4.2: Buoyancy
 - 15.4.3: Hydrodynamics
- 15.5: Summary
- 15.6: Thinking about the material
- 15.7: Sample problems and solutions

16: Electric Charges and Fields

- 16.1: Electric Charge
- 16.2: The Coulomb force
- 16.3: The Electric Field
- 16.4: The Electric Dipole
- 16.5: Summary
- 16.6: Thinking about the material
- 16.7: Sample problems and solutions

17: Gauss' Law

- 17.1: Flux of the Electric Field
- 17.2: Gauss' Law
- 17.3: Charges in a Conductor
- 17.4: Interpretation of Gauss' Law and vector calculus
- 17.5: Summary
- 17.6: Thinking about the Material
- 17.7: Sample problems and solutions

18: Electric potential

- 18.1: Electric Potential Energy
- 18.2: Electric potential
- 18.3: Calculating electric potential from charge distributions
- 18.4: Electric field and potential at the surface of a conductor
- 18.5: Capacitors
- 18.6: Summary
- 18.7: Thinking about the material
- 18.8: Sample problems and solutions

19: Electric Current

- 19.1: Current
- 19.2: Microscopic model of current
- 19.3: Ohm's Law
- 19.4: Resistors
- 19.5: Alternating voltages and currents
- 19.6: Electrical safety
- 19.7: Summary
- 19.8: Thinking about the material

- 19.9: Sample problems and solutions

20: Electric Circuits

- 20.1: Batteries and Simple Circuits
- 20.2: Kirchhoff's rules
- 20.3: Applying Kirchhoff's rule to model circuits
- 20.4: Measuring current and voltage
- 20.5: Modeling circuits with capacitors
- 20.6: Summary
- 20.7: Thinking about the Material
- 20.8: Sample problems and solutions

21: The Magnetic Force

- 21.1: Magnetic fields
- 21.2: The magnetic force on a moving charge
- 21.3: The magnetic force on a current-carrying wire .
- 21.4: The Torque on a Current-Carrying Loop
- 21.5: The Hall Effect
- 21.6: Applications
- 21.7: Summary
- 21.8: Thinking about the Material
- 21.9: Sample problems and solutions

22: Source of Magnetic Field

- 22.1: The Biot-Savart Law
- 22.2: Force between two current-carrying wires
- 22.3: Ampere's Law
- 22.4: Solenoids and Toroids
- 22.5: Summary
- 22.6: Thinking about the material
- 22.7: Sample problems and solutions

23: Electromagnetic Induction

- 23.1: Faraday's Law
- 23.2: Induction in a Moving Conductor
- 23.3: Back EMF in an electric motor
- 23.4: The induced electric field and eddy currents
- 23.5: Transformers
- 23.6: Maxwell's equations and electromagnetic waves
- 23.7: Summary
- 23.8: Thinking about the material
- 23.9: Sample problems and solutions

24: The Theory of Special Relativity

- 24.1: Introduction- The issue with Maxwell's equations
- 24.2: Einstein's postulates
- 24.3: Time Dilation
- 24.4: Length Contraction
- 24.5: Electric and magnetic fields and Special Relativity
- 24.6: Lorentz transformations and space-time

- 24.7: Relativistic momentum and energy
- 24.8: Closing Remarks
- 24.9: Summary
- 24.10: Thinking about the material
- 24.11: Sample problems and solutions

25: Vectors

- 25.1: Coordinate Systems
- 25.2: Vectors
- 25.3: Vector algebra
- 25.4: Example uses of vectors in physics
- 25.5: Summary
- 25.6: Thinking about the Material
- 25.7: Sample problems and solutions

26: Calculus

- 26.1: Functions of Real Numbers
- 26.2: Derivatives
- 26.3: Anti-derivatives and integrals
- 26.4: Summary
- 26.5: Thinking about the Material
- 26.6: Sample problems and solutions

27: Guidelines for lab related activities

- 27.1: The process of science and the need for scientific writing
- 27.2: Scientific writing
- 27.3: Guide for writing a proposal
- 27.4: Guide for reviewing a proposal
- 27.5: Guide for writing a lab report
- 27.6: Sample proposal (Measuring g using a pendulum)
- 27.7: Sample proposal review (Measuring g using a pendulum)
- 27.8: Sample lab report (Measuring g using a pendulum)
- 27.9: Sample lab report review (Measuring g using a pendulum)

28: The Python Programming Language

- 28.1: A quick intro to programming
- 28.2: Arrays
- 28.3: Plotting
- 28.4: The QExpy python package for experimental physics
- 28.5: Advanced topics
