

## TABLE OF CONTENTS

Licensing

1: What is Physics?

2: The Greek Alphabet

3: Quotations from the Classical Greek

4: Deductive Logic

5: Units

- 5.1: Systems of Units
- 5.2: SI Units
- 5.3: Other Systems of Units
- 5.4: Units as an Error-Checking Technique
- 5.5: Unit Conversions
- 5.6: Currency Units
- 5.7: Odds and Ends

6: Problem-Solving Strategies

7: Density

- 7.1: Density
- 7.2: Specific Gravity
- 7.3: Density Trivia

8: Kinematics in One Dimension

- 8.1: Position
- 8.2: Velocity
- 8.3: Acceleration
- 8.4: Higher Derivatives
- 8.5: Dot Notation
- 8.6: Inverse Relations
- 8.7: Constant Acceleration
- 8.8: Summary
- 8.9: Geometric Interpretations
- 8.10: Projects

9: Vectors

- 9.1: Introduction to Vectors
- 9.2: Vector Arithmetic- Graphical Methods
- 9.3: Vector Arithmetic- Algebraic Methods
- 9.4: Vector Operations

## 10: The Dot Product

- 10.1: Definition
- 10.2: Component Form
- 10.3: Properties
- 10.4: Matrix Formulation

## 11: Kinematics in Two or Three Dimensions

- 11.1: Position, Velocity, Acceleration
- 11.2: Constant Acceleration
- 11.3: Vertical vs. Horizontal Motion
- 11.4: Summary

## 12: Projectile Motion

- 12.1: Introduction to Projectile Motion
- 12.2: Range
- 12.3: Maximum Altitude
- 12.4: Shape of the Projectile Path
- 12.5: Hitting a Target on the Ground
- 12.6: Hitting a Target on a Hill
- 12.7: Exploding Projectiles and Other Considerations
- 12.8: The Monkey and the Hunter Problem
- 12.9: Summary

## 13: Newton's Method

- 13.1: The Method
- 13.2: Example- Square Roots
- 13.3: Projectile Problem

## 14: Mass

## 15: Force

- 15.1: The Four Forces of Nature
- 15.2: Hooke's Law
- 15.3: Weight, Tension and Normal Force

## 16: Newton's Laws of Motion

- 16.1: First Law of Motion
- 16.2: Second Law of Motion
- 16.3: Third Law of Motion

## 17: The Inclined Plane

## 18: Atwood's Machine

## 19: Statics

- 19.1: Mass Suspended by Two Ropes
- 19.2: The Elevator

- 19.3: The Catenary

## 20: Friction

- 20.1: Introduction to Friction
- 20.2: Static Friction
- 20.3: Kinetic Friction
- 20.4: Rolling Friction
- 20.5: The Coefficient of Friction

## 21: Blocks and Pulleys

- 21.1: Horizontal Block and Vertical Block
- 21.2: Inclined Block and Vertical Block

## 22: Resistive Forces in Fluids

- 22.1: Model I  $F \propto v$
- 22.2: Model II-  $F \propto v^2$

## 23: Circular Motion

- 23.1: Introduction to Circular Motion
- 23.2: Centripetal Force
- 23.3: Centrifugal Force
- 23.4: Relations between Circular and Linear Motion
- 23.5: Examples

## 24: Work

- 24.1: Introduction to Work
- 24.2: Case I- Constant force parallel to the direction of motion
- 24.3: Case II- Constant force at an angle to the direction of motion
- 24.4: Case III- Variable force in the direction of motion
- 24.5: Case IV (General Case)- Variable force along any direction
- 24.6: Summary

## 25: Simple Machines

- 25.1: Inclined Plane
- 25.2: Wheel and Axle
- 25.3: Pulley
- 25.4: Lever
- 25.5: Wedge and Screws
- 25.6: Gears

## 26: Energy

- 26.1: Kinetic Energy
- 26.2: Potential Energy
- 26.3: Other Forms of Energy
- 26.4: Conservation of Energy
- 26.5: The Work-Energy Theorem
- 26.6: The Virial Theorem

## 27: Conservative Forces

## 28: Power

- 28.1: Energy Conversion of a Falling Body
- 28.2: Rate of Change of Power
- 28.3: Vector Equation

## 29: Linear Momentum

- 29.1: Conservation of Momentum
- 29.2: Newton's Second Law of Motion

## 30: Impulse

## 31: Collisions

- 31.1: The Coefficient of Restitution
- 31.2: Perfectly Inelastic Collisions
- 31.3: Perfectly Elastic Collisions
- 31.4: Newton's Cradle
- 31.5: Inelastic Collisions
- 31.6: Collisions in Two Dimensions

## 32: The Ballistic Pendulum

## 33: Rockets

- 33.1: The Rocket Equation
- 33.2: Mass Fraction
- 33.3: Staging

## 34: Center of Mass

- 34.1: Discrete Masses
- 34.2: Continuous Bodies

## 35: The Cross Product

- 35.1: Definition and Forms
- 35.2: Properties
- 35.3: Inverse

## 36: Rotational Motion

- 36.1: Translational vs. Rotational Motion
- 36.2: Problems

## 37: Moment of Inertia

- 37.1: Introduction to the Moment of Inertia
- 37.2: Radius of Gyration
- 37.3: Parallel Axis Theorem
- 37.4: Plane Figure Theorem
- 37.5: Routh's Rule

- 37.6: Lees' Rule

## 38: Torque

- 38.1: Introduction to Torque
- 38.2: Rotational Version of Hooke's Law

## 39: Measuring the Moment of Inertia

- 39.1: Torque Method
- 39.2: Pendulum Method

## 40: Newton's Laws of Motion- Rotational Versions

## 41: The Pendulum

- 41.1: The Simple Plane Pendulum
- 41.2: The Spherical Pendulum
- 41.3: The Conical Pendulum
- 41.4: The Torsional Pendulum
- 41.5: The Physical Pendulum
- 41.6: Other Pendulums

## 42: Simple Harmonic Motion

- 42.1: Introduction to Simple Harmonic Motion
- 42.2: Energy
- 42.3: Frequency and Period
- 42.4: The Vertical Spring
- 42.5: Mass on a Spring
- 42.6: More on the Spring Constant

## 43: Rocking Bodies

- 43.1: The Half-Cylinder

## 44: Rolling Bodies

- 44.1: Velocity
- 44.2: Acceleration
- 44.3: Kinetic Energy
- 44.4: The Wheel
- 44.5: Ball Rolling in a Bowl

## 45: Galileo's Law

- 45.1: Introduction to Galileo's Law
- 45.2: Modern Treatment

## 46: The Coriolis Force

- 46.1: Introduction to the Coriolis Force
- 46.2: Examples

## 47: Angular Momentum

- 47.1: Introduction to Angular Momentum
- 47.2: Conservation of Angular Momentum

## 48: Conservation Laws

## 49: The Gyroscope

- 49.1: Precession
- 49.2: Nutation

## 50: Elasticity

- 50.1: Introduction to Elasticity
- 50.2: Longitudinal (Normal) Stress
- 50.3: Transverse (Shear) Stress—Translational
- 50.4: Transverse (Shear) Stress—Torsional
- 50.5: Volume Stress
- 50.6: Elastic Limit
- 50.7: Summary

## 51: Fluid Statics

- 51.1: Archimedes' Principle
- 51.2: Floating Bodies
- 51.3: Pressure
- 51.4: Change in Fluid Pressure with Depth
- 51.5: Pascal's Law

## 52: Fluid Dynamics

- 52.1: Introduction to Fluid Dynamics
- 52.2: The Continuity Equation
- 52.3: Bernoulli's Equation
- 52.4: Torricelli's Theorem
- 52.5: The Siphon
- 52.6: Viscosity
- 52.7: The Reynolds Number
- 52.8: Stokes's Law
- 52.9: Fluid Flow through a Pipe
- 52.10: Gases
- 52.11: Superfluids

## 53: Hydraulics and Pneumatics

- 53.1: Hydraulics- The Hydraulic Press
- 53.2: Pneumatics

## 54: Gravity

- 54.1: Newton's Law of Gravity
- 54.2: Gravitational Potential
- 54.3: The Cavendish Experiment
- 54.4: Helmholtz's Equation

- 54.5: Earth Density Model
- 54.6: Escape Velocity
- 54.7: Gauss's Formulation
- 54.8: General Relativity
- 54.9: Black Holes

## 55: Earth Rotation

- 55.1: Precession
- 55.2: Nutation
- 55.3: Polar Motion
- 55.4: Rotation Rate

## 56: Geodesy

- 56.1: Introduction to Geodesy
- 56.2: Radius of the Earth
- 56.3: The Cosine Formula
- 56.4: Vincenty's Formulæ- Introduction
- 56.5: Vincenty's Formulæ- Direct Problem
- 56.6: Vincenty's Formulæ- Inverse Problem

## 57: Celestial Mechanics

- 57.1: Kepler's Laws
- 57.2: Time
- 57.3: Orbit Reference Frames
- 57.4: Orbital Elements
- 57.5: Right Ascension and Declination
- 57.6: Computing a Position
- 57.7: The Inverse Problem
- 57.8: Corrections to the Two-Body Calculation
- 57.9: Bound and Unbound Orbits
- 57.10: The Vis Viva Equation
- 57.11: Bertrand's Theorem
- 57.12: Differential Equation for an Orbit
- 57.13: Lagrange Points
- 57.14: The Rings of Saturn
- 57.15: Hyperbolic Orbits
- 57.16: Parabolic Orbits

## 58: Astrodynamics

- 58.1: Circular Orbits
- 58.2: Geosynchronous Orbits
- 58.3: Elliptical Orbits
- 58.4: The Hohmann Transfer
- 58.5: Gravity Assist Maneuvers
- 58.6: The International Cometary Explorer

## 59: Partial Derivatives

- 59.1: First Partial Derivatives
- 59.2: Higher-Order Partial Derivatives

## 60: Lagrangian Mechanics

- 60.1: Examples

## 61: Hamiltonian Mechanics

- 61.1: Examples

## 62: Special Relativity

- 62.1: Postulates
- 62.2: Time Dilation
- 62.3: Length Contraction
- 62.4: An Example
- 62.5: Momentum
- 62.6: Addition of Velocities
- 62.7: Energy

## 63: Quantum Mechanics

- 63.1: Review of Newtonian Mechanics
- 63.2: Quantum Mechanics
- 63.3: Example- Simple Harmonic Oscillator
- 63.4: The Heisenberg Uncertainty Principle

## 64: The Standard Model

- 64.1: Matter
- 64.2: Antimatter
- 64.3: Forces
- 64.4: The Higgs Boson

## 65: Further Reading

## 66: Appendices

- 66.1: Greek Alphabet
- 66.2: Trigonometry
- 66.3: Hyperbolic Trigonometry
- 66.4: Useful Series
- 66.5: Table of Derivatives
- 66.6: Table of Integrals
- 66.7: Mathematical Subtleties
- 66.8: SI Units
- 66.9: Gaussian Units
- 66.10: British Engineering Units
- 66.11: Units of Physical Quantities
- 66.12: Physical Constants
- 66.13: Astronomical Data
- 66.14: Unit Conversion Tables
- 66.15: Angular Measure
- 66.16: Vector Arithmetic
- 66.17: Matrix Properties
- 66.18: Newton's Laws of Motion (Original)
- 66.19: The Simple Plane Pendulum- Exact Solution

- [66.20: Motion of a Falling Body](#)
- [66.21: Table of Viscosities](#)
- [66.22: Calculator Programs](#)
- [66.23: Round-Number Handbook of Physics](#)
- [66.24: Short Glossary of Particle Physics](#)
- [66.25: Fundamental Physical Constants — Extensive Listing](#)
- [66.26: Periodic Table of the Elements](#)
