A

A Brief History of Nuclear Physics

17.2: A Brief History of Nuclear Physics

A New Paradigm

15.7: A New Paradigm

abbreviated action

4.13: End of Chapter Key Terms

absolute asymmetric synthesis

3.2.8: Isotopes

absolute value

2.2.2: Negative Numbers

acceleration

9.3.5: Average Acceleration

9.3.6: Uniform Acceleration

9.3.8: Acceleration Due to Gravity

9.3.10: Velocity vs. Time Graphs

9.4.2: Projectile Motion for an Object Launched at an Angle

9.5: End of Chapter Activity

9.6: End of Chapter Key Terms

Acceleration due to Gravity

9.3.8: Acceleration Due to Gravity

accuracy

2.6: Accuracy and Significant Figures

Accuracy and significant figures

2.6: Accuracy and Significant Figures

acid

7.7: Brønsted-Lowry Acids and Bases

acid base

7.10: Acid-Base Properties of Salt Solutions

acids

7.1: Introduction and Learning Objectives

7.6: Arrhenius Acids and Bases

7.8: Introduction to Lewis Acids and Bases

7.9: Lewis Acids and Bases

7.11: Concept of Strong and Weak Acids and Bases

7.12: Relative Strengths of Acids and Bases

7.13: End of Chapter Activity

7.14: End of Chapter Key Terms

activity

3.5: End of Chapter Activity

4.12: End of Chapter Activity

6.9: End of Chapter Activity

9.5: End of Chapter Activity

acute angle

2.2.11: Angles

Adding

9.2.4: Vector Addition

adding and subtracting decimals

2.2.3: Decimals

adding negative numbers

2.2.2: Negative Numbers

addition

2.2.1: Order of Operations

9.2.5: Graphical Methods of Vector Addition

AI

6.9: End of Chapter Activity

8.9: End of Chapter Activity

9.5: End of Chapter Activity

10.8: End of Chapter Activity

11.6: End of Chapter Activity

12.6: End of Chapter Activity

14.9: End of Chapter Activity

15.8: End of Chapter Activity

16.3: End of Chapter Activity

ammeters

11.4.6: Ammeters and Voltmeters

Ammeters and Voltmeters

11.4.6: Ammeters and Voltmeters

An Alternate View of Electromagnetic energy

15.6: An Alternate View of Electromagnetic Energy

analysis

2.8.9: Dimensional Analysis

Anatomy of an Oscillation

13.2.1: Anatomy of an Oscillation

angle

2.2.11: Angles

9.4.2: Projectile Motion for an Object Launched at an Angle

angles in triangles

2.2.11: Angles

anion

3.2.9: The Importance of Ions to a Chemist

applications

8.7.12: Applications of Thermodynamics- Heat Pumps and Refrigerators

approximation

2.6: Accuracy and Significant Figures

area

2.2.13: Area of Polygons and Circles

2.2.16: Converting Units of Area

2.8.6: Converting Units of Area

area of regular polygons

2.2.18: Area of Regular Polygons

Arrhenius acid

7.6: Arrhenius Acids and Bases

Arrhenius acids and bases

7.6: Arrhenius Acids and Bases

Arrhenius base

7.6: Arrhenius Acids and Bases

astronomy

15.5.1: Color and Astronomy

atom

3.2.4: The Structure of the Atom

15.6.1: Photoelectric Effect

atomic

3.2.1: Basic Atomic Theory

3.2.7: Atomic Mass and Atomic Number

8.3: Thermochemical Equations

atomic mass

3.2.7: Atomic Mass and Atomic Number

3.2.8: Isotopes

atomic model

17.2: A Brief History of Nuclear Physics

atomic number

3.2.7: Atomic Mass and Atomic Number

atomic structure

3.2.5: PhET- Rutherford Scattering

atomic theory

3.2.2: Lecture 1 - Atomic Theory

3.5: End of Chapter Activity

3.6: End of Chapter Key Terms

atoms

3.2.E: Atoms and the Periodic Table (Exercises)

3.3: Electronic Structure of Atoms (Electron Configurations)

8.7.3: The Ideal Gas Law

8.7.4: Heat

atoms \

3.2.7: Atomic Mass and Atomic Number

Atoms and the Periodic Table

3.2.E: Atoms and the Periodic Table (Exercises)

aufbau principle

3.3: Electronic Structure of Atoms (Electron Configurations)

average

9.3.3: Average Velocity

9.3.5: Average Acceleration

Average Acceleration

9.3.5: Average Acceleration

Average Velocity

9.3.3: Average Velocity

Axial

9.2.3: Resolving Vectors into Components

axial position

3.4: Molecular Structure and Polarity

B

balance

8.3.2: Environment- Gas

balanced chemical equation

5.9: Mole-Mass and Mass-Mass Calculations

bar graph

2.9.2: Other Types of Graphs

bar graphs

2.9.1: Graphing Data

bases

7.1: Introduction and Learning Objectives

7.6: Arrhenius Acids and Bases

7.7: Brønsted-Lowry Acids and Bases

7.8: Introduction to Lewis Acids and Bases

7.9: Lewis Acids and Bases

7.11: Concept of Strong and Weak Acids and Bases

7.12: Relative Strengths of Acids and Bases

7.13: End of Chapter Activity

7.14: End of Chapter Key Terms

Basic atomic theory

3.2.1: Basic Atomic Theory

basic concept

12.1: Introduction and Learning Objectives

basic concepts of energy

8.1: Introduction and Learning Objectives

basics

2.2.7: Percents Part 1

8.2.1: Practice Problems- The Basics of Energy

battery

11.4.7: Chemical and Solar Cells

bending light

16.2.3: Total Internal Reflection

bending sun ray's

16.2.2: Refraction

biology

8.3.1: Biology- Weight of Food and Energy Production

Bloom's Taxonomy

6.9: End of Chapter Activity

7.13: End of Chapter Activity

8.9: End of Chapter Activity

9.5: End of Chapter Activity

10.8: End of Chapter Activity

11.6: End of Chapter Activity

12.6: End of Chapter Activity

14.9: End of Chapter Activity

15.8: End of Chapter Activity

16.3: End of Chapter Activity

Boiling

4.6: Phase Transitions

Boltzmann's constant

8.7.3: The Ideal Gas Law

bond

6.10: End of Chapter Key Terms

bond angle

3.4: Molecular Structure and Polarity

bond dipole moment

3.4: Molecular Structure and Polarity

bond distance

3.4: Molecular Structure and Polarity

C

calculate

2.2.14: Composite Figures

5.2: Density

8.7.13: Entropy and the Second Law of Thermodynamics- Disorder and the Unavailability of Energy

11.4.3: Ohm's Law- Resistance and Simple Circuits

calculating

8.4.4: Power

calculation

2.1: Introduction and Learning Objectives

3.2.8: Isotopes

calculations

5.10: Molarity

calculator

2.2.5: Formulas

calculator skills

2.4: Calculator skills

Capacitors

11.5.5: Capacitors

capacity

8.7.6: Temperature Change and Heat Capacity

Carnot

8.7.11: Carnot's Perfect Heat Engine- The Second Law of Thermodynamics Restated

Carnot engine

8.7.11: Carnot's Perfect Heat Engine- The Second Law of Thermodynamics Restated

catalyst

6.8: Factors Affecting Reaction Rates

cathode ray tube

3.2.6: Subatomic Particles - Electrons, Protons, and Neutrons

cation

3.2.9: The Importance of Ions to a Chemist

cells

11.4.7: Chemical and Solar Cells

change

8.7.6: Temperature Change and Heat Capacity

9.3.2: Time

changes

6.2: Physical and Chemical Changes

Chapter 9 objectives

9.1: Chapter Objectives

characteristics

4.11: Exercises

13.2.2: Characteristics of Oscillations

Characteristics of Oscillations

13.2.2: Characteristics of Oscillations

charge

11.3.1: Electric Charge and Electric Force

11.3.2: Coulomb's Law

11.3.3: Electric Fields

11.3.6: Electric Potential and Potential Energy

11.5.5: Capacitors

11.E: Electricity (Exercise)

charged

11.3.4: Electric Field Lines

chemical

6.3: Evidence of a Chemical Reaction

6.5: Writing and Balancing Chemical Equations

6.6: Types of Chemical Reactions

6.7: Real-World Examples of Chemical Reactions and Their Types

11.4.7: Chemical and Solar Cells

Chemical and Solar Cells

11.4.7: Chemical and Solar Cells

chemical change

6.1: Introduction and Learning Objectives

6.2: Physical and Chemical Changes

chemical energy

8.8: Conservation of Energy

chemical equation

5.8: Mole Calculations in Chemical Reactions

5.9: Mole-Mass and Mass-Mass Calculations

chemical reactions

5.8: Mole Calculations in Chemical Reactions

5.12: Other Units for Solution Concentrations
7.1: Introduction and Learning Objectives
7.2: The Dissolution Process
7.4: Fundamentals of Solutions and Solubility
7.10: Acid-Base Properties of Salt Solutions
7.13: End of Chapter Activity
7.14: End of Chapter Key Terms

sonar

14.8: Ultrasound

sonic boom

14.7: Doppler Effect and Sonic Booms

sonic booms

14.7: Doppler Effect and Sonic Booms

sound

14.2: Prelude to Sound
14.3: Sound Waves
14.5: Intensity and Loudness of Sound
14.6: Frequency and Pitch of Sound
14.10: End of Chapter Key Terms
15.2.1: Electromagnetic Wave Properties

sound waves

14.3: Sound Waves
14.10: End of Chapter Key Terms

sounds

14.4: Speed of Sound
14.8: Ultrasound

spectrum

15.3: Electromagnetic Spectrum

speed

9.2: Introduction- Fundamentals of Motion- Scientific Overview
9.3.3: Average Velocity
9.3.4: Instantaneous Velocity
9.3.5: Average Acceleration
9.3.6: Uniform Acceleration
9.3.7: Displacement During Uniform Acceleration
9.3.8: Acceleration Due to Gravity
9.3.10: Velocity vs. Time Graphs
9.4.2: Projectile Motion for an Object Launched at an Angle
9.6: End of Chapter Key Terms
13.2.1: Anatomy of an Oscillation
13.3.2: Longitudinal Waves
13.3.3: Wave Speeds in Materials
14.4: Speed of Sound
14.10: End of Chapter Key Terms

Speed of Sound

14.4: Speed of Sound

sphere

2.2.15: Surface Area of Common Solids

spring

8.4.1.1: Spring Potential Energy

spring force

13.2.1: Anatomy of an Oscillation

Spring potential energy

8.4.1.1: Spring Potential Energy

springs

8.4.1: Potential Energy- Gravity and Springs

squares

2.2.13: Area of Polygons and Circles

standard

2.2.22: Standard Deviation

standard deviation

2.2.22: Standard Deviation

stars

15.5.1: Color and Astronomy

static electricity

11.2: Introduction to Electricity

Statistics

8.7.14: Statistical Interpretation of Entropy and the Second Law of Thermodynamics- The Underlying Explanation

stock solution

5.4: Concentration of Solutions

straight angle

2.2.11: Angles

strengths

7.12: Relative Strengths of Acids and Bases

structure

3.2.4: The Structure of the Atom

Subatomic particles

3.2.6: Subatomic Particles - Electrons, Protons, and Neutrons

substance

5.6: Formula Mass and the Mole Concept
7.3: Electrolytes
8.5: Chemistry in Physics

substances

4.3: Pure Substances and Mixtures

subtracting negative numbers

2.2.2: Negative Numbers

subtractions

2.2.1: Order of Operations

sugars

8.3.3: Foods- Energy from Fats and Sugars

supersaturated

7.5: Solubility

surface area

2.2.15: Surface Area of Common Solids

sweet drinks

5.3: Lab 2 Density of sweet drinks

system

2.8.2: The US Measurement System
2.8.3: Units of Measure

systems

2.8.1: Systems of Measurement

systems of measurements

2.8.1: Systems of Measurement

T

tables

2.9.1: Graphing Data

teaching

1.5: Teaching the Scientific Method
3.1: Introduction and Learning Objectives
9.2: Introduction- Fundamentals of Motion- Scientific Overview

teaching motion

9.1: Chapter Objectives

teaching the scientific method

1.5: Teaching the Scientific Method

Temperature

2.2.5: Formulas
8.7.1: Introduction to Thermal Physics
8.7.2: Temperature
8.7.6: Temperature Change and Heat Capacity

temperature change

8.7.6: Temperature Change and Heat Capacity
8.7.E: Thermal Physics (Exercises)

Temperature Change and Heat Capacity

8.7.6: Temperature Change and Heat Capacity

temperature formulas

2.2.5: Formulas

temperature scales

8.7.2: Temperature

tension

10.6: Normal Force and Tension

tension force

10.6: Normal Force and Tension

terminology

17.3: Fundamental Concepts

terms

5.13: End of Chapter Key Terms
6.10: End of Chapter Key Terms

Tetrahedral

3.4: Molecular Structure and Polarity

the basics of energy

8.2: The Basics of Energy
8.2.1: Practice Problems- The Basics of Energy

The dissolution process

7.2: The Dissolution Process

The first law of Thermodynamics

8.7.8: The First Law of Thermodynamics

The first law of Thermodynamics and heat Engine processes

8.7.9: The First Law of Thermodynamics and Heat Engine Processes

The Ideal Gas Law

8.7.3: The Ideal Gas Law

The importance of Ions to a Chemist

3.2.9: The Importance of Ions to a Chemist

The metric system

2.8.3: Units of Measure

The structure of the atom

3.2.4: The Structure of the Atom

theorem

8.6: Kinetic Energy and the Work-Energy Theorem

theory

3.2.1: Basic Atomic Theory

7.8: Introduction to Lewis Acids and Bases

thermal

8.7.E: Thermal Physics (Exercises)

thermal energy

8.8: Conservation of Energy

thermal hazards

11.5.6: Electric Hazards and the Human Body

thermal physics

8.7.1: Introduction to Thermal Physics

Thermal Physics (Exercises)

8.7.E: Thermal Physics (Exercises)

thermochemical equation

8.3: Thermochemical Equations

thermodynamics

8.7.8: The First Law of Thermodynamics

8.7.9: The First Law of Thermodynamics and Heat Engine Processes

8.7.11: Carnot's Perfect Heat Engine- The Second Law of Thermodynamics Restated

8.7.12: Applications of Thermodynamics- Heat Pumps and Refrigerators

8.7.14: Statistical Interpretation of Entropy and the Second Law of Thermodynamics- The Underlying Explanation

time

2.8.5: Other Conversions

9.3.2: Time

9.3.4: Instantaneous Velocity

9.3.9: Position vs. Time Graphs

9.3.10: Velocity vs. Time Graphs

tolerance

2.2.9: Percents Part 2 and Error Analysis

tools

2.8: Measurement

Total Internal Reflection

16.2.3: Total Internal Reflection

total surface area

2.2.15: Surface Area of Common Solids

transfer

8.7.4: Heat

8.7.5: Heat Transfer Methods

8.7.6: Temperature Change and Heat Capacity

transformation of energy

8.4.2: Forms of Energy

Transformers

12.5.7: Transformers

transverse waves

13.3.1: Transverse Waves

13.4: End of Chapter Activity

travel

16.2.3: Total Internal Reflection

triangles

2.2.6: Perimeter and Circumference

2.2.12: Triangles

trigonal bipyramidal

3.4: Molecular Structure and Polarity

Trigonal Planar

3.4: Molecular Structure and Polarity

two and three dimension

9.1: Chapter Objectives

two dimensions

9.2.4: Vector Addition

9.2.5: Graphical Methods of Vector Addition

two objects

8.7.6: Temperature Change and Heat Capacity

types

6.6: Types of Chemical Reactions

Types of Chemical Reactions

6.6: Types of Chemical Reactions

U

U.S system

2.8.1: Systems of Measurement

Ultrasound

14.8: Ultrasound

uniform

9.3.6: Uniform Acceleration

uniform acceleration

9.3.6: Uniform Acceleration

9.3.7: Displacement During Uniform Acceleration

units

2.1: Introduction and Learning Objectives

2.2.8: Ratios, Rates, Proportions

2.2.16: Converting Units of Area

2.8: Measurement

2.8.3: Units of Measure

2.8.6: Converting Units of Area

2.8.7: Converting Units of Volume

2.8.9: Dimensional Analysis

5.12: Other Units for Solution Concentrations

17.3: Fundamental Concepts

units of measure

2.8.3: Units of Measure

unsaturated

7.5: Solubility

US measurement system

2.8.2: The US Measurement System

US system

2.8.6: Converting Units of Area

using the scientific calculator

2.4: Calculator skills

using the scientific method

1.3: Using the Scientific Method

V

Valence Electrons

3.3: Electronic Structure of Atoms (Electron Configurations)

valence shell

3.3: Electronic Structure of Atoms (Electron Configurations)

valence shell electron pair repulsion

theory

3.4: Molecular Structure and Polarity

value

2.2.1: Order of Operations

van der Waals force

4.9: Intermolecular Forces

vaporization

4.7: Phase Transitions

variable

2.2.5: Formulas

2.2.8: Ratios, Rates, Proportions

vector

9.2.5: Graphical Methods of Vector Addition

9.3.1: Position and Displacement

Vector Addition

9.2.4: Vector Addition

vectors

9.2.2: Vectors, Scalars, and Coordinate Systems

9.2.3: Resolving Vectors into Components

9.2.4: Vector Addition

11.3.4: Electric Field Lines

Vectors, scalars, and Coordinate Systems

9.2.2: Vectors, Scalars, and Coordinate Systems

velocity

5: Density Mole and Molarity

8.4.5: Energy and Momentum

9.3.3: Average Velocity

9.3.4: Instantaneous Velocity

9.3.9: Position vs. Time Graphs

9.3.10: Velocity vs. Time Graphs

9.6: End of Chapter Key Terms

13.3.1: Transverse Waves

Velocity vs. Time Graphs

9.3.10: Velocity vs. Time Graphs

vision

15.5: Light, Color and Perception

voltage

11.4.3: Ohm's Law- Resistance and Simple Circuits

12.5.6: Induced Voltage and Magnetic Flux

Voltage (Electric Potential)

11.4.1: Voltage (Electric Potential)

voltmeters
