

CHAPTER OVERVIEW

11: Conservative two-body Central Forces

- 11.1: Introduction to Conservative two-body Central Forces
- 11.2: Equivalent one-body Representation for two-body motion
- 11.3: Angular Momentum
- 11.4: Equations of Motion
- 11.5: Differential Orbit Equation
- 11.6: Hamiltonian
- 11.7: General Features of the Orbit Solutions
- 11.8: Inverse-square, two-body, central force
- 11.9: Isotropic, linear, two-body, central force
- 11.10: Closed-orbit Stability
- 11.11: The Three-Body Problem
- 11.12: Two-body Scattering
- 11.13: Two-body kinematics
- 11.E: Conservative two-body Central Forces (Exercises)
- 11.S: Conservative two-body Central Forces (Summary)

Thumbnail: Two bodies with a major difference in mass orbiting a common barycenter internal to one body (similar to the Earth–Moon system). (Public Domain; Zhatt).
