

CHAPTER OVERVIEW

6: Lagrangian Dynamics

- 6.1: Introduction to Lagrangian Dynamics
- 6.2: Newtonian plausibility argument for Lagrangian mechanics
- 6.3: Lagrange Equations from d'Alembert's Principle
- 6.4: Lagrange equations from Hamilton's Principle
- 6.5: Constrained Systems
- 6.6: Applying the Euler-Lagrange equations to classical mechanics
- 6.7: Applications to unconstrained systems
- 6.8: Applications to systems involving holonomic constraints
- 6.9: Applications involving Non-holonomic Constraints
- 6.10: Velocity-dependent Lorentz force
- 6.11: Time-dependent forces
- 6.12: Impulsive Forces
- 6.13: The Lagrangian versus the Newtonian approach to classical mechanics
- 6.E: Lagrangian Dynamics (Exercises)
- 6.S: Lagrangian Dynamics (Summary)
