

TABLE OF CONTENTS

Preface

Licensing

1: Probability Systems

- 1.1: Likelihood
- 1.2: Probability Systems
- 1.3: Interpretations
- 1.4: Problems on Probability Systems

2: Minterm Analysis

- 2.1: Minterms
- 2.2: Minterms and MATLAB Calculations
- 2.3: Problems on Minterm Analysis

3: Conditional Probability

- 3.1: Conditional Probability
- 3.2: Problems on Conditional Probability

4: Independence of Events

- 4.1: Independence of Events
- 4.2: MATLAB and Independent Classes
- 4.3: Composite Trials
- 4.4: Problems on Independence of Events

5: Conditional Independence

- 5.1: Conditional Independence
- 5.2: Patterns of Probable Inference
- 5.3: Problems on Conditional Independence

6: Random Variables and Probabilities

- 6.1: Random Variables and Probabilities
- 6.2: Problems on Random Variables and Probabilities

7: Distribution and Density Functions

- 7.1: Distribution and Density Functions
- 7.2: Distribution Approximations
- 7.3: Problems on Distribution and Density Functions

8: Random Vectors and Joint Distributions

- 8.1: Random Vectors and Joint Distributions
- 8.2: Random Vectors and MATLAB
- 8.3: Problems on Random Vectors and Joint Distributions

9: Independent Classes of Random Variables

- 9.1: Independent Classes of Random Variables
- 9.2: Problems on Independent Classes of Random Variables

10: Functions of Random Variables

- 10.1: Functions of a Random Variable
- 10.2: Function of Random Vectors
- 10.3: The Quantile Function
- 10.4: Problems on Functions of Random Variables

11: Mathematical Expectation

- 11.1: Mathematical Expectation- Simple Random Variables
- 11.2: Mathematical Expectation and General Random Variables
- 11.3: Problems on Mathematical Expectation

12: Variance, Covariance, and Linear Regression

- 12.1: Variance
- 12.2: Covariance and the Correlation Coefficient
- 12.3: Linear Regression
- 12.4: Problems on Variance, Covariance, Linear Regression

13: Transform Methods

- 13.1: Transform Methods
- 13.2: Convergence and the Central Limit Theorem
- 13.3: Simple Random Samples and Statistics
- 13.4: Problems on Transform Methods

14: Conditional Expectation, Regression

- 14.1: Conditional Expectation, Regression
- 14.2: Problems on Conditional Expectation, Regression

15: Random Selection

- 15.1: Random Selection
- 15.2: Some Random Selection Problems
- 15.3: Problems on Random Selection

16: Conditional Independence, Given a Random Vector

- 16.1: Conditional Independence, Given a Random Vector
- 16.2: Elements of Markov Sequences
- 16.3: Problems on Conditional Independence, Given a Random Vector

17: Appendices

- 17.1: Appendix A to Applied Probability- Directory of m-functions and m-procedures
- 17.2: Appendix B to Applied Probability- some mathematical aids
- 17.3: Appendix C- Data on some common distributions
- 17.4: Appendix D to Applied Probability- The standard normal distribution
- 17.5: Appendix E to Applied Probability - Properties of Mathematical Expectation

- [17.6: Appendix F to Applied Probability- Properties of conditional expectation, given a random vector](#)
- [17.7: Appendix G to Applied Probability- Properties of conditional independence, given a random vector](#)
- [17.8: Matlab files for "Problems" in "Applied Probability"](#)
