

Index

A

alternative hypothesis

- 9.2: Null and Alternative Hypotheses
- 9.4: Distribution Needed for Hypothesis Testing

average

- 1.2: Definitions of Statistics, Probability, and Key Terms

B

balanced design

- 12.4: The F Distribution and the F-Ratio

bar graph

- 1.3: Data, Sampling, and Variation in Data and Sampling
- 2.2: Display Data

Bernoulli trial

- 4.3: Binomial Distribution

binomial distribution

- 8.4: A Confidence Interval for A Population Proportion
- 9.5: Full Hypothesis Test Examples

binomial probability distribution

- 4.3: Binomial Distribution

bivariate

- 13.2: The Correlation Coefficient r

blinding

- 1.5: Experimental Design and Ethics

C

categorical variables

- 1.2: Definitions of Statistics, Probability, and Key Terms

central limit theorem

- 7.1: Introduction to the Central Limit Theorem

coefficient of determination

- 13.5: The Regression Equation

coefficient of multiple determination

- 13.5: The Regression Equation

Cohen's d

- 10.3: Cohen's Standards for Small, Medium, and Large Effect Sizes

complement

- 3.2: Probability Terminology

conditional probability

- 3.2: Probability Terminology

Confidence Interval

- 8.1: Introduction to Confidence Intervals
- 8.2: A Confidence Interval for a Population Standard Deviation Known
- 8.3: A Confidence Interval for a Population Standard Deviation Unknown
- 13.7: Predicting with a Regression Equation

confidence intervals

- 8.4: A Confidence Interval for A Population Proportion
- 9.1: Introduction to Hypothesis Testing

Confidence Level

- 8.2: A Confidence Interval for a Population Standard Deviation Known

contingency table

- 3.5: Contingency Tables and Probability Trees
- 11.5: Test of Independence

continuous

- 1.3: Data, Sampling, and Variation in Data and Sampling

control group

- 1.5: Experimental Design and Ethics

correlation coefficient

- 13.2: The Correlation Coefficient r

critical values

- 9.4: Distribution Needed for Hypothesis Testing

cumulative distribution function (CDF)

- 5.4: The Exponential Distribution

cumulative relative frequency

- 1.4: Levels of Measurement

D

data

- 1.2: Definitions of Statistics, Probability, and Key Terms

degrees of freedom

- 8.3: A Confidence Interval for a Population Standard Deviation Unknown

degrees of freedom (df)

- 10.2: Comparing Two Independent Population Means - Unequal Variances

dependent variable

- 1.5: Experimental Design and Ethics

descriptive statistics

- 1.2: Definitions of Statistics, Probability, and Key Terms

discrete

- 1.3: Data, Sampling, and Variation in Data and Sampling

E

Empirical Rule

- 6.2: The Standard Normal Distribution
- 8.1: Introduction to Confidence Intervals

equal standard deviations

- 12.3: One-Way ANOVA

equally likely

- 3.2: Probability Terminology

error bound mean

- 8.2: A Confidence Interval for a Population Standard Deviation Known

estimate of the error variance

- 13.5: The Regression Equation

event

- 3.2: Probability Terminology

expected mean

- 13.7: Predicting with a Regression Equation

expected value

- 13.7: Predicting with a Regression Equation

expected values

- 11.4: Goodness-of-Fit Test

experiment

- 3.2: Probability Terminology

experimental unit

- 1.5: Experimental Design and Ethics

explanatory variable

- 1.5: Experimental Design and Ethics

exponential distribution

- 5.4: The Exponential Distribution

F

F distribution

- 12.4: The F Distribution and the F-Ratio

F ratio

- 12.4: The F Distribution and the F-Ratio

fair

- 3.2: Probability Terminology

finite population correction factor

- 7.5: Finite Population Correction Factor

first moment

- 2.7: Skewness and the Mean, Median, and Mode

first quartile

- 2.3: Measures of the Location of the Data

frequency

- 1.4: Levels of Measurement
- 2.2: Display Data

G

geometric distribution

- 4.4: Geometric Distribution

H

histogram

- 2.2: Display Data

Hypergeometric Distribution

- 4.2: Hypergeometric Distribution

hypergeometric experiment

- 4.5: Poisson Distribution

hypotheses

- 9.2: Null and Alternative Hypotheses

hypothesis test

- 9.5: Full Hypothesis Test Examples

hypothesis testing

- 9.1: Introduction to Hypothesis Testing

I

independent

- 3.3: Independent and Mutually Exclusive Events
- 3.4: Two Basic Rules of Probability

independent groups

- 10.0: Introduction

independent variable

- 1.5: Experimental Design and Ethics

inferential statistics

- 1.2: Definitions of Statistics, Probability, and Key Terms
- 8.1: Introduction to Confidence Intervals

Interquartile Range

- 2.3: Measures of the Location of the Data

interval scale

- 1.4: Levels of Measurement

L

Law of Large Numbers

- 3.2: Probability Terminology
- 7.3: Using the Central Limit Theorem

level of measurement

- 1.4: Levels of Measurement

line graph

- 2.2: Display Data

lurking variables

- 1.5: Experimental Design and Ethics

M

matched pairs

10.0: Introduction

mean

1.2: Definitions of Statistics, Probability, and Key Terms

2.4: Measures of the Center of the Data

mean square

12.4: The F Distribution and the F-Ratio

median

2.3: Measures of the Location of the Data

2.4: Measures of the Center of the Data

mode

2.4: Measures of the Center of the Data

multiple correlation coefficient

13.5: The Regression Equation

multiplication rule

3.4: Two Basic Rules of Probability

Multivariate

13.2: The Correlation Coefficient r

Mutually Exclusive

3.3: Independent and Mutually Exclusive Events

3.4: Two Basic Rules of Probability

N

Nominal Scale

1.4: Levels of Measurement

Normal Distribution

8.3: A Confidence Interval for a Population Standard Deviation Unknown

9.4: Distribution Needed for Hypothesis Testing

Null Hypothesis

9.2: Null and Alternative Hypotheses

9.4: Distribution Needed for Hypothesis Testing

Numerical Variables

1.2: Definitions of Statistics, Probability, and Key Terms

O

Observed Values

11.4: Goodness-of-Fit Test

Ordinal Scale

1.4: Levels of Measurement

Outcome

3.2: Probability Terminology

Outlier

2.2: Display Data

2.3: Measures of the Location of the Data

P

Paired Data Set

2.2: Display Data

Parameter

1.2: Definitions of Statistics, Probability, and Key Terms

8.1: Introduction to Confidence Intervals

Pareto Chart

1.3: Data, Sampling, and Variation in Data and Sampling

Pearson

1.2: Definitions of Statistics, Probability, and Key Terms

Percentage Impact

13.6: Interpretation of Regression Coefficients-Elasticity and Logarithmic Transformation

Percentiles

2.3: Measures of the Location of the Data

Pie Chart

1.3: Data, Sampling, and Variation in Data and Sampling

Placebo

1.5: Experimental Design and Ethics

Point Estimate

8.1: Introduction to Confidence Intervals

Poisson Probability Distribution

4.5: Poisson Distribution

Population

1.2: Definitions of Statistics, Probability, and Key Terms

1.3: Data, Sampling, and Variation in Data and Sampling

Population Variance

11.3: Test of a Single Variance

Power of the Test

9.3: Outcomes and the Type I and Type II Errors

Prediction Interval

13.7: Predicting with a Regression Equation

Preset or Preconceived b_0

9.4: Distribution Needed for Hypothesis Testing

Probability

1.2: Definitions of Statistics, Probability, and Key Terms

3.2: Probability Terminology

Probability Density Function

4.1: Introduction

5.2: Properties of Continuous Probability Density Functions

Probability Distribution Function

4.1: Introduction

Proportion

1.2: Definitions of Statistics, Probability, and Key Terms

Q

Qualitative Data

1.3: Data, Sampling, and Variation in Data and Sampling

Quantitative Continuous Data

1.3: Data, Sampling, and Variation in Data and Sampling

Quantitative Data

1.3: Data, Sampling, and Variation in Data and Sampling

Quantitative Discrete Data

1.3: Data, Sampling, and Variation in Data and Sampling

Quartiles

2.3: Measures of the Location of the Data

R

Random Assignment

1.5: Experimental Design and Ethics

Random Variable

4.2: Hypergeometric Distribution

10.2: Comparing Two Independent Population Means - Unequal Variances

10.6: Two Population Means with Known Standard Deviations

Ratio Scale

1.4: Levels of Measurement

Regression Equation

13.5: The Regression Equation

Relative Frequency

1.4: Levels of Measurement

2.2: Display Data

Replacement

3.3: Independent and Mutually Exclusive Events

Representative Sample

1.2: Definitions of Statistics, Probability, and Key Terms

Response Variable

1.5: Experimental Design and Ethics

S

Sample

1.2: Definitions of Statistics, Probability, and Key Terms

Sample Space

3.2: Probability Terminology

3.4: Two Basic Rules of Probability

3.5: Contingency Tables and Probability Trees

Samples

1.3: Data, Sampling, and Variation in Data and Sampling

Sampling

1.2: Definitions of Statistics, Probability, and Key Terms

Second Moment

2.7: Skewness and the Mean, Median, and Mode

Significance Level

9.4: Distribution Needed for Hypothesis Testing

Skew

2.7: Skewness and the Mean, Median, and Mode

Standard Deviation

2.8: Measures of the Spread of the Data

8.3: A Confidence Interval for a Population Standard Deviation Unknown

9.4: Distribution Needed for Hypothesis Testing

Standard Error

10.2: Comparing Two Independent Population Means - Unequal Variances

Standard Error of the Estimate

13.5: The Regression Equation

Standard Normal Distribution

6.2: The Standard Normal Distribution

Standardizing Formula

6.3: Using the Normal Distribution

Statistic

1.2: Definitions of Statistics, Probability, and Key Terms

Statistics

1.2: Definitions of Statistics, Probability, and Key Terms

Stemplots

2.2: Display Data

Sum of Squared Errors (SSE)

13.5: The Regression Equation

Sum of Squares

12.4: The F Distribution and the F-Ratio

T

Test for Homogeneity

11.6: Test for Homogeneity

Test of a Single Variance

11.3: Test of a Single Variance

Test of Independence

11.5: Test of Independence
