

Index

A

Adding probabilities
1.3: Probability
analysis of covariance
5.4: Analysis of Covariance
analysis of variance
4.7: One-way Anova
ancova
5.4: Analysis of Covariance
ANOVA
4.9: Nested Anova

B

Bartlett's test
4.5: Homoscedasticity and Heteroscedasticity
Bayesian statistics
1.4: Basic Concepts of Hypothesis Testing
Bonferroni correction
6.1: Multiple Comparisons

C

causation
5.1: Linear Regression and Correlation
Cochran–Mantel–Haenszel
2.10: Cochran-Mantel-Haenszel Test
confounding variable
1.5: Confounding Variables
correlation
5.1: Linear Regression and Correlation
Covariance
5.4: Analysis of Covariance
Curvilinear Regression
5.3: Curvilinear (Nonlinear) Regression

F

False Negatives
1.4: Basic Concepts of Hypothesis Testing
False Positives
1.4: Basic Concepts of Hypothesis Testing
Fisher's Exact Test
2.7: Fisher's Exact Test

G

G–Test
2.4: G–Test of Goodness-of-Fit

H

Heteroscedasticity
4.5: Homoscedasticity and Heteroscedasticity
Homoscedasticity
4.5: Homoscedasticity and Heteroscedasticity

K

Kruskal–Wallis Test
4.8: Kruskal–Wallis Test

L

Likert items
1.2: Types of Biological Variables
LINEAR REGRESSION MODEL
5.1: Linear Regression and Correlation
logistic regression
5.7: Multiple Logistic Regression

M

McNemar's test
2.7: Fisher's Exact Test

Measurement variables
1.2: Types of Biological Variables
Multiple Regression
5.5: Multiple Regression
Multiplying probabilities
1.3: Probability

N

nested anova
4.9: Nested Anova
Nominal variables
1.2: Types of Biological Variables
nonlinear regression
5.3: Curvilinear (Nonlinear) Regression
null hypothesis
1.4: Basic Concepts of Hypothesis Testing
4.7: One-way Anova

P

Pooling
2.8: Small Numbers in Chi-Square and G–Tests

R

R×C table
2.7: Fisher's Exact Test
Ranked variables
1.2: Types of Biological Variables
5.2: Spearman Rank Correlation

S

Spearman Rank Correlation
5.2: Spearman Rank Correlation
