Inferential Statistics and Probability - A
Holistic Approach

INFERENTIAL STATISTICS AND PROBABILITY - A HOLISTIC APPROACH

Holistic or Eastern tradition analysis is less concerned with the component parts of a problem, mechanism or phenomenon but rather with how this system operates as a whole, including its surrounding environment. I believe it is possible to teach the concept of Inferential Statistics holistically. This course material is a result of that inspiration, and it was designed to supplement, not replace, a traditional course textbook or workbook.
