

Index

B

bar graph

2.3: Stem-and-Leaf Graphs (Stemplots), Line Graphs, and Bar Graphs

Bernoulli trial

3.4: Binomial Distribution
3.5: Geometric Distribution

binomial probability distribution

3.4: Binomial Distribution
6.4: A Population Proportion

blinding

1.3: Experimental Design and Ethics

box plots

2.6: Box Plots

C

central limit theorem

5.4: Using the Central Limit Theorem

central limit theorem for sums

5.3: The Central Limit Theorem for Sums

cluster sampling

1.2: Data, Sampling, and Variation in Data and Sampling

coefficient of determination

9.4: The Regression Equation

Cohen's Standards

8.2: Two Population Means with Unknown Standard Deviations

Comparing two population means

8.3: Two Population Means with Known Standard Deviations

Comparing Two Population Proportions

8.4: Comparing Two Independent Population Proportions

Confidence Interval

7.1: Prelude to Hypothesis Testing

continuous data

1.2: Data, Sampling, and Variation in Data and Sampling

control group

1.3: Experimental Design and Ethics

cumulative relative frequency

2.2: Frequency, Frequency Tables, and Levels of Measurement

D

Decision

7.5: Rare Events, the Sample, Decision and Conclusion

degrees of freedom

8.2: Two Population Means with Unknown Standard Deviations

direction of a relationship between the variables

9.3: Scatter Plots

discrete data

1.2: Data, Sampling, and Variation in Data and Sampling

Distribution for the differences

8.4: Comparing Two Independent Population Proportions

E

Equal variance

9.5: Testing the Significance of the Correlation Coefficient

ethics

1.3: Experimental Design and Ethics

expected value

3.3: Mean or Expected Value and Standard Deviation

experimental unit

1.3: Experimental Design and Ethics

explanatory variable

1.3: Experimental Design and Ethics

extrapolation

9.6: Prediction

F

frequency

2.2: Frequency, Frequency Tables, and Levels of Measurement

Frequency Polygons

2.4: Histograms, Frequency Polygons, and Time Series Graphs

frequency table

2.2: Frequency, Frequency Tables, and Levels of Measurement

G

geometric distribution

3.5: Geometric Distribution

H

Histograms

2.4: Histograms, Frequency Polygons, and Time Series Graphs

hypothesis testing

7.1: Prelude to Hypothesis Testing
7.2: Null and Alternative Hypotheses
7.4: Distribution Needed for Hypothesis Testing
7.6: Additional Information and Full Hypothesis Test Examples

I

inferential statistics

6.1: Prelude to Confidence Intervals

Institutional Review Board

1.3: Experimental Design and Ethics

interpolation

9.6: Prediction

L

Law of Large Numbers

5.4: Using the Central Limit Theorem

level of measurement

2.2: Frequency, Frequency Tables, and Levels of Measurement

line graph

2.3: Stem-and-Leaf Graphs (Stemplots), Line Graphs, and Bar Graphs

linear correlation coefficient

9.4: The Regression Equation
9.5: Testing the Significance of the Correlation Coefficient

linear equations

9.2: Linear Equations

LINEAR REGRESSION MODEL

9.4: The Regression Equation

lurking variable

1.3: Experimental Design and Ethics

M

margin of error

6.2: A Single Population Mean using the Normal Distribution

matched samples

8.5: Matched or Paired Samples

mean

2.8: Skewness and the Mean, Median, and Mode
3.3: Mean or Expected Value and Standard Deviation

mean for sums

5.3: The Central Limit Theorem for Sums

median

2.5: Measures of the Location of the Data
2.7: Measures of the Center of the Data
2.8: Skewness and the Mean, Median, and Mode

mode

2.7: Measures of the Center of the Data
2.8: Skewness and the Mean, Median, and Mode

N

Normal Approximation to the Binomial Distribution

5.4: Using the Central Limit Theorem

normal distribution

4.3: Using the Normal Distribution
4.4: Normal Distribution - Lap Times (Worksheet)
4.5: Normal Distribution - Pinkie Length (Worksheet)
5.2: The Central Limit Theorem for Sample Means (Averages)

O

outliers

2.5: Measures of the Location of the Data
9.7: Outliers

P

Paired Samples

8.5: Matched or Paired Samples

parameter

1.1.1: Definitions of Statistics, Probability, and Key Terms

Pareto chart

1.2: Data, Sampling, and Variation in Data and Sampling

placebo

1.3: Experimental Design and Ethics

Pooled Proportion

8.4: Comparing Two Independent Population Proportions

population

1.1.1: Definitions of Statistics, Probability, and Key Terms

population mean

2.7: Measures of the Center of the Data

Population Standard Deviation

2.9: Measures of the Spread of the Data

power of the test

- 7.3: Outcomes and the Type I and Type II Errors
- 7.6: Additional Information and Full Hypothesis Test

Examples

prediction

- 9.6: Prediction

probability

- 1.1.1: Definitions of Statistics, Probability, and Key Terms

probability distribution function

- 3.2: Probability Distribution Function (PDF) for a Discrete Random Variable
- 4.3: Using the Normal Distribution

Q

Qualitative Data

- 1.2: Data, Sampling, and Variation in Data and Sampling

Quantitative Data

- 1.2: Data, Sampling, and Variation in Data and Sampling

quartiles

- 2.5: Measures of the Location of the Data

R

random assignment

- 1.3: Experimental Design and Ethics

rare events

- 7.5: Rare Events, the Sample, Decision and Conclusion

response variable

- 1.3: Experimental Design and Ethics

rounding

- 2.2: Frequency, Frequency Tables, and Levels of Measurement

S

sample mean

- 2.7: Measures of the Center of the Data

sample Standard Deviation

- 2.9: Measures of the Spread of the Data

sampling

- 1: Sampling and Data

Sampling Bias

- 1.2: Data, Sampling, and Variation in Data and Sampling

sampling distribution of the mean

- 5.2: The Central Limit Theorem for Sample Means (Averages)

Sampling Error

- 1.2: Data, Sampling, and Variation in Data and Sampling

sampling with replacement

- 1.2: Data, Sampling, and Variation in Data and Sampling

sampling without replacement

- 1.2: Data, Sampling, and Variation in Data and Sampling

scatter plot

- 9.3: Scatter Plots

significance level

- 7.5: Rare Events, the Sample, Decision and Conclusion

Skewed

- 2.6: Box Plots
- 2.8: Skewness and the Mean, Median, and Mode

slope

- 9.2: Linear Equations

standard deviation

- 2.9: Measures of the Spread of the Data
- 3.3: Mean or Expected Value and Standard Deviation

Standard deviation for Sums

- 5.3: The Central Limit Theorem for Sums

standard error

- 8.2: Two Population Means with Unknown Standard Deviations

Standard Error of the Mean

- 5.2: The Central Limit Theorem for Sample Means (Averages)

standard normal distribution

- 4.1: Prelude to The Normal Distribution
- 4.2: The Standard Normal Distribution

statistic

- 1.1.1: Definitions of Statistics, Probability, and Key Terms

stemplot

- 2.3: Stem-and-Leaf Graphs (Stemplots), Line Graphs, and Bar Graphs

strength of a relationship between the variables

- 9.3: Scatter Plots

T

test statistic

- 8.5: Matched or Paired Samples

The alternative hypothesis

- 7.2: Null and Alternative Hypotheses

the central limit theorem

- 5: The Central Limit Theorem

The null hypothesis

- 7.2: Null and Alternative Hypotheses

Time Series Graphs

- 2.4: Histograms, Frequency Polygons, and Time Series Graphs

treatments

- 1.3: Experimental Design and Ethics

type I error

- 7.3: Outcomes and the Type I and Type II Errors

type II error

- 7.3: Outcomes and the Type I and Type II Errors

V

variable

- 1.1.1: Definitions of Statistics, Probability, and Key Terms
