

# TABLE OF CONTENTS

## Licensing

## Preliminaries

- Role of Biostatistics
- The Big Picture
- Types of Variables
- What is Data?

## Unit 1: Exploratory Data Analysis

- Case C-C
- Case C-Q
- Case Q-Q
- Causation
- One Categorical Variable
- One Quantitative Variable: Introduction
- Role-Type Classification
- Summary (Unit 1)

## Unit 2: Producing Data

- Causation and Experiments
- Causation and Observational Studies
- Designing Studies
- Sample Surveys
- Sampling
- Summary (Unit 2)

## Unit 3A: Probability

- Basic Probability Rules
- Conditional Probability and Independence
- Introduction to Probability
- Summary (Unit 3)

## Unit 3B: Random Variables

- Binomial Random Variables
- Continuous Random Variables
- Discrete Random Variables
- Normal Random Variables
- Summary (Unit 3B - Random Variables)

## Unit 3B: Sampling Distribution

- Sampling Distribution of the Sample Mean,  $\bar{x}$
- Sampling Distribution of the Sample Proportion,  $\hat{p}$
- Summary (Unit 3B - Sampling Distributions)

## Unit 4A: Introduction to Statistical Inference

- Estimation
- Hypothesis Testing
- Wrap-Up (Inference for One Variable)

## Unit 4B: Inference for Relationships

- Case  $C \rightarrow C$
- Case  $C \rightarrow Q$
- Case  $Q \rightarrow Q$
- Wrap-Up (Inference for Relationships)
