

## 5.2: Introduction- Two-Way Tables

---

What you'll learn to do: Analyze the relationship between two categorical variables using a two-way table.

### LEARNING OBJECTIVES

- Analyze the relationship between two categorical variables using a two-way table.
- Calculate marginal, joint, and conditional percentages and interpret them as probability estimates.
- Analyze and compare risks using conditional probabilities.
- Create a hypothetical two-way table to answer more complex probability questions.
