

CHAPTER OVERVIEW

3: Discrete Random Variables

3.1: Introduction to Random Variables

3.2: Probability Mass Functions (PMFs) and Cumulative Distribution Functions (CDFs) for Discrete Random Variables

3.3: Bernoulli and Binomial Distributions

3.4: Hypergeometric, Geometric, and Negative Binomial Distributions

3.5: Poisson Distribution

3.6: Expected Value of Discrete Random Variables

3.7: Variance of Discrete Random Variables

3.8: Moment-Generating Functions (MGFs) for Discrete Random Variables
