

Index

A

ANOVA

3.5: Partitioning the Sum of Squares

B

block randomization

2.1: Between-Subjects Design
5.1: Within-Subjects Design

C

carryover effect

2.1: Between-Subjects Design
5.1: Within-Subjects Design

coefficient of determination

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

coefficient of multiple determination

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

cohort effect

1.6: Non-Experimental Research

complete counterbalancing

2.1: Between-Subjects Design
5.1: Within-Subjects Design

confounds

1.1: Research Designs

context effect

2.1: Between-Subjects Design
5.1: Within-Subjects Design

contrast effect

2.1: Between-Subjects Design
5.1: Within-Subjects Design

correlation

1.1: Research Designs

correlational research

1.6: Non-Experimental Research

counterbalancing

2.1: Between-Subjects Design
5.1: Within-Subjects Design

D

dependent variable

1.1: Research Designs

E

estimate of the error variance

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

Experimenter expectations

1.1: Research Designs

F

factorial design

3.1: Factorial Designs

factorial design table

3.1: Factorial Designs

fatigue effect

2.1: Between-Subjects Design
5.1: Within-Subjects Design

I

independent variable

1.1: Research Designs

interaction

3.2: Factorial ANOVA - Main Effects
3.3: Factorial ANOVA - Interaction Effects
3.4: Factorial ANOVA - Simple Effects

L

Longitudinal studies

1.6: Non-Experimental Research

Longitudinal study

1.1: Research Designs

M

main effect

3.2: Factorial ANOVA - Main Effects
3.3: Factorial ANOVA - Interaction Effects
3.4: Factorial ANOVA - Simple Effects

mixed factorial design

3.1: Factorial Designs

multiple correlation coefficient

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

N

nonequivalent groups design

1.5: Common Quasi-Experimental Designs

O

Observational research

1.6: Non-Experimental Research

operational definitions

1.1: Research Designs

order effect

2.1: Between-Subjects Design
5.1: Within-Subjects Design

P

Participant demand

1.1: Research Designs

placebo effect

1.1: Research Designs

posttest only nonequivalent groups design

1.5: Common Quasi-Experimental Designs

practice effect

2.1: Between-Subjects Design
5.1: Within-Subjects Design

R

random assignment

1.1: Research Designs
2.1: Between-Subjects Design
5.1: Within-Subjects Design

random counterbalancing

2.1: Between-Subjects Design
5.1: Within-Subjects Design

regression equation

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

S

Simple effects

3.2: Factorial ANOVA - Main Effects
3.3: Factorial ANOVA - Interaction Effects
3.4: Factorial ANOVA - Simple Effects

spreading interactions

3.2: Factorial ANOVA - Main Effects
3.3: Factorial ANOVA - Interaction Effects
3.4: Factorial ANOVA - Simple Effects

standard error of the estimate

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

sum of squared errors (SSE)

6.2: Multiple Regression
6.3: Regression Coefficients
6.4: Effect Size
6.5: Multicollinearity

switching replication with treatment

removal design

1.5: Common Quasi-Experimental Designs
