

TABLE OF CONTENTS

Licensing

1: Introduction to Research Designs

- 1.1: Research Designs
- 1.2: Internal and External Validity
- 1.3: Threats to Internal Validity and Different Control Techniques
- 1.4: Common Experimental Designs
- 1.5: Common Quasi-Experimental Designs
- 1.6: Non-Experimental Research

2: Between-Subjects Single Factor Design

- 2.1: Between-Subjects Design
- 2.2: One-Way ANOVA
- 2.3: Computing the F statistics
- 2.4 Post Hoc Tests

3: Between-Subjects Factorial Design

- 3.1: Factorial Designs
- 3.2: Factorial ANOVA - Main Effects
- 3.3: Factorial ANOVA - Interaction Effects
- 3.4: Factorial ANOVA - Simple Effects
- 3.5: Partitioning the Sum of Squares

4: Between-Subjects Design with a Control Variable

- 4.1: Overview of the Control Variable
- 4.2: Randomized Block Design
- 4.4: Analysis of Covariance (ANCOVA)

5: Within-Subjects Design

- 5.1: Within-Subjects Design
- 5.2: Partitioning the Sums of Squares
- 5.3: Repeated Measures ANOVA
- 5.4: More Notes on Repeated Measures ANOVA

6: Multiple Linear Regression

- 6.1: Simple Linear Equation Refresher
- 6.2: Multiple Regression
- 6.3: Regression Coefficients
- 6.4: Effect Size
- 6.5: Multicollinearity
