

Index

A

absolute value
3.4: Absolute Value

absolute value equations
3.5: Absolute Value Equations

Absolute Value Function
3.1: Functions and Function Notation

accumulated value (annuity)
6.2: Annuities and Sinking Funds

Addition Property
2.1: Properties of Inequalities

annuity
6.2: Annuities and Sinking Funds

augmented matrix
7.2: Systems of Linear Equations and the Gauss-Jordan Method

average rate of change
5.5: Average rate of Change and Derivatives

C

Circular Permutations
10.4: Circular Permutations and Permutations with Similar Elements

close model (economy)
7.6: Applications – Leontief Models

coefficient
3.10: Power Functions and Polynomial Functions

coefficient matrix
7.1: Introduction to Matrices

column vector
7.1: Introduction to Matrices

Combinations
10.5: Combinations

common logarithms
4.4: Logarithms and Logarithmic Functions

common ratio
6.2: Annuities and Sinking Funds

complement
11.2: Mutually Exclusive Events and the Addition Rule

compound interest
6.1: Simple and Compound Interest

conditional probability
11.4: Conditional Probability

constant function
3.1: Functions and Function Notation
3.3: Piecewise-Defined Functions

constraints
8.2: Maximization Applications

continuity
5.4: Continuity

continuous compounding
6.1: Simple and Compound Interest

continuous function
3.10: Power Functions and Polynomial Functions

Cube root function
3.1: Functions and Function Notation

cubic function
3.1: Functions and Function Notation

D

definition of a logarithm
4.6: Exponential and Logarithmic Equations

degree

3.10: Power Functions and Polynomial Functions

dependent system
7.3: Systems of Linear Equations – Special Cases

dependent variable
3.1: Functions and Function Notation

Derivatives
5.5: Average rate of Change and Derivatives

Differentiability (two variables)
5.5: Average rate of Change and Derivatives

dimension
7.1: Introduction to Matrices

discontinuous function
5.4: Continuity

Division Property
2.1: Properties of Inequalities

domain
3.1: Functions and Function Notation
3.2: Domain and Range
3.12: Graphing Rational Functions

dual
9.3: Minimization By The Simplex Method

dual problem
9.3: Minimization By The Simplex Method

E

elements
7.1: Introduction to Matrices
10.1: Sets and Venn Diagrams

elimination method
1.5: More Applications
3.8: More Applications

empty set
10.1: Sets and Venn Diagrams

end behavior
3.10: Power Functions and Polynomial Functions
3.11: Graphs of Polynomial Functions

entries
7.1: Introduction to Matrices

event
11.1: Sample Spaces and Probability

F

factorial
10.3: Permutations

fixed cost
1.4: Applications
3.7: Applications

function
3.1: Functions and Function Notation

G

general form of a polynomial function
3.10: Power Functions and Polynomial Functions

geometric series
6.2: Annuities and Sinking Funds

global maximum
3.11: Graphs of Polynomial Functions

global minimum
3.11: Graphs of Polynomial Functions

H

horizontal line test
3.1: Functions and Function Notation

I

identity function
3.1: Functions and Function Notation

identity matrix
7.1: Introduction to Matrices

inconsistent system
7.3: Systems of Linear Equations – Special Cases

independent events
11.5: Independent Events

independent system
7.3: Systems of Linear Equations – Special Cases

independent variable
3.1: Functions and Function Notation

input
3.1: Functions and Function Notation

instantaneous velocity
5.5: Average rate of Change and Derivatives

intercepts
1.1: Graphing a Linear Equation

Intermediate Value Theorem
3.11: Graphs of Polynomial Functions

intersection
11.2: Mutually Exclusive Events and the Addition Rule

Interval Notation
3.2: Domain and Range

inverse of a matrix
7.4: Inverse Matrices

J

jump discontinuity
5.4: Continuity

L

leading coefficient
3.10: Power Functions and Polynomial Functions

leading term
3.10: Power Functions and Polynomial Functions

Leontief models
7.6: Applications – Leontief Models

limit of a polynomial
5.3: Finding Limits - Properties of Limits

limit of a power
5.3: Finding Limits - Properties of Limits

limit of a quotient
5.3: Finding Limits - Properties of Limits

limit of a sum
5.3: Finding Limits - Properties of Limits

limits
5.2: Finding Limits - Numerical and Graphical Approaches

linear equation
1.1: Graphing a Linear Equation

linear programming
8.2: Maximization Applications

logarithmic function
4.4: Logarithms and Logarithmic Functions

M

mixed constraints
8.2: Maximization Applications

Multiplication Property
2.1: Properties of Inequalities

multiplication rule

[11.3: Probability Using Tree Diagrams and Combinations](#)

multiplicity

[3.11: Graphs of Polynomial Functions](#)

mutually exclusive

[11.2: Mutually Exclusive Events and the Addition Rule](#)

N

natural logarithm

[4.4: Logarithms and Logarithmic Functions](#)

number e

[4.2: Definition of Exponential Function, Exponential Growth and Decay Models](#)

O

objective function

[8.2: Maximization Applications](#)

open model (economy)

[7.6: Applications – Leontief Models](#)

ordinary annuity

[6.2: Annuities and Sinking Funds](#)

output

[3.1: Functions and Function Notation](#)

outstanding balance of a loan

[6.4: Miscellaneous Application Problems](#)

P

parameter

[1.1: Graphing a Linear Equation](#)

permutation

[10.3: Permutations](#)

piecewise function

[3.3: Piecewise-Defined Functions](#)

pivot element

[7.2: Systems of Linear Equations and the Gauss-Jordan Method](#)

pivot row

[7.2: Systems of Linear Equations and the Gauss-Jordan Method](#)

pivoting

[7.2: Systems of Linear Equations and the Gauss-Jordan Method](#)

polynomial function
