

## 8.5: Finishing...

Save command history from the menu (on macOS) or with command (on Windows or Linux.)

*Attention!* Always save everything which you did in R!

Quit R typing

Later, you can open the saved [bugs.r](#) in any text editor, change it, remove possible mistakes and redundancies, add more commands to it, copy fragments from it into the R window, and finally, *run* this file as *R script*, either from within R, with command `source("bugs.r", echo=TRUE)`, or even without starting the interactive R session, typing in the console window something like `Rscript bugs.r`.

mistake in this chapter. Please find it. Do not look on the next page.
