

CHAPTER OVERVIEW

7: The Chi-Square and F Distributions

A chi-squared test is any statistical hypothesis test in which the sampling distribution of the test statistic is a chi-square distribution when the **null hypothesis** is true.

- 7.1: Prelude to The Chi-Square Distribution
- 7.2: Facts About the Chi-Square Distribution
- 7.3: Goodness-of-Fit Test
- 7.4: Test of Independence
- 7.5: Test for Homogeneity
- 7.6: Comparison of the Chi-Square Tests
- 7.7: Test of a Single Variance
- 7.8: Prelude to F Distribution and One-Way ANOVA
- 7.9: One-Way ANOVA
- 7.10: The F Distribution and the F-Ratio
- 7.11: Facts About the F Distribution
- 7.12: Test of Two Variances
- 7.13: Lab- One-Way ANOVA
