12.3: The F Distribution and the F-Ratio

statisticalanalysis

12.11: Solutions

statisticalsignificance

12.2: One-Way ANOVA

12.11: Solutions

statistics

Preface

1.1: Definitions of Statistics, Probability, and Key Terms

1.7: Review

2.12: Practice

2.14: References *

3.13: Bringing It Together- Practice

4.9: Formula Review

6.3: Estimating the Binomial with the Normal Distribution

6.6: Chapter Review

6.7: Formula Review

7: The Central Limit Theorem

11.2: Test of a Single Variance

11.6: Comparison of the Chi-Square Texts

12.0: Introduction to the F-Distribtuion

12.3: The F Distribution and the F-Ratio

12.7: Formula Review

12.9: Homework

13.7: How to Use Microsoft Excel® for Regression Analysis

13.10: Chapter Review

14.0.2: Student's t Distribution

statistics worksheet

6: The Normal Distribution

stemandleafplot

2.10: Review

Stemplots

2.1: Display Data

student research

12.10: References

Student's t Distribution

14.0.2: Student's t Distribution

sum of squared errors (SSE)

13.4: The Regression Equation

survey

2.12: Practice

1.3: Levels of Measurement

T

taste test

10.12: Bringing It Together Homework

terminology

3.11: Formula Review

test

11.2: Test of a Single Variance

12.6: Chapter Review

12.10: References

test for homogeneity

11.8: Chapter Review

test of independence

11: The Chi-Square Distribution

11.4: Test of Independence

11.8: Chapter Review

11.9: Formula Review

test statistic

9.3: One-Sample Test

10.5: Two Population Means with Known Standard Deviations

10.9: Formula Review

testforhomogeneity

11.5: Test for Homogeneity

TestingMeans

12.5: Key Terms

testoftwovariances

12: F Distribution and One-Way ANOVA

12.7: Formula Review

testofvariances

12.8: Practice

teststatistic

11.5: Test for Homogeneity

12.1: Test of Two Variances

the central limit theorem

7.1: The Central Limit Theorem for Sample Means

the standard deviation

10.5: Two Population Means with Known Standard Deviations

theoretical distribution

6: The Normal Distribution

third quartile

2.2: Measures of the Location of the Data

tomato data

12.10: References

tomato_production

12.3: The F Distribution and the F-Ratio

transportation

3.13: Bringing It Together- Practice

treatments

1.4: Experimental Design and Ethics

tree diagram

3.4: Contingency Tables and Probability Trees

trials

4.9: Formula Review

two proportions

10.12: Bringing It Together Homework

type I

9.3: One-Sample Test

type I error

9.2: Outcomes and the Type I and Type II Errors

type II error

9.2: Outcomes and the Type I and Type II Errors

U

unfair

3.1: Probability Terminology

unit

13.5: Interpretation of Regression Coefficients-Elasticity and Logarithmic Transformation

unit change

13.5: Interpretation of Regression Coefficients-Elasticity and Logarithmic Transformation

units

13.5: Interpretation of Regression Coefficients-Elasticity and Logarithmic Transformation

V

variability

11.2: Test of a Single Variance

variable

1.1: Definitions of Statistics, Probability, and Key Terms

5.5: Chapter Review

variables

11.6: Comparison of the Chi-Square Texts

13.10: Chapter Review

variance

2.7: Measures of the Spread of the Data

2.11: Formula Review

4.9: Formula Review

11: The Chi-Square Distribution

11.2: Test of a Single Variance

12.2: One-Way ANOVA

12.3: The F Distribution and the F-Ratio

12.7: Formula Review

12.8: Practice

12.9: Homework

13.11: Practice

variance analysis

12.4: Facts About the F Distribution

variances

12.1: Test of Two Variances

12.6: Chapter Review

12.10: References

variation

1.2: Data, Sampling, and Variation in Data and Sampling
