

TABLE OF CONTENTS

Licensing

1: Introduction to Statistics

- 1.1: What is Statistics?
- 1.2: Tenets of Statistics
- 1.3: Types of Variables
- 1.4: Types of Statistics
- 1.5: Statistics and Science
- 1.6: How to Succeed in Statistics

2: Summarizing Data Visually

- 2.1: Visually Summarizing Data Univariately
- 2.2: How to Read a Data Set
- 2.3: The Value of Visual Summaries
- 2.4: Frequency Distribution Tables
- 2.5: Histograms
- 2.6: Frequency Polygons
- 2.7: Bar Graphs
- 2.8: Using SPSS
- 2.9: Chapter References

3: Measures of Central Tendency

- 3.1: The Goal of Summaries
- 3.2: Mode
- 3.3: Median
- 3.4: Mean
- 3.5: Reporting Results
- 3.6: Summary
- 3.7: Chapter References

4: Measures of Variability

- 4.1: Variability
- 4.2: Range
- 4.3: Standard Deviation
- 4.4: Summarizing Results in Sentences
- 4.5: Variance
- 4.6: Choosing a Measure of Variability
- 4.7: Using SPSS

5: The Normal Curve, z-Scores, and Probability

- 5.1: The Normal Curve, z-Scores, and Probability
- 5.2: The Normal Distribution Curve
- 5.3: z-Scores
- 5.4: Finding Probabilities
- 5.5: Probability and Inferential Statistics

6: The Foundations of Hypothesis Testing

- 6.1: Developing Hypotheses
- 6.2: One-Tailed vs. Two-Tailed Tests
- 6.3: Sampling Distributions
- 6.4: Hypothesis Testing
- 6.5: Errors and Statistical Significance
- 6.6: Choosing Statistical Tests
- 6.7: References

7: One Sample t-Tests

- 7.1: t-Statistics and the One Sample t-tests
- 7.2: The Logic of a t-Distribution
- 7.3: The One Sample t-Test Formula
- 7.4: Reporting Results
- 7.5: Practice Example of how to Compute t when Descriptive Statistics are Provided
- 7.6: Using SPSS
- 7.7: Structured Summary for the One Sample t-Test
- 7.8: References

8: Independent Samples t-Tests

- 8.1: Variables, Data, and Hypotheses that Fit the Independent Samples t-Test
- 8.2: Experimental Design and Cause-Effect
- 8.3: The Independent Samples t-Test Formula
- 8.4: Example of how to Test a Hypothesis by Computing t.
- 8.5: Addressing Violations to Assumptions
- 8.6: Using SPSS
- 8.7: Structured Summary for the Independent Samples t-Test
- 8.8: References

9: Dependent Samples t-Tests

- 9.1: Variables, Data, and Hypotheses that Fit the Dependent Samples t-Test
- 9.2: The Dependent Samples t-Test Formula
- 9.3: Distinguishing Parts of the Dependent Samples t-Test Formula
- 9.4: Using SPSS
- 9.5: Structured Summary for the Dependent Samples t-Test
- 9.6: References

10: One-Way ANOVA

- 10.1: Introduction to One-Way ANOVA
- 10.2: Variables, Data, and Hypotheses that Fit a One-way ANOVA
- 10.3: The One-Way ANOVA Formula
- 10.4: Using the ANOVA Formula
- 10.5: Addressing Violations to Assumptions
- 10.6: Using SPSS
- 10.7: Structured Summary for the One-Way ANOVA
- 10.8: One-Way ANOVA Calculations Chart

11: Repeated-Measures ANOVA

- 11.1: Introduction to Repeated-Measures ANOVA
- 11.2: Variables, Data, and Hypotheses that Fit a Repeated-Measures ANOVA
- 11.3: The Foundations of Repeated-Measures ANOVA Formula
- 11.4: Computations with the Repeated-Measures ANOVA Formula
- 11.5: Testing a Hypothesis with Repeated Measures ANOVA
- 11.6: Structured Summary for the Repeated-measures ANOVA

12: Bivariate Correlation

- 12.1: Introduction to Bivariate Correlation
- 12.2: Variables
- 12.3: Data and Assumptions
- 12.4: Hypotheses
- 12.5: Interpretation of r-Values
- 12.6: The Bivariate Correlation Formula
- 12.7: Using SPSS
- 12.8: Structured Summary for Bivariate Correlation

13: Simple Linear Regression

- 13.1: Introduction to Linear Regression
- 13.2: Variables
- 13.3: Data and Assumptions
- 13.4: Prediction in Regression
- 13.5: Hypotheses
- 13.6: Visualizing Linear Regression
- 13.7: The Purpose of the Four Parts of a Regression Analysis
- 13.8: Visualizing Predictions and Residuals in Regression
- 13.9: Testing a Regression Model
- 13.10: Computing F
- 13.11: Example of How to Test a Hypothesis Using Regression
- 13.12: Testing a Hypothesis with Regression in SPSS

14: Chi-Squared

- 14.1: Introduction to Non-Parametric Tests
- 14.2: Chi-squared Goodness of Fit
- 14.3: Testing Goodness of Fit with Chi-Squared
- 14.4: Example of How to Test a Hypothesis Using Chi-squared Goodness of Fit
- 14.5: Testing Independence with Chi-Squared
- 14.6: Using SPSS
- 14.7: Structured Summary for Chi-Squared

15: Appendix

- 15.1: Appendix A- Math Symbols and Their Operations
- 15.2: Appendix B- Order of Operations
- 15.3: Appendix C- The Z-Distribution Table
- 15.4: Appendix D- The t-Tables
- 15.5: Appendix E- The F-Tables
- 15.6: Appendix F- The q-Tables
- 15.7: Appendix G- The r-Tables
