

Index

A

alternative hypothesis

- 1.6: Chi-Squared Test
- 1.8: Analysis of Variance

American attitudes

- 1.2: Introduction to Data Formations and Graphics

analysis of variance

- 1.8: Analysis of Variance

ANOVA

- 1.8: Analysis of Variance

area probability sampling

- 1.2: Introduction to Data Formations and Graphics

assumptions for correlation analysis

- 1.9: Correlation

assumptions of linear regression

- 1.10: Linear Regression

C

capable guardianship

- 1.5: Reliability of a Scale

categorical variables

- 1.2: Introduction to Data Formations and Graphics

causation

- 1.9: Correlation

Central Tendency

- 1.4: Central Tendency and Variability

cognitive behavioral therapy

- 1.7: T-Test

Cohen's guidelines

- 1.9: Correlation

community surveys

- 1.1: Introduction to Crime Data Analysis, R and RStudio

confidence in police

- 1.8: Analysis of Variance

continuous data

- 1.7: T-Test

correctional facilities

- 1.1: Introduction to Crime Data Analysis, R and RStudio

correctional settings

- 1.7: T-Test

correlation

- 1.9: Correlation

correlation analysis

- 1.10: Linear Regression

correlation coefficient

- 1.9: Correlation
- 1.10: Linear Regression

court proceedings

- 1.1: Introduction to Crime Data Analysis, R and RStudio

crime analysis

- 1.5: Reliability of a Scale

crime analysts

- 1.1: Introduction to Crime Data Analysis, R and RStudio

crime categories

- 1.3: Creating a New Variable and Producing Summary Statistics

crime data analysis

- 1.10: Linear Regression

crime prevention

- 1.1: Introduction to Crime Data Analysis, R and RStudio

crime rate calculation

- 1.3: Creating a New Variable and Producing Summary Statistics

crime reporting limitations

- 1.3: Creating a New Variable and Producing Summary Statistics

criminal justice

- 1.8: Analysis of Variance

criminal justice data

- 1.1: Introduction to Crime Data Analysis, R and RStudio

criminal justice system

- 1.1: Introduction to Crime Data Analysis, R and RStudio

Cronbach's alpha

- 1.5: Reliability of a Scale

D

data analysis

- 1.4: Central Tendency and Variability
- 1.7: T-Test
- 1.9: Correlation

data cleaning

- 1.3: Creating a New Variable and Producing Summary Statistics

data frame

- 1.2: Introduction to Data Formations and Graphics

data grouping

- 1.3: Creating a New Variable and Producing Summary Statistics

data import

- 1.2: Introduction to Data Formations and Graphics

data manipulation

- 1.2: Introduction to Data Formations and Graphics
- 1.3: Creating a New Variable and Producing Summary Statistics

data modeling

- 1.10: Linear Regression

data recoding

- 1.2: Introduction to Data Formations and Graphics

data science

- 1.4: Central Tendency and Variability

data summary

- 1.3: Creating a New Variable and Producing Summary Statistics

data transformation

- 1.1: Introduction to Crime Data Analysis, R and RStudio
- 1.2: Introduction to Data Formations and Graphics

Data Visualization

- 1.1: Introduction to Crime Data Analysis, R and RStudio
- 1.2: Introduction to Data Formations and Graphics
- 1.3: Creating a New Variable and Producing Summary Statistics
- 1.4: Central Tendency and Variability
- 1.7: T-Test

density plot

- 1.7: T-Test

descriptive statistics

- 1.2: Introduction to Data Formations and Graphics
- 1.3: Creating a New Variable and Producing Summary Statistics

DescTools package

- 1.4: Central Tendency and Variability

dplyr package

- 1.2: Introduction to Data Formations and Graphics
- 1.3: Creating a New Variable and Producing Summary Statistics

E

experimental conditions

- 1.8: Analysis of Variance

F

F ratio

- 1.8: Analysis of Variance

G

gapminder dataset

- 1.4: Central Tendency and Variability

General Social Survey

- 1.2: Introduction to Data Formations and Graphics

ggplot2

- 1.3: Creating a New Variable and Producing Summary Statistics

- 1.7: T-Test

ggplot2 package

- 1.2: Introduction to Data Formations and Graphics

H

haven package

- 1.2: Introduction to Data Formations and Graphics

histogram

- 1.3: Creating a New Variable and Producing Summary Statistics

hypothesis testing

- 1.6: Chi-Squared Test
- 1.7: T-Test
- 1.8: Analysis of Variance
- 1.9: Correlation
- 1.10: Linear Regression

I

inferential statistics

- 1.9: Correlation

inmates survey

- 1.10: Linear Regression

intelligence

- 1.1: Introduction to Crime Data Analysis, R and RStudio

L

law enforcement

- 1.1: Introduction to Crime Data Analysis, R and RStudio

linear regression

- 1.10: Linear Regression

linear relationship

- 1.9: Correlation

M

mean

- 1.4: Central Tendency and Variability

median

- 1.4: Central Tendency and Variability

mode

- 1.4: Central Tendency and Variability

model significance

- 1.10: Linear Regression

multiple linear regression

- 1.10: Linear Regression

N

National Crime Victimization Survey

1.5: Reliability of a Scale

NCVS

1.5: Reliability of a Scale

NHST

1.6: Chi-Squared Test

NORC

1.2: Introduction to Data Formations and Graphics

null hypothesis

1.6: Chi-Squared Test

1.8: Analysis of Variance

numerical variables

1.2: Introduction to Data Formations and Graphics

O

ordinary least squares

1.10: Linear Regression

P

Pearson correlation coefficient

1.9: Correlation

police legitimacy

1.8: Analysis of Variance

police use of force

1.2: Introduction to Data Formations and Graphics

policing

1.1: Introduction to Crime Data Analysis, R and RStudio

population attributes

1.6: Chi-Squared Test

population categories

1.3: Creating a New Variable and Producing Summary Statistics

predictive modeling

1.10: Linear Regression

procedural justice

1.8: Analysis of Variance

psychometric analysis

1.5: Reliability of a Scale

psychometrics

1.8: Analysis of Variance

public education

1.1: Introduction to Crime Data Analysis, R and RStudio

public safety

1.1: Introduction to Crime Data Analysis, R and RStudio

public safety initiatives

1.1: Introduction to Crime Data Analysis, R and RStudio

Q

quantitative research methods

1.10: Linear Regression

R

R data packages

1.4: Central Tendency and Variability

R packages

1.1: Introduction to Crime Data Analysis, R and RStudio

R programming

1.1: Introduction to Crime Data Analysis, R and RStudio

1.2: Introduction to Data Formations and Graphics

1.3: Creating a New Variable and Producing

Summary Statistics

1.4: Central Tendency and Variability

1.5: Reliability of a Scale

randomized trials

1.7: T-Test

readxl package

1.3: Creating a New Variable and Producing

Summary Statistics

regression analysis

1.9: Correlation

1.10: Linear Regression

regression assumptions

1.10: Linear Regression

regression equation

1.10: Linear Regression

regression model evaluation

1.10: Linear Regression

rehabilitation programs

1.1: Introduction to Crime Data Analysis, R and RStudio

reliability

1.5: Reliability of a Scale

research design

1.7: T-Test

research methodology

1.6: Chi-Squared Test

research study

1.8: Analysis of Variance

risky lifestyles

1.10: Linear Regression

RStudio

1.1: Introduction to Crime Data Analysis, R and RStudio

S

sample statistics

1.6: Chi-Squared Test

scale development

1.5: Reliability of a Scale

scatter plot

1.9: Correlation

scatterplot

1.10: Linear Regression

simple linear regression

1.10: Linear Regression

social phenomena

1.6: Chi-Squared Test

social science research

1.5: Reliability of a Scale

social sciences methodology

1.8: Analysis of Variance

sociology

1.4: Central Tendency and Variability

SPSS data

1.8: Analysis of Variance

standard deviation

1.4: Central Tendency and Variability

statistical analysis

1.1: Introduction to Crime Data Analysis, R and RStudio

statistical concepts

1.4: Central Tendency and Variability

statistical inference

1.10: Linear Regression

statistical measures

1.4: Central Tendency and Variability

statistical methods

1.5: Reliability of a Scale

1.10: Linear Regression

statistical significance

1.6: Chi-Squared Test

1.8: Analysis of Variance

1.10: Linear Regression

statistical software

1.1: Introduction to Crime Data Analysis, R and RStudio

statistical tests

1.7: T-Test

statistics

1.1: Introduction to Crime Data Analysis, R and RStudio

1.9: Correlation

stratified sampling

1.2: Introduction to Data Formations and Graphics

summary function

1.2: Introduction to Data Formations and Graphics

survey data

1.2: Introduction to Data Formations and Graphics

survey questions

1.2: Introduction to Data Formations and Graphics

survey research

1.8: Analysis of Variance

T

test statistic

1.6: Chi-Squared Test

Tukey's HSD test

1.8: Analysis of Variance

U

Uniform Crime Report

1.3: Creating a New Variable and Producing Summary Statistics

unreported crime

1.5: Reliability of a Scale

USArrests dataset

1.9: Correlation

V

validity

1.5: Reliability of a Scale

variability

1.4: Central Tendency and Variability

variable creation

1.3: Creating a New Variable and Producing Summary Statistics

variance

1.4: Central Tendency and Variability

visual analog scales
