Preface

Unit Descriptions

1: One-Variable Statistics - Basics

- 1.1: Terminology - Individuals/Population/Variables/Samples
- 1.2: Visual Representation of Data I - Categorical Variables
- 1.3: Visual Representation of Data II - Quantitative Variables
- 1.4: Numerical Descriptions of Data I: Measures of the Center
- 1.5: Numerical Descriptions of Data, II: Measures of Spread
- 1.6: Exercises

2: Bivariate Statistics - Basics

- 2.1: Terminology - Explanatory/Response or Independent/Dependent
- 2.2: Scatterplots
- 2.3: Correlation
- 2.4: Exercises

3: Linear Regression

- 3.1: The Least Squares Regression Line
- 3.2: Applications and Interpretations of LSRLs
- 3.3: Cautions
- 3.4: Exercises

4: Probability Theory

- 4.1: Definitions for Probability
- 4.2: Conditional Probability
- 4.3: Random Variables
- 4.4: Exercises

5: Bringing Home the Data

- 5.1: Studies of a Population Paramete
- 5.2: Studies of Causality
- 5.3: Experimental Ethics
- 5.4: Exercises

6: Basic Inferences

- 6.1: The Central Limit Theorem
- 6.2: Basic Confidence Intervals
- 6.3: Basic Hypothesis Testing
- 6.4: Exercises
- 6.5: Bibliography
